

**Bearer Independent Call Control (BICC);
Operation of BICC protocol with
ATM Adaptation Layer (AAL) type 2 signalling protocol
Capability Set 1 (CS1)**

[Supplement to ITU-T Recommendation Q.1901, TRQ.3010 (1999), modified]

Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://www.etsi.org/ipr>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This ETSI Guide (EG) has been produced by ETSI Technical Committee Services and Protocols for Advanced Networks (SPAN).

Endorsement notice

All elements of supplement to ITU-T Recommendation Q.1901, TRQ.3010 (1999) apply with the following modifications:

Clause 2

Replace clause 2 by the following:

2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies.

- [1] ETSI EN 301 848-1 (V1.1.1) "Integrated Services Digital Network (ISDN); Bearer independent call control (BICC) signalling procedures in an ATM/IP/..backbone network; Capability Set 1 (CS1); Part 1: Protocol specification".
