## 3 Definitions, symbols and abbreviations

### 3.1 Definitions

For the purposes of the present document, the terms and definitions given in TR 21.905 [5] and the following apply. A term defined in the present document takes precedence over the definition of the same term, if any, in TR 21.905 [5].

**Implementation Conformance Statement (ICS):** statement made by the supplier of an implementation or system claimed to conform to a given specification, stating which capabilities have been implemented

**ICS proforma:** document, in the form of a questionnaire, which when completed for an implementation or system becomes an ICS

**Protocol Implementation Conformance Statement (PICS):** An ICS for an implementation or system claimed to conform to a given protocol specification

**Static conformance review:** A review of the extent to which the static conformance requirements are claimed to be supported by the UEUT, by comparing the answers in the ICS(s) with the static conformance requirements expressed in the relevant specification(s)

### 3.2 Symbols

For the purposes of the present document, the following symbols apply:

<symbol>      <Explanation>

### 3.3 Abbreviations

For the purposes of the present document, the abbreviations given in 3GPP TR 21.905 [1] and the following apply. An abbreviation defined in the present document takes precedence over the definition of the same abbreviation, if any, in 3GPP TR 21.905 [1].

For the purposes of the present document, the following abbreviations apply:

FFS	For Further Study
ICS	Implementation Conformance Statement
PICS	Protocol Implementation Conformance Statement
SCS	System Conformance Statement
TC	Test Case
UEUT	User Equipment Under Test

# Annex A (normative): ICS proforma for NR/5GS Generation User Equipment

Notwithstanding the provisions of the copyright clause related to the text of the present document, The Organizational Partners of 3GPP grant that users of the present document may freely reproduce the ICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed ICS.

## A.1 Guidance for completing the ICS proforma

### A.1.1 Purposes and structure

The purpose of this ICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in relevant specifications may provide information about the implementation in a standardised manner.

The ICS proforma is subdivided into clauses for the following categories of information:

- instructions for completing the ICS proforma;
- identification of the implementation;
- identification of the protocol;
- ICS proforma tables (for example: UE implementation types, Teleservices, etc).

### A.1.2 Abbreviations and conventions

The ICS proforma contained in this annex is comprised of information in tabular form in accordance with the guidelines presented in ISO/IEC 9646-7 [18].

#### Item column

The item column contains a number which identifies the item in the table.

#### Item description column

The item description column describes in free text each respective item (e.g. parameters, timers, etc.). It implicitly means "is <item description> supported by the implementation?".

#### Reference column

The reference column gives reference to the relevant 3GPP core specifications.

#### Release column

The release column indicates the earliest release from which the capability or option is introduced.

#### Mnemonic column

The Mnemonic column contains mnemonic identifiers for each item.

#### Comments column

This column is left blank for particular use by the reader of the present document.

### References to items

For each possible item answer (answer in the support column) within the ICS proforma there exists a unique reference, used, for example, in the conditional expressions. It is defined as the table identifier, followed by a solidus character "/", followed by the item number in the table. If there is more than one support column in a table, the columns shall be discriminated by letters (a, b, etc.), respectively.

## A.1.3 Instructions for completing the ICS proforma

The supplier of the implementation may complete the ICS proforma in each of the spaces provided. More detailed instructions are given at the beginning of the different clauses of the ICS proforma.

---

## A.2 Identification of the User Equipment

Identification of the User Equipment should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

The product supplier information and client information should both be filled in if they are different.

A person who can answer queries regarding information supplied in the ICS should be named as the contact person.

NOTE: The values indicated in column "Release" for bands are to be understood as the specifications release version in which a band was introduced and not as a mandate that a UE conforming to particular release shall support a particular band. For further guidance to release independent bands see TS 38.307 [19].

NOTE: See Annex B for status of completed NR bands and power classes in this version of 3GPP UE conformance test specifications.

Note 1: Notation used for intra-band contiguous CA Bands is according to TS 38.101-1 [23] Table 5.5A.1-1, e.g. 'CA\_n77C' indicates CA operation on NR band n77 with DL CA Bandwidth Class C.

Note 2: The UL CA capabilities as per Table A.4.3.2A.2.1-2 can be supported on a single band. The UE supplier shall indicate all supported UL CA Bandwidth Class(es), in uplink of the supported CA Band(s), as per TS 38.101-1 [23] Table 5.5A.1-1. For this release of specification valid choices are 'N', 'nXB' and 'nXC', where nX is the NR band. For example, for CA\_n1B, 'N' would mean only DL CA, 'n1B' would mean both DL and UL CA.

Note 3: The UE supplier shall indicate the supported Bandwidth Combination Set(s) as per TS 38.101-1 [23] Table 5.5A.1-1.

Note 4: Void.

Note 5: See UL(table\_index) in Note 1 of Table 4.0-3 and UL\_nCC(table\_index) in Note 2 of Table 4.0-3 in TS 38.522 [9].

Note 6: A UE that supports NR Band n66 (Table A.4.3.1-1) and CA operation in any CA band shall also support the DL CA configurations CA\_n66B and CA\_n66(2A), as per Note 7, in Table 5.2-1, in TS 38.521-1 [5].

Note 1: Notation used for intra-band contiguous CA Bands is according to TS 38.101-2 [24] Table 5.5A.1-1, e.g. 'CA\_n257C' indicates CA operation on NR band n257 with DL CA Bandwidth Class C.

Note 2: The UL CA capabilities as per Table A.4.3.2A.2.2-2 can be supported on a single band. The UE supplier shall indicate all supported UL CA Bandwidth Class(es), in uplink of the supported CA Band(s), as per TS 38.101-2 [24] Table 5.5A.1-1. For this release of specification valid choices are 'N', 'nXB' ~ 'nXM' and 'nXO' ~ 'nXQ', where nX is the NR band. For example, for CA\_n257C, 'N' would mean only DL CA, 'n257C' would mean both DL and UL CA operation on NR band n257 with CA Bandwidth Class C.

Note 3: The UE supplier shall indicate the supported Bandwidth Combination Set(s) as per TS 38.101-2 [24] Table 5.5A.1-1.

Note 4: Void.

Note 5: See UL(*table\_index*) in Note 1 of Table 4.0-3 and UL\_nCC(*table\_index*) in Note 2 of Table 4.0-3 in TS 38.522 [9].

Note 1: Notation used for inter-band CA Bands is according to TS 38.101-1 [23] Table 5.5A.3.1-1, e.g. 'CA\_n1A-n78C' indicates CA operation on NR band n1 and n78 with DL CA Bandwidth Class A and C respectively.

Note 2: The UL CA capabilities as per Table A.4.3.2A.4.1-2 can be supported on a single or multiple CA Band(s). The UE supplier shall indicate all supported UL CA Bandwidth Class(es), in uplink of the supported CA Band(s), as per TS 38.101-1 [23] Table 5.5A.3.1-1. For this release of specification valid choices are 'N', 'nXA-nYA', 'nX(2A)', 'nXB' and 'nXC', where both nX and nY are the NR bands. For example, for CA\_n1A-n77A, 'N' would mean only DL CA, 'n1A-n77A' would mean both DL and UL CA.

Note 3: The UE supplier shall indicate the supported Bandwidth Combination Set(s) as per TS 38.101-1 [23] Table 5.5A.3.1-1.

Note 4: Void.

Note 5: See UL(*table\_index*) in Note 1 of Table 4.0-3 and UL\_nCC(*table\_index*) in Note 2 of Table 4.0-3 in TS 38.522 [9].

Note 6: A UE that supports NR Band n66 (Table A.4.3.1-1) and CA operation in any CA band shall also support the DL CA configurations CA\_n66B and CA\_n66(2A), as per Note 7, in Table 5.2-1, in TS 38.521-1 [5].

Note 7: The ULTxSwitching capability can be reported on inter-band CA band combinations. The UE supplier shall indicate inter-band CA band pairs on which it supports 1Tx-2Tx or 2Tx-2Tx ULTxSwitching. For this release of specification valid choices are 'N' and 'nX-nY', where both nX and nY are NR bands. For example, for CA\_n1A-n77A, 'N' would mean not supporting ULTxSwitching, 'n1-n77' would mean supporting of ULTxSwitching on this band pair. If UE supplier indicates supporting of ULTxSwitching on a band pair, they shall indicate at least one inter-band UL CA configuration on the same band pair in the column "Supported CA Bandwidth Class(es) in UL". The ULTxSwitching is only tested with 2 UL or 3 UL CCs, so UE is allowed to report 'N' by default for CA configuration with > 3 component carriers.

Note 8: See ULTxSwitching(*table\_index*) and 2Tx\_ULTxSwitching(*table\_index*) in Note 6 of Table 4.0-3 in TS 38.522 [9].

Note 9: See DL\_nCC(*table\_index*) in Note 4 of Table 4.0-3 in TS 38.522 [9].

Note 10: A UE that supports ULTxSwitching on a band pair might report the uplinkTxSwitching-DL-Interruption-r16 capability on the same band pair. If UE doesn't report this capability, no DL interruption is allowed during UL Tx switching. For certain band configurations DL interruption is not allowed according to Note 8 in Table 5.2A.2.1-1 of TS 38.101-1 [23], therefore the corresponding entry is prefilled by 'Not Supported'.

Note 11: For configurations with Note 1 in Table 5.2A.2.1-1 of TS 38.521-1 [5], UE capability simultaneousRxTxInterBandCA is mandatory, therefore the corresponding entry is prefilled with 'Yes'.

Note 12: The UE supplier shall indicate the supported single uplink carrier with power class other than PC3, as per TS 38.101-1 [23] Table 5.5A.3.1-1. For this release of specification valid choices are '−', 'nX PC2', 'nY PC2', where both nX and nY are the NR bands. For example, for CA\_n1A-n78A, '−' would mean only supports PC3 single uplink carrier, 'n1 PC2' would mean supports single carrier PC2 on band n1, 'n78 PC2' would mean supports single carrier PC2 on band n78.

Note 1: Notation used for inter-band CA Bands is according to TS 38.101-1 [23] Table 5.5A.3-2, e.g. 'CA\_n66B-n70A-n71A' indicates CA operation on NR band n66, n70 and n71 with DL CA Bandwidth Class B, A and A respectively.

Note 2: The UL CA capabilities as per Table A.4.3.2A.4.2-2 can be supported on a single or multiple CA Band(s). The UE supplier shall indicate all supported UL CA Bandwidth Class(es), in uplink of the supported CA Band(s), as per TS 38.101-1 [23] Table 5.5A.1-1. For this release of specification valid choices are 'N', 'nXA-nYA', 'nX(2A)' and 'nXC', where both nX and nY are the NR bands. For example, for CA\_n66A-n70A-n71A , 'N' would mean only DL CA, 'n66A-n71A' would mean both DL and UL CA.

Note 3: The UE supplier shall indicate the supported Bandwidth Combination Set(s) as per TS 38.101-1 [23] Table 5.5A.3-2.

Note 4: Void.

Note 5: See UL(*table\_index*) in Note 1 of Table 4.0-3 and UL\_nCC(*table\_index*) in Note 2 of Table 4.0-3 in TS 38.522 [9].

Note 6: A UE that supports NR Band n66 (Table A.4.3.1-1) and CA operation in any CA band shall also support the DL CA configurations CA\_n66B and CA\_n66(2A), as per Note 7, in Table 5.2-1, in TS 38.521-1 [5].

Note 7: See DL\_nCC(*table\_index*) in Note 4 of Table 4.0-3 in TS 38.522 [9].

Note 1: Notation used for inter-band CA Bands is according to TS 38.101-1 [23] Table 5.5A.3.3-1.

Note 2: The UL CA capabilities as per Table A.4.3.2A.4.3-2 can be supported on a single or multiple CA Band(s). The UE supplier shall indicate all supported UL CA Bandwidth Class(es), in uplink of the supported CA Band(s), as per TS 38.101-1 [23] Table 5.5A.3.3-1. For this release of specification valid choices are 'N', 'nXA-nYA', 'nX(2A)' and 'nXC', where both nX and nY are the NR bands. For example, for CA\_nXA-nYA-nWA-nZA , 'N' would mean only DL CA, 'nXA-nYA' would mean both DL and UL CA.

Note 3: The UE supplier shall indicate the supported Bandwidth Combination Set(s) as per TS 38.101-1 [23] Table 5.5A.3.3-1.

Note 4: Void.

Note 5: See UL(*table\_index*) in Note 1 of Table 4.0-3 and UL\_nCC(*table\_index*) in Note 2 of Table 4.0-3 in TS 38.522 [9].

Note 6: A UE that supports NR Band n66 (Table A.4.3.1-1) and CA operation in any CA band shall also comply with the minimum requirements specified for the DL CA configurations CA\_n66B and CA\_n66(2A) in the current version of the specification as per Note 7, in Table 5.2-1, in TS 38.521-1 [5].

Note 7: See DL\_nCC(*table\_index*) in Note 4 of Table 4.0-3 in TS 38.522 [9].

NR FR1 Inter-band NR-DC configuration / Item (Note 1, 6)	Release	Supported	Supported NR-DC Bandwidth Class(es) in UL (Note 2,3)	Supported Bandwidth Combination Set(s)	Supported ULTxSwitching Band Pair (Note 4, 5)
DC_n48A_n70A	Rel-17				
Note 1: Notation used for inter-band NR-DC Bands is according to TS 38.101-1 [23] Table 5.5B.1-1, e.g. 'DC_n2A-n48C' indicates NR-DC operation on NR band n2 and n48 with DL CA Bandwidth Class A and C respectively.					
Note 2: The UL NR-DC capabilities as per Table A.4.3.2B.1.0a.1-2 can be supported on a single or multiple CA Band(s). The UE supplier shall indicate all supported UL NR-DC Bandwidth Class(es), in uplink of the supported NR-DC Band(s), as per TS 38.101-1 [23] Table 5.5B.1-1. For this release of specification valid choices are 'N', 'nXA-nYA', 'nX(2A)', 'nXB' and 'nXC', where both nX and nY are the NR bands. For example, for DC_n48A-n70A, 'N' would mean only DL NR_DC, 'n48A-n70A' would mean both DL and UL NR-DC.					
Note 3: See UL(table_index) in Note 1 of Table 4.0-3 and UL_nCC(table_index) in Note 2 of Table 4.0-3 in TS 38.522 [9].					
Note 4: The ULTxSwitching capability can be reported on inter-band NR-DC band combinations. The UE supplier shall indicate inter-band NR-DC band pairs on which it supports ULTxSwitching. For this release of specification valid choices are 'N' and 'nX-nY', where both nX and nY are NR bands. For example, for DC_n48A-n70A, 'N' would mean not supporting ULTxSwitching, 'n48-n70' would mean supporting of ULTxSwitching on this band pair. If UE supplier indicates supporting of ULTxSwitching on a band pair, they shall indicate at least one inter-band UL NR-DC configuration on the same band pair in the column "Supported NR-DC Bandwidth Class(es) in UL". The ULTxSwitching is only tested with 2 UL CCs, so UE is allowed to report 'N' by default for NR-DC configuration with > 2 component carriers.					
Note 5: See ULTxSwitching(table_index) Note 6 of Table 4.0-3 in TS 38.522 [9].					
Note 6: See DL_nCC(table_index) in Note 4 of Table 4.0-3 in TS 38.522 [9].

Note 1: A UE that supports ULTxSwitching on a band pair might report the uplinkTxSwitching-DL-Interruption-r16 capability on the same band pair. If UE doesn't report this capability, no DL interruption is allowed during UL Tx switching. For certain band configurations DL interruption is not allowed according to Note 14 in Table 5.5B.4.1-1 of TS 38.101-3 [25], therefore the corresponding entry is prefilled by 'Not Supported'.

Note 2: For configurations with Note 7 in Table 5.5B.4.1-1 of TS 38.521-3 [7], UE capability simultaneousRxTxInterBandENDC is mandatory, therefore the corresponding entry is prefilled with 'Yes'.
