

GRIDS & CLOUDS

SERVICE INFRASTRUCTURES

IOP DEMO
01 - 02 DEC.

WORKSHOP
02 - 03 DEC.

Information & registration at <http://www.etsi.org/plugtests/GRID09/GRID.htm>

01 - 03 DECEMBER 2009
ETSI - FRANCE

GRIDS CLOUDS & SERVICE INFRASTRUCTURES

SCOPE OF THE WORKSHOP SESSIONS

- **Keynote Talk by an EC “VIP”** The aim of this presentation is to give an introduction by the EC as the topics of the Workshop are important parts of the Commission's research agenda and ETSI GRID was founded to address a strategic standardization requirement. The talk should reflect the current view and work of research funded by the EC but also give a perspective of its contribution to ICT-driven innovation in Europe.
- **Session: “Grid & Cloud: differences and commonalities”** The recent emergence of Cloud computing is the latest in a series of related technical and commercial developments enabled by the convergence of wide-area networking and computing. The presentations in this session will compare and contrast Grid and Cloud computing which are clearly related but differ significantly in their aims and approaches.
- **Session: “Industry visions of Service Oriented Infrastructure (SOI) – 2 Parts”** The presentations in this session should give a range of IT and Telco industry views of Service Oriented Infrastructure in the context of Grid and Cloud. It will provide insight into the future plans of major industry stakeholders with respect to the adoption of SOI. In anticipation of the Panel discussion, a discussion of the role of standardisation in encouraging this emerging market would be beneficial.
- **Cross Industry Panel: “The need for Interoperability in SOI”** Participants: all speakers from the Session on “Industry visions of Service Oriented Infrastructure (SOI)” and one person of ETSI Grid, OGF, and DMTF. First short presentations of ETSI GRID, OGF and DMTF (10' each) will provide a view of current relevant standards activities. Industry participants should have given an initial view in the previous session. The panel discussion will have a Q&A style. A number of questions will be prepared in advance but there will also be the opportunity for the audience to put questions to the panel.
- **Keynote Talk** The keynote speaker in this session is invited to give a presentation related to “Grids, Clouds and Service Infrastructures” with freedom as to the detailed content.
- **Feedback from PLUGTEST: Results & lessons learned** This session will summarise the activities of the Plugtest part of this event and include an open discussion on the options for organising the next GRID Plugtests event to maximize its value in promoting interoperability.
- **Session: “Success Stories and Challenges”** The presentations in this session will describe early successes and experiences from pioneers in this area. They should also discuss any future challenges in maximising the potential of Grids, Clouds and Service Infrastructures, including the need, if any, for standardisation.
- **Session: “Emerging trends around Grids, Clouds and SOI”** The research projects invited to contribute to this session will present their view on specific topics inside the area of “Emerging trends around Grids, Clouds and SOI”. General project presentations are not appropriate. Identification and motivation of research challenges and the role of standardisation in exploiting anticipated results are especially of interest.
- **Panel: "Paving the way for cooperative standards development..."** This session is the wrap-up session of the event with a panel discussion involving ETSI TC GRID and the chairs of each workshop session. This will give an opportunity to reflect on earlier presentations and discussions and to identify the next steps in the cooperative development of open standards for Grids, Clouds and Service Infrastructures.

SPONSOR THE EVENT

The event offers Sponsorship opportunities for you to:

- **BOOST YOUR IMAGE** show that your company is dynamic, pro-active and innovative
- **PROMOTE YOUR BRAND** by associating it with the key organizations active in Grid and Cloud Computing technologies
- **TARGET THE ACTIVE AUDIENCE** In your specific domain
- **CREATE NEW BUSINESS OPPORTUNITIES** for your company

VISIBILITY & BENEFITS	PLATINUM 7.000€	GOLD 5.000€	SILVER 3.000€	BRONZE 1.000€
Display of company logo on promotional event material including web site, posters, handouts and workshop banner	Yes	Yes	Yes	Yes
Free pass to the workshop	7	5	3	1
Booth in the exhibition area	Yes	Yes	Yes	No
Company brochure in the workshop handouts (provided by sponsor)	Yes	Yes	No	No
Company poster or roll-up in the Workshop area	Yes	Yes	No	No
Free pass to the Plugtests including company and 2 participants	Yes	No	No	No
Company poster or roll-up in the Plugtests area	Yes	No	No	No
