

The Standards People

# Specialist Task Forces (STFs)

Presented by: **Gavin Craik**

For: **ETSI Seminar**

06-07.06.2019

## What is an STF ?

---

Team established to accelerate the production of standards urgently required by ETSI Members or EC/EFTA.

Gives ETSI competitive advantage by making readily available the technical competence to quickly develop standards needed by the market and/or to implement European Union policies

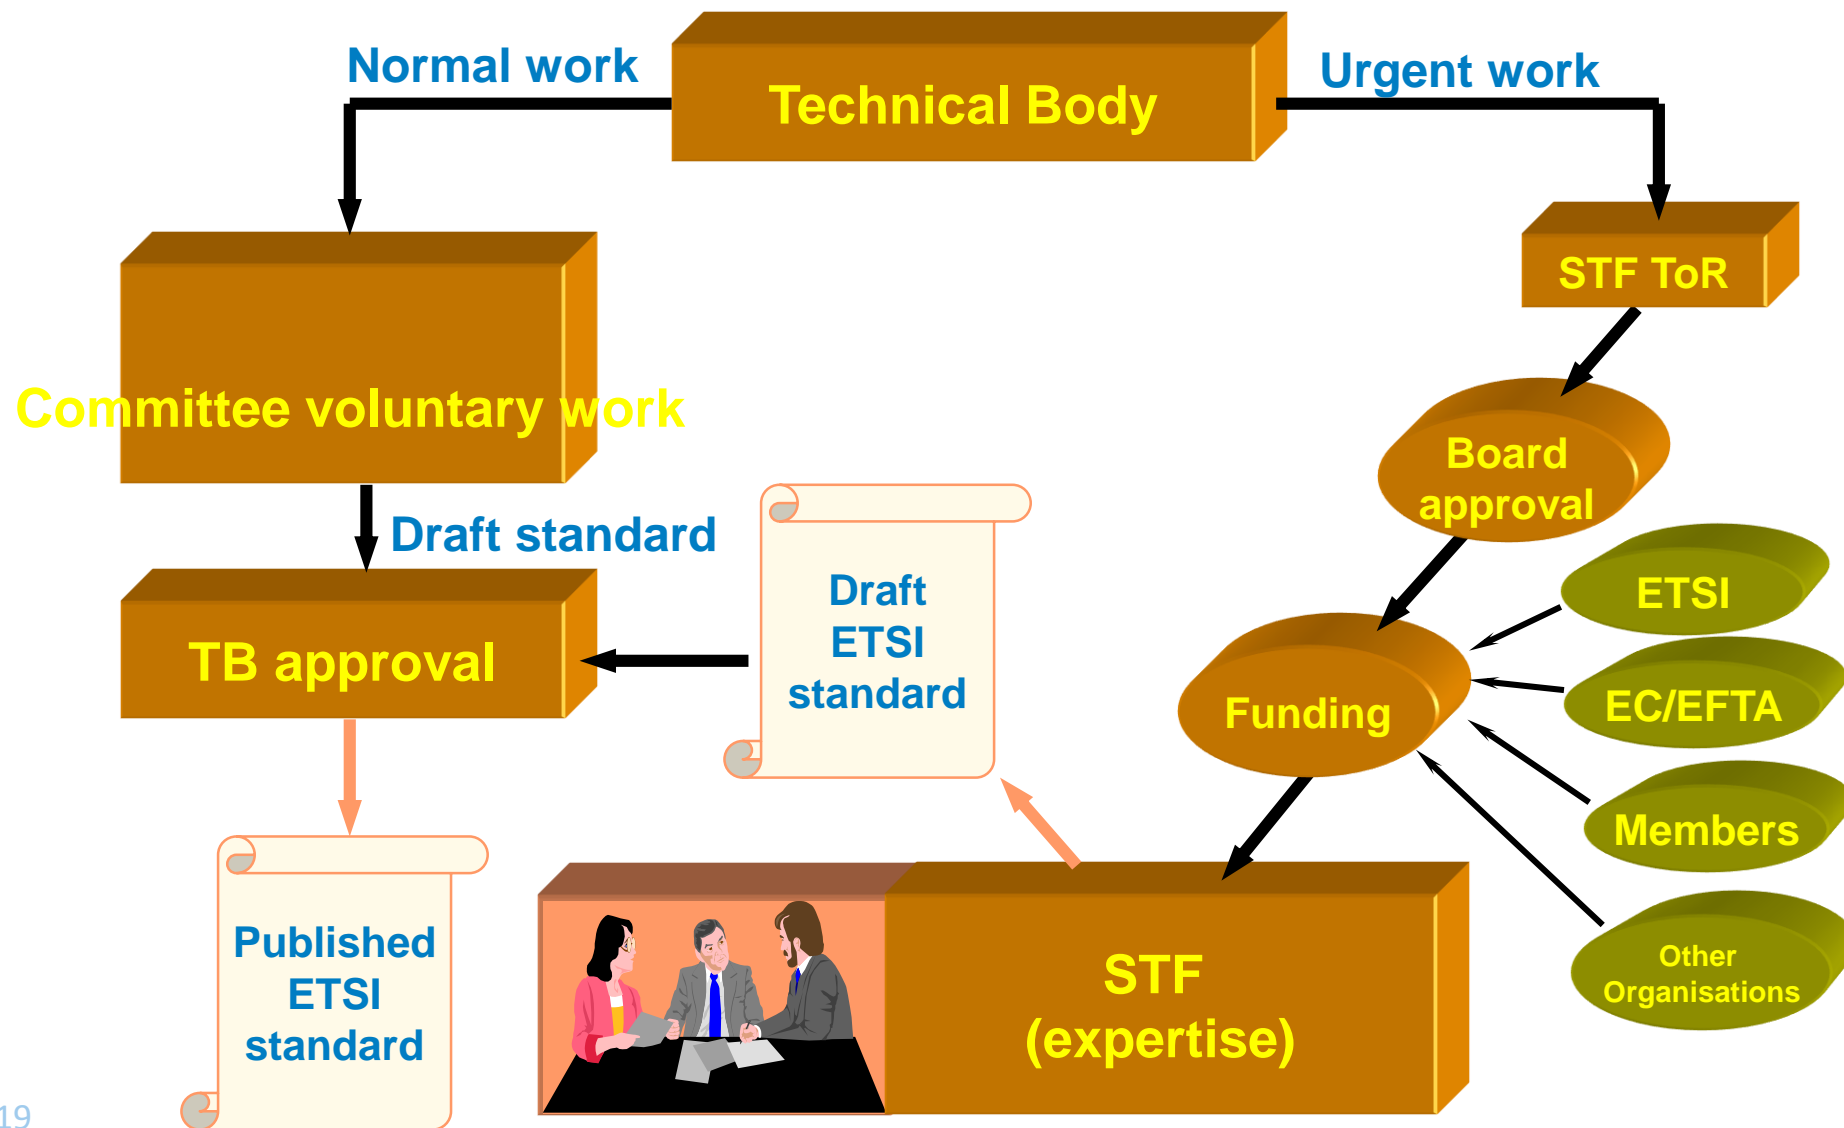

Proposed by the ETSI Technical Bodies, the Board or the Special Committees and approved by the Board

Works under the technical guidance of the reference Technical Body

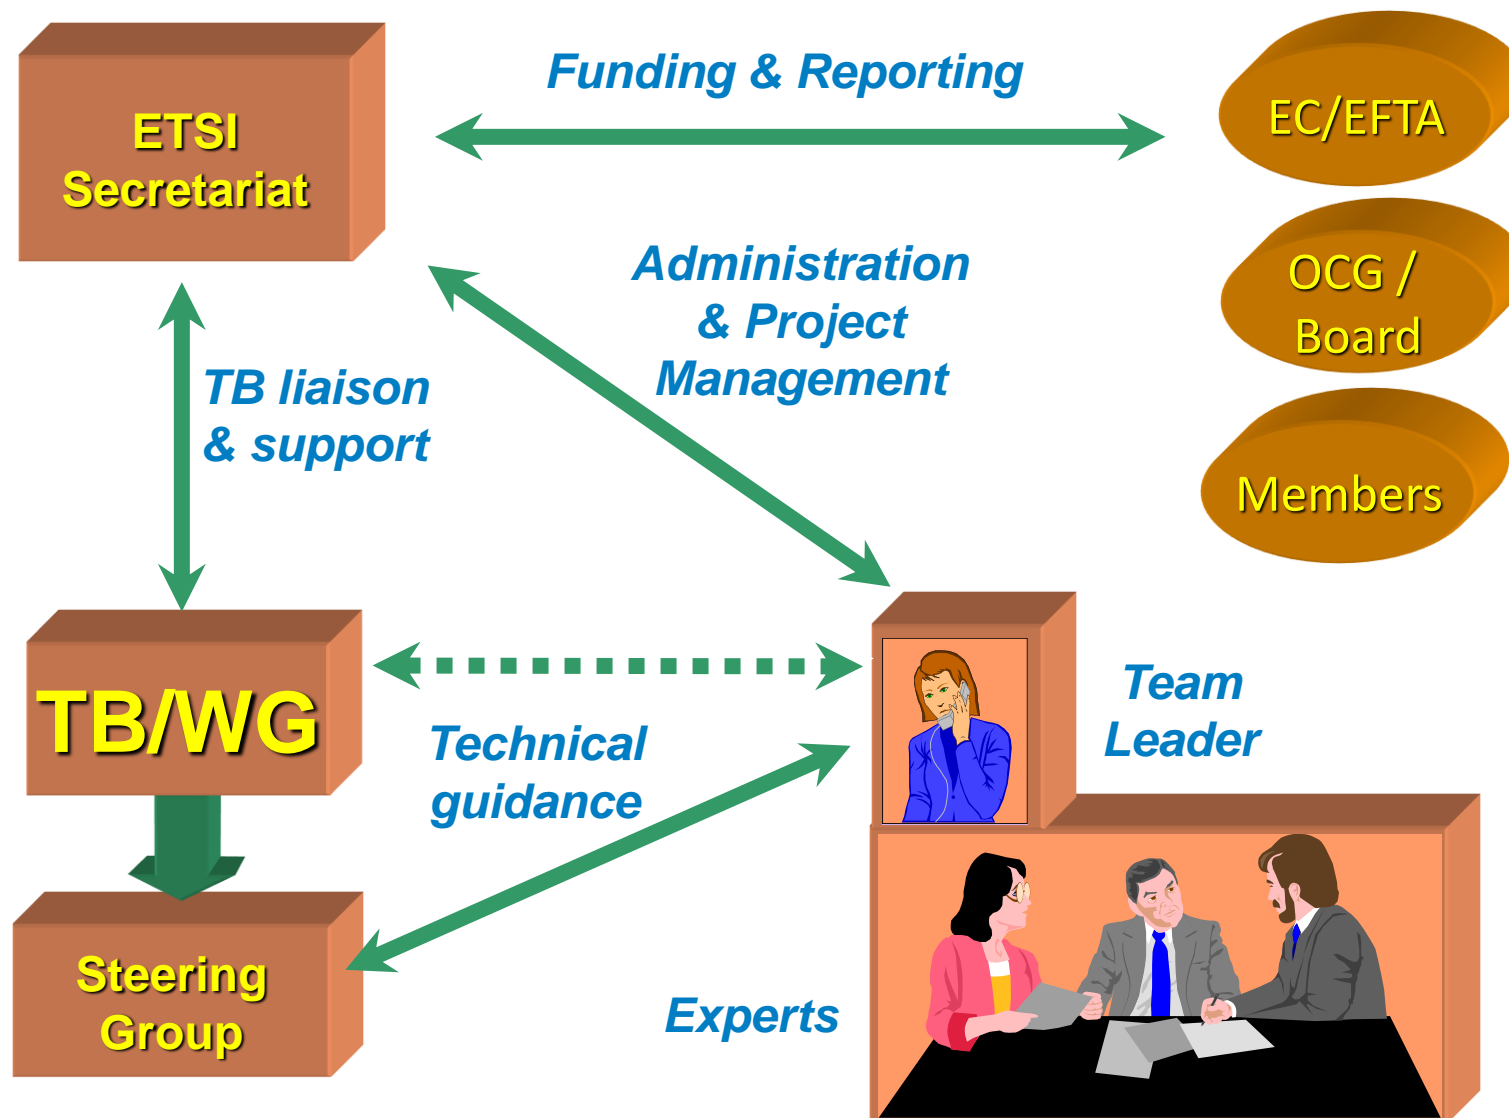

Expertise for the STFs can be proposed by ETSI member companies or organizations or by non-members, with the support of an ETSI Member

Funded from the ETSI budget, from EC/EFTA action grants, from voluntary contributions of ETSI Members or from other Organizations

# The STF role in standards production

# Organization of an STF

## How to make an STF in a TB

---

Identify requirement in TB/WG (urgent work and not enough voluntary resources/specific expertise not available)

Identify Work Items to be produced (must be TB approved)

Prepare STF ToR (“business case” + min 4 supporting Members + technical description)

Link to Standardization Request, or latest Rolling Plan for ICT Standardization for EC/EFTA funding

Get TB approval of STF ToR before submitting for OCG/Board approval

## How to apply for an STF

---

Proposal must be sent by an organisation, not an individual

Proposals should be sent by ETSI members. Proposals can come from non-members but must be supported by an ETSI member. If selected, the contract will be made with the non-member organisation

Calls for expertise announced by collective letter and on the ETSI portal

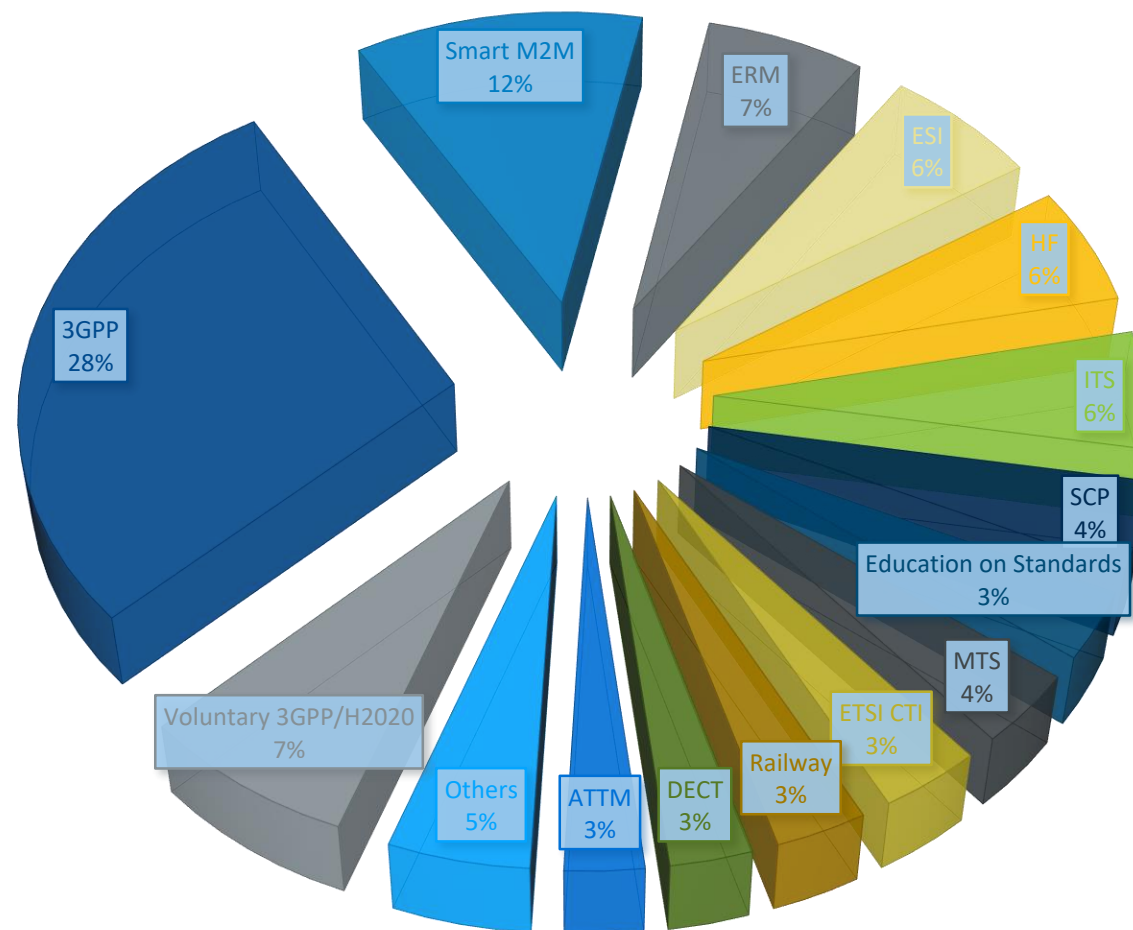

<http://portal.etsi.org/stfs/Cfe/OpenCfe.asp>
