About ETSI

We produce globally applicable standards for Information & Communications Technologies (ICT) including fixed, mobile, radio, broadcast, internet and as well as several other technologies.

ETSI is recognised as an official European Standards Organization by the European Commission (EC) and enables valuable access to European markets.

High quality and low time-to-market are our constant aims and we continually strive to collaborate with research bodies.

We are active in vital supporting areas such as interoperability and we offer event services related to standardization including forum hosting.

Our international reputation is built on openness, discussion, consensus and direct input from our members.

Dr. Walter Weigel, Director-General

Join ETSI now - and grow your market!

Call **ETSI Membership Care** now on +33 4 92 94 42 69 for direct input to ETSI technical work, to access state-of-the-art developments, exploit business networking opportunities and help shape your marketplace.

ETSI is a leading developer of industry standards in a broad range of industries. Globally recognized, ETSI has strategic relationships with the IEC, ISO, and the ITU and satisfies all SDO requirements set by the World Trade Organization, offering more paths to international standardization.

ETSI is a not-for-profit organization whose 720+ member companies and organizations, from 62 countries across 5 continents worldwide, participate directly in our technical activities .

You can also access more information by browsing our website: **www.etsi.org**.

Welcome to the new flexible ETSI WEBstore service!

Our **WEBstore service** staff are committed to providing the highest level of service with timely and well researched answers to all enquiries. To ensure the level of support and service you demand, we will:

- Respond within four working hours to any message or call-back request received;
- Manage your request professionally and with courtesy;
- Answer your question during your call if at all possible or, if necessary, follow it up promptly;
- Provide you with the required information when available and direct you to alternative sources if necessary;
- Value your suggestions and feedback and ensure they are forwarded to the appropriate team.

WEBstore has been created to facilitate access to ETSI new releases (updated on a day-to-day basis) as well as other products and services provided by ETSI (Events Services, Algorithms, etc.), and to make sourcing the most suitable standard a simple task.

With an active library of more than 22,000 standards already published and many more under development, ETSI is increasingly the central source of standardization for a broad range of emerging technologies and welcomes the participation of both large and small organizations as well as individual engineers.

Whichever sector you are coming from, whether it be business, technical or industrial, the expertise of the many hundreds of experts involved in the development of ETSI standards can play an important role in your professional life.

For more news and information about ETSI activities visit our website **www.etsi.org**.

GSM-SMG archive DVD-RoM

A comprehensive record of the design of GSM, which is the basis for evolutionary mobile communications technologies. The meeting reports of every GSM/SMG plenary meeting from 1983 to 2000 (meetings n°1 to n°32) and all Temporary Documents from meeting n°6 to n°32.

"A Technical History of GSM Standards" DVD-Rom

Three sets of meeting documents and reports for your technical library:

- CEPT GSM meetings: 1982 to 1991 (~10 000 documents)
- ETSI SMG meetings: 1992 to 2000 (~60 000 documents)
- Draft and published version of GSM specifications (~8 000 documents)

**Pre-order now to receive your set of DVDs in Q3/2011. Pay once the product is ready to be shipped.*

ETSI White Papers (free!)

ETSI White Papers provide informal overviews of various technical topics related to our activity. They summarize the work that we and other organizations have been doing on each topic, as well as highlighting broader issues related to the successful deployment of the technologies and services discussed.

Please note: the White Papers do not constitute an official or agreed position of ETSI, nor of our Members. The views expressed are entirely those of the authors.

White Papers produced by ETSI:

- **Security for ICT - the Work of ETSI** Second Edition
Authors: Carmine Rizzo (ETSI) & Charles Brookson (BERR UK)
- **Young Children and ICT - current issues in the provision of ICT technologies and services for young children**
Author: Anne M Clarke (European Management Services, UK)
- **Achieving Technical Interoperability - the ETSI Approach**
Authors: Hans van der Veer (Alcatel-Lucent) & Anthony Wiles (ETSI)
- **GSM operation onboard aircraft**
Author César Gutiérrez Miguélez (ETSI)
- **ICT Product Proofing Against Crime**
Authors: Charles Brookson (DTI UK), Graham Farrell, Jen Mailley & Shaun Whitehead (Loughborough University, UK) & Dionisio Zumerle (ETSI)

ETSI is certified ISO 9001:2000

ETSI Documentation Service DVD-RoM

We have revised the way we deliver the ETSI DVD and on-line service to our customers so that it is now possible to **easily customise your order according to your needs**.

Available on DVD and via the On-line service are the full text versions of all ETSI deliverables (including 3GPP): ENs, TSs, TRs, ESs SRs, EGs, GSs, ETSs, TBRs, GSM TSs, ETRs, NETs etc. including:

- all editions of published deliverables;
- all drafts currently under various approval procedures;
- full-text search and a complete list of deliverables matching the search, and
- integrated Help and keyword searching.

The complete library of previously published ETSI standards is still available on 3 DVDs (A, B and C) but they can now also be purchased **individually as well as together**.

- DVD A: All ETSI standards up to and including December 2002.
- DVD B: All ETSI standards from January 2003 up to and including December 2006.
- DVD C: All ETSI standards from January 2007 (1Q2007) up to and including December 2009 (4Q2009).

Any quarterly update can now be purchased at any time:

- **Either** individually (however this excludes access to our online update service).
- **Or** you can order **all 4 quarterly updates** which will also include, **free of charge**, unlimited access to the **On-line Update service**.

ETSI is certified ISO 9001:2000

On-line Update Service

The EDS On-line Update service gives you access to all new or revised ETSI standards produced since the last quarterly update DVD release. The library is updated daily.

This service allows:

- access to all previously published ETSI standards;
- selection of appropriate downloads;
- printing of downloads;
- access via the web.

There is also a **basket facility** when downloading standards to enable several items to be **downloaded quickly and easily**.

We are confident that you will find this new flexible service will **meet all your requirements** for accessing our high quality, market leading standards.

Security DVD-RoM

Standardization of security aspects of Information and Communication Technologies (ICT) continues to be a topic that needs careful balance.

This DVD contains the 3rd Edition of the ETSI Security White Paper, which offers an overview of ETSI's work on security in Information and Communications Technologies (ICT). Each section introduces a specific technology and outlines ETSI's involvement in the standardisation of security in that area.

All ETSI's specifications and standards for security are listed at the end of the Paper. Each ETSI document number in the list of publications links to the ETSI deliverable available **online**, from where the **latest published version** at the time of your search can be downloaded, as well as any previous versions.

ETSI is certified ISO 9001:2000
