Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://webapp.etsi.org/IPR/home.asp>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This ETSI Standard (ES) has been produced by ETSI Technical Committee Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN).

To evaluate conformance of a particular implementation, it is necessary to have a statement of which capabilities and options have been implemented for a telecommunication specification. Such a statement is called an Implementation Conformance Statement (ICS).

1 Scope

The present document provides the Implementation Conformance Statement (ICS) proforma for the Application Programming Interface for Open Service Access (OSA) defined in ES 202 915 [1] to [18] in compliance with the relevant requirements, and in accordance with the relevant guidance given in ISO/IEC 9646-7 [20] and ETS 300 406 [21].

The supplier of an implementation which is claimed to conform to a part of ES 202 915 [1] to [18] is required to complete a copy of the ICS proforma provided in annex A through to annex J of the present document and is required to provide the information necessary to identify the supplier and the implementation.

3 Definitions and abbreviations

3.1 Definitions

For the purposes of the present document, the terms and definitions given in ES 202 915 [1] to [18], ISO/IEC 9646-1 [19] and ISO/IEC 9646-7 [20] and the following apply:

API ICS: ICS for an implementation or system claimed to conform to a given API specification

Implementation Conformance Statement (ICS): statement made by the supplier of an implementation or system claimed to conform to a given specification, stating which capabilities have been implemented

NOTE: The ICS can take several forms: protocol ICS, profile ICS, profile specific ICS, information object ICS, etc.

ICS proforma: document, in the form of a questionnaire, which when completed for an implementation or system becomes an ICS

Protocol ICS (PICS): ICS for an implementation or system claimed to conform to a given protocol specification

3.2 Abbreviations

For the purposes of the present document, the following abbreviations apply:

API ICS	Application Programming Interface
ICS	Implementation Conformance Statement
IUT	Implementation Under Test
PICS	Protocol Implementation Conformance Statement
SCS	System Conformance Statement
SUT	System Under Test

4 Conformance

If it claims to conform to the present document, the actual ICS proforma to be filled in by a supplier shall be technically equivalent to the text of the ICS proforma given in annexes A through J, and shall preserve the numbering/naming and ordering of the proforma items.

An ICS which conforms to the present document shall be a conforming ICS proforma completed in accordance with the guidance for completion given in clause A.1.

Annex A (normative): ICS proforma for Framework and SCFs - General

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

A.1 Guidance for completing the ICS proforma

A.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915 [1] to [18] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the protocol;
- global statement of conformance;
- roles;
- functionalities.

A.1.2 Abbreviations and conventions

The ICS proforma contained in this annex is comprised of information in tabular form in accordance with the guidelines presented in ISO/IEC 9646-7 [20].

Item column

The item column contains a number which identifies the item in the table.

Item description column

The item description column describes in free text each respective item (e.g. parameters, timers, etc.). It implicitly means "is <item description> supported by the implementation?".

Status column

The following notations, defined in ISO/IEC 9646-7 [20], are used for the status column:

NOTE: In the case where items of the group do not always belong to the same table, all o.i shall be defined in the last clause of the ICS proforma, and the text "which is defined immediately following the table" should be replaced by "which is defined in the last clause of this annex".

ci: Conditional - the requirement on the capability ("m", "o", "x" or "n/a") depends on the support of other optional or conditional items. "i" is an integer identifying a unique conditional status expression which is defined immediately following the table.

Reference column

The reference column makes reference to parts of ES 202 915 [1] to [18], except where explicitly stated otherwise.

Support column

The support column shall be filled in by the supplier of the implementation. The following common notations, defined in ISO/IEC 9646-7 [20], are used for the support column:

Y or y: supported by the implementation.

N or n: not supported by the implementation.

N/A, n/a or -: no answer required (allowed only if the status is n/a, directly or after evaluation of a conditional status).

It is also possible to provide a comment to an answer in the space provided at the bottom of the table.

References to items

For each possible item answer (answer in the support column) within the ICS proforma a unique reference exists, used, for example, in the conditional expressions. It is defined as the table identifier, followed by a character "/", followed by the item number in the table. If there is more than one support column in a table, the columns are discriminated by letters (a, b, etc.), respectively.

EXAMPLE 1: A.5/4 is the reference to the answer of item 4 in table A.5.

EXAMPLE 2: A.6/3b is the reference to the second answer (i.e. in the second support column) of item 3 in table A.6.

Prerequisite line

A prerequisite line takes the form: Prerequisite: <predicate>.

A prerequisite line after a clause or table title indicates that the whole clause or the whole table is not required to be completed if the predicate is FALSE.

A.1.3 Instructions for completing the ICS proforma

The supplier of the implementation shall complete the ICS proforma in each of the spaces provided. In particular, an explicit answer shall be entered, in each of the support column boxes provided, using the notation described in clause A.1.2.

If necessary, the supplier may provide additional comments in space at the bottom of the tables, or separately on sheets of paper.

More detailed instructions are given at the beginning of the different clauses of the PICS proforma.

A.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

The product supplier information and client information should both be filled in if they are different.

A.3 Identification of the protocol

This ICS proforma applies to the following standard:

- ES 202 915 [1] to [18]: "Open Service Access (OSA); Application Programming Interface (API)".

A.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915 specification.
Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

A.5 General

A.5.1 Functionalities

Table A.1: Functionalities

Item	Major role: Does the implementation support the functionalities described in:	Reference	Status	Support

NOTE: that an SCF implementation shall support at least some of the interfaces described in the Framework document ES 202 915-3 [3] and that therefore annex B shall always be completed.

Annex B (normative): ICS proforma for ES 202 915-3 framework functionalities

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

B.1 Guidance for completing the ICS proforma

B.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915-3 [3] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- major capabilities, if any;
- interfaces;
- methods.

B.1.2 Abbreviations and conventions

The contents of this clause can be found in clause A.1.2.

B.1.3 Instructions for completing the ICS proforma

The contents of this clause can be found in clause A.1.3.

B.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

B.2.1 Date of the statement

B.2.2 Implementation under test identification

IUT name:

IUT version:

B.2.3 System under test identification

SUT name:

Hardware configuration:

Operating system:

B.2.4 PICS contact person

(A person to contact if there are any queries concerning the content of the PICS)

Name:

Telephone number:

Facsimile number:

E-mail address:

B.3 Identification of the protocol

This ICS proforma applies to the following standard:

- ES 202 915-3 [3]: "Open Service Access (OSA); Application Programming Interface (API); Part 3: Framework".

B.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915-3 [3]. Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

B.5 Functionalities of the Framework

This clause contains the ICS proforma tables related to the functionalities provided by the Framework.

B.5.1 APIs supported

Annex C (normative): ICS proforma for ES 202 915-4 series Call Control SCFs

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

C.1 Guidance for completing the ICS proforma

C.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915-4-1 [4] to ES 202 915-4-5 [8] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- major capabilities, if any;
- interfaces;
- methods.

C.1.2 Abbreviations and conventions

The contents of this clause can be found in clause A.1.2.

C.1.3 Instructions for completing the ICS proforma

The contents of this clause can be found in clause A.1.3.

C.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

C.2.1 Date of the statement

C.2.2 Implementation under test identification

IUT name:

IUT version:

C.2.3 System under test identification

SUT name:

Hardware configuration:

Operating system:

C.2.4 PICS contact person

(A person to contact if there are any queries concerning the content of the PICS)

Name:

Telephone number:

Facsimile number:

E-mail address:

.....

Additional information:

C.3 Identification of the protocol

This ICS proforma applies to the following standards:

- ETSI ES 202 915-4-1 [4]: "Open Service Access (OSA); Application Programming Interface (API); Part 4: Call Control; Sub-part 1: Call Control Common Definitions; (Parlay 4)".
- ETSI ES 202 915-4-2 [5]: "Open Service Access (OSA); Application Programming Interface (API); Part 4: Call Control; Sub-part 2: Generic Call Control SCF; (Parlay 4)".
- ETSI ES 202 915-4-3 [6]: "Open Service Access (OSA); Application Programming Interface (API); Part 4: Call Control; Sub-part 3: Multi-Party Call Control SCF; (Parlay 4)".
- ETSI ES 202 915-4-4 [7]: "Open Service Access (OSA); Application Programming Interface (API); Part 4: Call Control; Sub-part 4: Multi-Media Call Control SCF; (Parlay 4)".
- ETSI ES 202 915-4-5 [8]: "Open Service Access (OSA); Application Programming Interface (API); Part 4: Call Control; Sub-part 5: Conference Call Control SCF; (Parlay 4)".

C.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915-4-1 [4] to ES 202 915-4-5 [8] specifications. Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

C.5 Call Control SCF Functionalities

This clause contains the ICS proforma tables related to the Call Control SCF functionalities.

Annex D (normative): ICS proforma for ES 202 915-5 User Interaction SCF

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

D.1 Guidance for completing the ICS proforma

D.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915-5 [9] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- major capabilities, if any;
- interfaces;
- methods.

D.1.2 Abbreviations and conventions

The contents of this clause can be found in clause A.1.2.

D.1.3 Instructions for completing the ICS proforma

The contents of this clause can be found in clause A.1.3.

D.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

D.3 Identification of the protocol

This ICS proforma applies to the following standard:

ES 202 915-5 [9]: "Open Service Access (OSA); Application Programming Interface (API); Part 5: User Interaction SCF".

D.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915-5 [9] specification.
Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

D.5 User Interaction SCF Functionalities

Annex F (normative): ICS proforma for ES 202 915-7 Terminal Capabilities SCF

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

F.1 Guidance for completing the ICS proforma

F.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915-7 [11] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- major capabilities, if any;
- interfaces;
- methods.

F.1.2 Abbreviations and conventions

The contents of this clause can be found in clause A.1.2.

F.1.3 Instructions for completing the ICS proforma

The contents of this clause can be found in clause A.1.3.

F.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

The product supplier information and client information should both be filled in if they are different.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

F.3 Identification of the protocol

This ICS proforma applies to the following standard:

- ES 202 915-7 [11]: "Open Service Access (OSA); Application Programming Interface (API); Part 7: Terminal Capabilities SCF".

F.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915-7 [11] specification.
Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

F.5 Terminal Capabilities SCF Functionalities

This clause contains the ICS proforma tables related to the Terminal Capabilities SCF functionalities.

Annex I (normative): ICS proforma for ES 202 915-10 Connectivity Manager SCF

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

I.1 Guidance for completing the ICS proforma

I.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915-10 [14] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- major capabilities, if any;
- interfaces;
- methods.

I.1.2 Abbreviations and conventions

The contents of this clause can be found in clause A.1.2.

I.1.3 Instructions for completing the ICS proforma

The contents of this clause can be found in clause A.1.3.

I.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

The product supplier information and client information should both be filled in if they are different.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

I.3 Identification of the protocol

This ICS proforma applies to the following standard:

- ES 202 915-10 [14]: "Open Service Access (OSA); Application Programming Interface (API); Part 10: Connectivity Manager SCF".

I.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915-10 [14] specification.
Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

K.6 Functionalities of Applications using Charging SCF

This clause contains the ICS proforma tables related to applications using the Charging SCF functionalities.

K.6.1 Major capabilities

Table K.5: Major capabilities

Item	Major capability: Does the implementation support the following?	Reference	Status	Support
MCA1	Charging with reservations	ES 202 915-12 [16], clause 5.1	o.3	
MCA2	Direct charging	ES 202 915-12 [16], clause 5.2	o.3	
o.3: At least one of these services shall be supported.				

K.6.2 SCF Methods Required by the Application

Table K.6: IpChargingManager Methods

Item	Methods: Is the application capable of invoking the following methods?	Reference	Status	Support
CMI1	createChargingSession	ES 202 915-12 [16], clause 8.1	o.4	
CMI2	createSplitChargingSession	ES 202 915-12 [16], clause 8.1	o.4	
o.4:	It is mandatory to support at least one of these items.			

Table K.7: IpChargingSession Methods

Item	Methods: Is the application capable of invoking the following methods?	Reference	Status	Support
CSI1	creditAmountReq	ES 202 915-12 [16], clause 8.3	o

Annex L (normative): ICS proforma for ES 202 915-13 Policy Management SCF

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

L.1 Guidance for completing the ICS proforma

L.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915-13 [17] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- major capabilities, if any;
- interfaces;
- methods.

L.1.2 Abbreviations and conventions

The contents of this clause can be found in clause A.1.2.

L.1.3 Instructions for completing the ICS proforma

The contents of this clause can be found in clause A.1.3.

L.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

L.2.1 Date of the statement

L.2.2 Implementation under test identification

IUT name:

IUT version:

L.2.3 System under test identification

SUT name:

Hardware configuration:

Operating system:

L.2.4 PICS contact person

(A person to contact if there are any queries concerning the content of the PICS)

Name:

Telephone number:

Facsimile number:

E-mail address:

.....

Additional information:

.....

.....

.....

L.3 Identification of the protocol

This ICS proforma applies to the following standard:

- ES 202 915-13 [17]: "Open Service Access (OSA); Application Programming Interface (API); Part 13: Policy Management SCF".

L.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915-13 [17] specification.
Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

L.5 Policy Management SCF Functionalities

This clause contains the ICS proforma tables related to the Presence and Availability Management SCF functionalities.

L.5.1 Interfaces Implemented

Annex M (normative): ICS proforma for ES 202 915-14 Presence and Availability Management SCF

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

M.1 Guidance for completing the ICS proforma

M.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ES 202 915-14 [18] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- major capabilities, if any;
- interfaces;
- methods.

M.1.2 Abbreviations and conventions

The contents of this clause can be found in clause A.1.2.

M.1.3 Instructions for completing the ICS proforma

The contents of this clause can be found in clause A.1.3.

M.2 Identification of the implementation

Identification of the IUT and the system in which it resides (the SUT) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

M.2.1 Date of the statement

M.2.2 Implementation under test identification

IUT name:

IUT version:

M.2.3 System under test identification

SUT name:

Hardware configuration:

Operating system:

M.2.4 PICS contact person

(A person to contact if there are any queries concerning the content of the PICS)

Name:

Telephone number:

Facsimile number:

E-mail address:

.....

Additional information:

.....

.....

.....

M.3 Identification of the protocol

This ICS proforma applies to the following standard:

- ES 202 915-14 [18]: "Open Service Access (OSA); Application Programming Interface (API); Part 14: Presence and Availability Management SCF".

M.4 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE: Answering "No" to this question indicates non-conformance to the ES 202 915-14 [18] specification.
Non-supported mandatory capabilities are to be identified in the ICS, with an explanation of why the implementation is non-conforming, on pages attached to the ICS proforma.

M.5 Presence and Availability Management SCF Functionalities

This clause contains the ICS proforma tables related to the Presence and Availability Management SCF functionalities.

M.5.1 Major capabilities

M.6 Functionalities of Applications using Presence and Availability Management SCF

This clause contains the ICS proforma tables related to applications using the Presence and Availability Management SCF functionalities.

M.6.1 Major capabilities

Table M.18: Major capabilities

Item	Major capability: Does the implementation support the following?	Reference	Status	Support
MCA1	PAM Access Service	ES 202 915-14 [18], clause 6.2	o.4	
MCA2	PAM EventManagement Service	ES 202 915-14 [18], clause 6.3	o.4	
o.4: At least one of these services shall be supported.				

M.6.2 PAM Access Service

M.6.2.1 Interfaces Implemented for PAM Access Service

Prerequisite: M.18 /MC1

Table M.19: Interfaces for PAM Access Service

Item	Interfaces: Is the interface implemented?	Reference	Status	Support
A_IA1	IpAppPAMPreferenceCheck	ES 202 915-14 [18], clause 8.2.5	m	

M.6.2.2 Methods Implemented for PAM Access Service

Prerequisite: M.18 /MC1

Table M.20: IpAppPAMPreferenceCheck Methods

Prerequisite: M.19 /A_IA1

Item	Methods: Is the method implemented?	Reference	Status	Support
A_PCA_M1	computeAvailability	ES 202 915-14 [18], clause 8.2.5.1	m	

M.6.3 PAM EventManagement Service

M.6.3.1 Interfaces Implemented for PAM EventManagement Service

Prerequisite: M.18 /MC2

Table M.21: Interfaces for PAM EventManagement Service

Item	Interfaces: Is the interface implemented?	Reference	Status	Support
E_IA1	IpAppPAMEventHandler	ES 202 915-14 [18], clause 8.3.3	m	

M.6.3.2 Methods Implemented for PAM EventManagement Service
