Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

Foreword

This final draft ETSI Guide (EG) has been produced by ETSI Technical Committee Human Factors (HF), and is now submitted for the ETSI standards Membership Approval Procedure.

The work has been conducted in an open collaboration with industry, user and consumer representatives, and other relevant stakeholders. The present document is based upon desk research (documents and online sources), best practices, expert knowledge, and an industry-wide consultation and consensus process, aimed at consensus building and a quick uptake and the widest possible support in future product implementations.

Intended readers of the present document are (list non-exhaustive):

- device designers, developers, and manufacturers;
- application developers;
- service providers;
- network operators;
- technical writers and developers of marketing materials; and
- national and international standards bodies and regulatory institutions.

Modal verbs terminology

In the present document "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Introduction

The terms (words, labels) used in the user interface (UI) of a device, service or application may present an obstacle for users if the users are not familiar with those terms or if the users are unsure as to their meaning. While some terms are introduced by manufacturers to denote a new class of features or to distinguish own features from those offered by competitors, most other terms denoting device or service features are not necessarily intended for differentiation. However, in the absence of a harmonized or recommended terminology, the use of those terms may differ considerably among manufacturers and service providers.

The alternative to a confusing plethora of terms is some degree of harmonization among devices, services, and applications, at least for terms not intended to convey a certain brand feature or image. A harmonized terminology can be employed to help prevent the negative effects of an uncontrolled expansion of terms. Those negative effects include:

- increased user difficulties in understanding complex, ambiguous, and inconsistently-used terms, leading to unnecessary confusion;
- increased efforts in user education (user guides);
- increased costs for user support (hotline calls and call agent training);
- limited feature discovery and unclear user expectations (customers who do not understand certain features may not use them, hence revenue may be missed);
- limited uptake (users may be reluctant to use a feature as they are not sure whether it has the expected effect);
- increase of cognitive complexity and subsequent learning effort; and
- abuse in the use of proprietary terms and lack of consistent use of terms.

The need for a harmonized terminology of device, service, and application features increases as new features and functionalities are being developed. Device software, services, and applications are frequently updated, often without even providing an update of the user documentation to the users.

ETSI EG 202 132 [i.1] claims that in order to aid users' learning procedures and to enable and simplify transfer and re-use of knowledge between devices, applications and services, it is relevant to support harmonized vocabularies for the most common and generic mobile ICT functions.

Consistency across basic interactive elements increases the ease and transfer of learning and raises the overall usability of an enough-complex mobile ICT environment. Such a transfer becomes even more important when older users or people with cognitive functional limitations are addressed and expected to use smartphones, mobile services and Internet applications in most segments of everyday life.

A harmonized terminology can also be fed into terminology management systems used within a company to ensure the consistent use of terms across products and the internal and external documentation (e.g. design documents, user guides and promotional materials), see Clause 4.

ETSI EG 202 132 [i.1] contains harmonized English-language terms for a number of areas including user interfaces for hardware and software, configuration of messaging and data services, call features, and terminal functionality. ETSI TR 102 972 [i.2] extends the work done in ETSI EG 202 132 [i.1] towards 3G devices, mobile services, and applications. This extended list of proposed terms forms the initial basis for the terms considered. However, ETSI EG 202 132 [i.1] and ETSI TR 102 972 [i.2] were published a long time ago and require updating, inter alia to cover the many features and services evolved or not available at that time, and to cover other main European languages in addition to English.

The present document addresses this need on the basic level, covering the five largest official EU/EFTA languages (by the number of their native speakers): German, French, English, Italian and Spanish. However, given the speed of change in the mobile ICT landscape, it will naturally require updating to ensure continuing relevance. Furthermore, expansion to cover additional European languages and other languages used in Europe will further increase the usefulness and applicability of the present document.

The selection and validation process of the terms applied throughout their development, performed in collaboration with stakeholders is expected to add a quality dimension to the recommended vocabulary that would be difficult to achieve through an individual effort and is expected to contribute to the use and uptake of this freely available, public resource.

1 Scope

The present document aims at further simplifying end-user access to ICT devices, services, and applications by providing recommended terms for basic and commonly-used ICT-related objects and activities, limited to those terms that end users are commonly exposed to. Recommended terms are provided in five languages: English, French, German, Italian, and Spanish (as spoken in their respective European countries).

The recommended terms apply to mobile ICT devices and mobile applications (whether they are standalone or whether they provide access to related services) commonly found in mobile ICT devices (most of the recommended terms are applicable to both mobile and stationary devices, services, and applications). The recommended terms are applicable to the user interface (UI) design for a product as well as that of any user documentation accompanying it.

User requirements and available results of standardization work have been considered and integrated in the present document, providing implementation-oriented guidance. Wherever possible, a Design-for-All approach has been adopted, taking functional abilities of users, including elderly users and users with cognitive, physical, or sensory limitations into account.

The present document does not provide design guidance, nor does it intend to restrict the ability of market players to further improve and develop their terminals and services. Neither does it intend to limit their options to trademark user interface elements or profile the user experience of brand-specific user interface implementations as a competitive edge.

3 Definition of terms, symbols and abbreviations

3.1 Terms

For the purposes of the present document, the following terms apply:

consensus: general agreement, characterized by the absence of sustained opposition to substantial issues by any of the concerned interests and by a process that involves taking into account the views of all parties concerned and to reconcile any conflicting arguments

design-for-all: design of products to be usable by all people, to the greatest extent possible, without the need for specialized adoption

emergency call: call from a user to an emergency control centre

end user: see **user**

function: abstract concept of a particular piece of functionality in a device or service

generic: generalized set or general purpose set, often in the sense of basic or ordinary

ICT devices and services: devices or services for processing information and/or supporting communication, which has an interface to communicate with a user

impairment: any temporary or permanent; progressive, regressive or static; or intermittent or continuous reduction or loss of psychological, physiological or anatomical function or structure of a user (environmental included)

mobile device: personal communication device, e.g. a smartphone, capable of communicating by using one or several radio technologies, including support for internet access

term: word or a phrase describing a thing or expressing a concept, in a specific language, domain or context

NOTE: Based on the Oxford dictionary.

terminal: physical device which interfaces with a telecommunications network, and hence to a service provider, to enable access to a telecommunications service

NOTE: A terminal also provides an interface to the user to enable the interchange of control actions and information between the user and the terminal, network or service provider.

terminology: vocabulary of technical terms in a particular field, subject, science, or art; nomenclature

usability: effectiveness, efficiency and satisfaction with which specified users can achieve specified goals (tasks) in a specified context and particular environments, see ETSI ETR 095 [i.4] and ISO 9241-11 [i.5]

NOTE: In telecommunications, usability includes the concepts of learnability and flexibility; and reference to the interaction of more than one user (the A and B parties) with each other and with the terminals and the telecommunications system, see ETSI ETR 116 [i.6].

user: person who uses a telecommunications terminal to gain access to and control of a telecommunications service or application

NOTE: The user may or may not be the person who has subscribed to the provision of the service or owns the terminal. Also, the user may or may not be a person with impairments.

User Interface (UI): physical and logical interface through which a user communicates with a telecommunications terminal or via a terminal to a telecommunications service (also called man-machine interface, MMI)

NOTE: The communication is bi-directional in real time and the interface includes control, display, audio, haptic or other elements, in software or hardware.

user requirements: requirements based on user needs and capabilities, on a telecommunication service and any of its supporting components, terminals and interfaces, in order to make use of this service in the easiest, safest, most efficient and most secure way

voice (spoken) command: verbal or other auditory dialogue format which enables the user to input commands to control a device, service or application

4 User-centred development of terms

Intended *users* of the present document are those designing, developing, implementing, and deploying user interfaces for and interaction with mobile ICT devices, services, and applications.

Intended *end users* mentioned in the present document are people who use mobile ICT devices, services, and applications ranging from first time users to experienced users.

Uniformity in the interactive elements increases the transfer of learning between different devices, services, and applications. Such knowledge transfer becomes even more important in a world of ubiquitous devices and services used by heterogeneous users. In particular, harmonized terms (used across devices, services, and applications from different manufacturers and providers) improve the overall usability of the entire ICT ecosystem. Use of the harmonized vocabulary in the present document for the development of ICT devices, services, and applications will enable end users to reapply knowledge and experience.

Previous work reported, e.g. [i.11], addressing the automatic generation of bilingual terminologies, did not meet expectations. Such harmonization efforts tended to use other (e.g. automated extraction) approaches developing common resources, compiling multilingual terminology banks without interoperability, user-centricity and harmonization in focus.

A consistent, harmonized, and accessible terminology will particularly benefit end users with temporary or permanent functional variations, such as those with literacy difficulties, or people with visual or cognitive impairments. A harmonized terminology should be easy to remember, recognize, and retrieve, and the individual terms should represent their related concepts well. A well-designed user terminology should have a shallow learning curve and cover most common tasks and use cases users are likely to encounter through the most common, every-day use patterns.

Finally, the terminology should also be useful for manufacturers' **terminology management** systems, a process to organize and associate terms with a clear set of rules for their usage (e.g. through a term base), also including and harmonized across user guides and user interfaces. Companies invest in terminology management in order to ensure that the terms used in internal documents, external documents such as user guides, in user interfaces, and for marketing information such as advertisements are used consistently.

Unmanaged terminology will easily become inconsistent, leading to confusion and translations difficult to re-use - that will lead to more time- and resource-intensive processes. It typically also reduces user satisfaction, limits cognitive accessibility and is often a main reason to the under-use of potentially beneficial functionality.

ETSI EG 202 417 [i.3] provides detailed guidelines on how terminology management can help improve the quality of user documentation. Applying these assists the user-centred generation of harmonised terminologies. Furthermore, prioritizing the user-centred view over "technical perfection" helps selecting terms the user will understand.

ISO 9999:2016 [i.12] and ISO/IEC TR 29138-1:2018 [i.13] are useful reference and inspirational sources when developing mobile accessibility solutions and have been consulted, together with other functionality-area specific references (e.g. in the field of banking services or healthcare services, where terminology-related national regulations may exist and apply, and should be respected).

ISO/TC 37 Terminology Principles and coordination (see <https://www.iso.org/committee/48104.html>) covers the standardization of descriptions, resources, technologies and services related to terminology, translation, and other language-based activities in the multilingual information society – without focusing on ICT in the mobile context of use.

Last but not least, consistently extending the focus of these efforts beyond the written word to include symbols, icons, pictograms and audiograms (often replacing text) will further benefit the user-centric product and service development.

5 Method

5.1 General

This clause describes the method applied for selecting the user-centred terminology presented in Clauses 6 and 7.

The selection of device-related terms (Clause 6) is inter alia based on the analysis of the five device vendors with the largest market shares in Europe. As the landscape of vendors for applications and services is much more diverse and fragmented across European regions, a different approach had to be selected for those functionality areas (Clause 7).

The method employed consists of three phases:

- Phase 1: Identification of objects and activities from a range of functional areas such as telephony and photography;
- Phase 2: Collection of terms used by major stakeholders; and
- Phase 3: Analysis of terms collected and selection of recommended terms.

5.2 Phase 1: Identification of device-related and service- and applications-related objects and activities

In this first phase, functional areas (such as telephony, accessibility and social media) were identified that define the range of functionalities covered by the present document.

Four functional areas cover functionalities frequently used by many users of mobile ICT devices. These **device-related functional areas** are:

1. General;
2. Accessibility;
3. Telephony; and
4. Photography.

Twelve functional areas cover functionalities frequently used by many users of mobile ICT services and applications. These **service- and applications-related functional areas** are:

1. General;
2. Messaging services;
3. Media services;
4. Societal services and communications;
5. Social media;
6. Banking and payment services;
7. eHealth services;
8. Travel services;
9. Navigation and maps;
10. Games;
11. Searching and browsing; and
12. Tools and miscellaneous.

For each functional area, relevant objects and activities (i.e. those that are frequently used and used by many users) were identified and defined, and the following principles were developed and applied:

Objects and activities were **selected** if they help users in:

- Identifying the functionality (i.e. help the user understand what it does);
- Accessing the functionality;
- Understanding the available options related to a functionality; and/or
- Understanding messages displayed in the context of using a functionality (e.g. error feedback).

Objects and activities were **typically not selected** (unless required by the context) if they cover:

- The most common content of an application (e.g. "Photo", "Take the first exit at the roundabout"), or the style of the interaction;
- Common terms easily found in a dictionary (e.g. "hotel") not addressed in further detail;
- The most common verbal expressions indicating an action taken on an object (e.g. "take a photo"); and/or

- Words, acronyms, or abbreviations used in a specific technical sense (e.g. "CCNR").

Objects and activities relevant for **multiple functional areas** are treated as General terms in both categories (see Clauses 6.2 and 7.2 respectively).

5.3 Phase 2: Collection of terms

For each device-related functional area (Generic, Accessibility, Telephony and Photography), relevant device vendors were identified and the terms used by them for the objects and activities of the respective functional area were collected in the five languages covered by the present document. For the analysis, the top-5 vendors Q1, 2018 were selected based on their market share at the time in Europe for the product category "Smartphone".

In most cases, the number of providers had to be limited to five in order to keep the effort for the analysis manageable. The analysis showed that not all functionalities were necessarily offered by all (five) vendors. Functionalities offered by a sole vendor were not included in the analysis, unless there were strong reasons requiring that (e.g. innovative and important, upcoming functionality or a considerable or dominant market share).

The approach described above for the device-related functionalities could not be applied to the applications and service-related functionalities, as the latter are not based in the device itself and are consequently more dynamic, less consistent, and more differentiated. Instead, a use-case-based approach was employed with the aim of capturing the most-frequently-used terms employed by key stakeholders.

5.4 Phase 3: Analysis and selection

In the final phase of the work, the terms collected in Phase 2 were reviewed and the terms to be recommended were selected based on:

- A check for semantics and syntax in relation to the functionality provided;
- An evaluation with regard to understandability, clarity, and jargon-freeness;
- A check for consistency between vendors (i.e. prevalence of certain terms);
- Final selection, reviews, and prioritization with stakeholders (electronically and through workshops and reviews).

5.5 Principles of use

For the present document, the following principles of use in implementations apply:

- Service and interaction design guidelines are not provided - with one exception: a firm recommendation for redundant support of multiple terms used under stress (e.g. in emergencies);
- In some instances, more than one term is recommended (separated by semicolons), presented in an order of anticipated preference;
- Interchangeable elements within a phrase are separated with a slash (e.g. for "interruptor de timbre/silencio" both "interruptor de timbre" and "interruptor de silencio" are acceptable);
- Elements in brackets are optional (e.g. for "(Rufton-) Lautstärke" both "Lautstärke" and "Rufton-Lautstärke" are acceptable);
- Brand names and brand-specific, or brand-associated, commercial terms have been avoided to the possible extent;
- In certain cases, the support of multiple, redundant choices is recommended (even beyond emergency services mentioned above);

- While individual users are of male, female, or diverse gender, only grammatically masculine terms related to humans are presented in the tables in Clauses 6 and 7 (e.g. only "Benutzer" and not "Benutzerinnen und Benutzer"; only "interlocuteur" and not also "interlocutrice"). This is done in order to keep the tables easy to read. Implementors will have to apply the appropriate form(s) for a given application of the terminology;
- Similarly, while applications address the user either using formal or informal pronouns (e.g. "Deine Favoriten" vs. "Ihre Favoriten", or "Tes lieux" vs. "Vos lieux"), only one form is provided in the tables in Clauses 6 and 7;
- Last but not least, the choice of the grammatic form (e.g. of the verbs) is influenced by the context of use, deployment and language in question and therewith not entirely consistent. However, this will always be adapted to the specific deployment and the context of use.

6 Device-related terminologies

6.1 Domain categories

The recommended device-related terms listed in the present clause are divided into the following domains or categories:

- General (Clause 6.2);
- Accessibility (Clause 6.3);
- Telephony (Clause 6.4); and
- Photography (Clause 6.5).

6.2 General terms

6.2.1 Overview

General terms are fundamental terms related to the mobile device itself, its accessories, or its basic functionality. They are typically exposed to the end-user in user manuals, the UI, and in some cases, in commercial material. General terms related to basic functionality are used frequently across a wide range of applications, but they have similar effects, irrespective of the context in which they are employed.

General terms are classified in the following seven sub-categories:

- Hardware and physical elements (Clause 6.2.2);
- Other physical items (Clause 6.2.3);
- Software (Clause 6.2.4);
- Control functions - softkeys (Clause 6.2.5);
- Control functions - gestures (Clause 6.2.6);
- Basic functions (Clause 6.2.7); and
- Radio related (Clause 6.2.8).

6.2.2 General terms: Hardware and physical elements

These terms describe physical elements of the mobile device, corresponding to what in technical terms is defined as "Hardware".

The meaning of each term is explained in Table 1, provided together with the language-specific versions of the terms in the five languages.

Table 1: General terms: Hardware and physical elements

Index	Technical term	Functional description	English	French	German	Italian	Spanish	Comment
D.1	battery	The internal rechargeable battery of a mobile device (it may or may not be detachable)	battery	batterie	Akku; Batterie	batteria	batería	
D.2	charging speed	Speed at which the battery of the mobile device can be charged	charging speed	vitesse de chargement	Ladezeit	tempo di ricarica	velocidad de carga	
D.3	device layout	External layout of the mobile device	device layout; phone layout	présentation de l'appareil	Übersicht	componenti del dispositivo	partes; diagrama; esquema; vistazo (del teléfono)	
D.4	dual SIM	Functionality of a mobile device to be able to handle two SIM cards (with two independent subscriptions)	dual SIM	double carte SIM	Dual-SIM	doppia SIM	dual SIM; doble tarjeta SIM	
D.5	dust resistant	Quality of a mobile device of tolerance to dust to some degree	dust resistant	résistant à la poussière	staubbeständig; staubgeschützt	resistente alla polvere	resistente al polvo	
D.6	ejection pin	Pin used to extract a tray from a mobile device, typically containing SIM or memory cards	ejection pin	outil d'éjection de la carte SIM; broche d'éjection	Auswurfstift	strumento di espulsione; strumento di rimozione della SIM	herramienta de expulsión de tarjetas

D.45	water resistant	Quality of a mobile device of tolerance to water to some degree	water resistant	résistant à l'eau; étanche	wasserbeständig	resistente all'acqua	resistente al agua	
D.46	wireless charging	Functionality of a mobile device that allows charging the mobile device without cables (functionality typically based on magnetic induction)	wireless charging	chargement sans fil (typiquement: chargement par induction)	induktives Laden; drahtlos aufladen	ricarica wireless	carga sin hilos; carga inalámbrica	
D.47	wireless charging coil	Coil used for wireless charging	wireless charging coil	bobine de charge sans fil ; plaque de charge par induction	Ladegerät für induktives Laden; Ladegerät für drahtloses Laden	bobina di ricarica wireless	bobina de (para) carga sin hilos (inalámbrica)	
D.48	wizard key	Key of a mobile device that executes the software assistant (wizard)	wizard key	touche d'assistant virtuel	Assistent	tasto per applicazione assistente	botón del asistente	

6.2.3 General terms: Other physical items

This sub-category is used for physical elements not corresponding to what in technical terms is defined as "Hardware", or for elements outside of the device itself.

The meaning of each term is explained in Table 2, provided together with the language-specific versions of the terms in the five languages.

D.49	battery charger	Device used for charging the batteries of a mobile device	battery charger	chargeur de batterie	Ladegerät	caricabatterie	cargador de batería	
D.50	Bluetooth headset	Device used for listening to the phone privately or for hands-free communication connected via Bluetooth wireless connection	Bluetooth headset	microcasque Bluetooth	Bluetooth-Kopfhörer; Bluetooth Headset	auricolari Bluetooth	auriculares (conectados mediante) Bluetooth	
D.51	earphone/headphone	Device used for listening to the phone privately	earphone; headphone	écouteurs	Kopfhörer	auricolari	auriculares	
D.52	headset	Headphone combined with a microphone for hands-free communication	headset	microcasque	Kopfhörer mit Mikrofon	cuffie	auriculares con micrófono	
D.53	quick start guide	A short user manual (user guide) provided in physical (paper) or electronic (e.g. PDF-file) with the mobile device, containing information on setting up the device for first use and on basic interaction principles	quick start guide	guide de démarrage rapide; aperçu rapide	Kurzanleitung; Schnellstarthandbuch	guida introduttiva; quick start guide	manual/guía rápido(a); guía de inicio rápido	
D.54	USB cable	USB interface cable used inter alia for exchanging information (e.g. photos) between a mobile device and other devices (e.g. a PC), and also for charging the device	USB cable	câble USB	USB-Kabel	cavo USB	cable USB	
D.55	user manual	User manual (user guide) provided in physical (paper) or electronic (e.g. PDF-file) with the mobile device, containing information about how to use the device safely	user manual	manuel d'utilisation; mode d'emploi; guide de l'utilisateur	Benutzerhandbuch	manuale utente; guida per l'utente	manual/guía de(l) usuario	

6.2.4 General terms: Software

Software-related terms refer to those terms the end-user may be exposed to.

The meaning of each term is explained in Table 3, provided together with the language-specific versions of the terms in the five languages.

Table 3: General terms: Software

Index	Technical term	Description	English	French	German	Italian	Spanish	Comment
D.56	multitasking	Capability of the operating system of a mobile device to execute several tasks/programs at the same time	multitasking	fonctionnement multitâche	Multitasking	multitasking	multitarea	
D.57	operating system	The operating system of a mobile device (e.g. iOS or Android)	operating system	système d'exploitation	Betriebssystem	sistema operativo	sistema operativo	
D.58	software update	Update of the device operating system or other software	software update	mise à jour logicielle; mise à jour système	Software-Update	aggiornamento di sistema	actualización del software	
D.59	wizard (software assistant)	A software wizard or setup assistant is a user interface type that presents a user with a sequence of dialog boxes that lead the user through a series of well-defined steps	wizard; software assistant	assistant virtuel	Assistent	assistente virtuale	asistente	

6.2.5 General terms: Control functions - softkeys

Softkeys are software representations displayed on the screen used for interaction of the end user with the device. This sub-category describes those perceived by the end user as a "button". The meaning of each term is explained in Table 4, provided together with the language-specific versions of the terms in the five languages.

6.2.6 General terms: Control functions - gestures

Control gestures are an important mechanism of interaction of the end user with the device. This sub-category describes those UI elements implemented using the capabilities of the touchscreen, requiring touching the screen (with one or more fingers). Depending on the way the user touches the screen, different actions happen.

The meaning of each term is explained in Table 5, provided together with the language-specific versions of the terms in the five languages.

D.64	double-tapping	Touch control gesture of briefly touching twice the screen of a mobile device	double-tapping	double tapotement	doppeltippen; zweimal tippen; zweimal antippen	doppio tocco	pulsar dos veces; hacer double click	
D.65	double-tapping and holding	Touch control gesture of double tapping the screen of a mobile device and holding	double-tapping and holding	double tapotement et appui long	doppeltippen und halten	doppia pressione lunga	pulsar dos veces manteniendo el dedo en la pantalla	
D.66	dragging	Touch control gesture of touching the screen of a mobile device and subsequently moving the finger	dragging	glisser; faire glisser	ziehen	trascinare	arrastrar	
D.67	pinching	Touch control gesture of touching the screen of a mobile device with two fingers and moving them closer	pinching	rapprocher les doigts	Finger zusammenziehen; Finger zusammenführen	avvicinare le dita	tocar y acercar los dedos; tocar y juntar los dedos	
D.68	shaking	Action of shaking a mobile device in evoke a predefined function	shaking	secouer	schütteln	agita; agitare	agitar	
D.69	spreading	Touch control gesture of touching the screen of a mobile device with two fingers and moving them apart	spreading	écarter deux doigts	Finger auseinanderziehen; Finger spreizen	allontare due dita; allargare	tocar y separar los dedos	
D.70	swiping	Touch control gesture of quickly moving ("swiping") one's finger across the screen of a mobile device	swiping	glisser/balayer d'un doigt	wischen	scorrere	deslizar	
D.71	tapping	Touch control gesture of briefly touching the screen of a mobile device	tapping	appuyer brièvement; faire un tapotement	antippen; tippen	toccare; pressione breve	pulsar; pulsar una vez; tocar; tocar una vez; hacer click	
D.72	tapping and holding	Touch control gesture of touching the screen of a mobile device and keeping the finger on it	tapping and holding	faire un appui long	gedrückt halten; berühren und halten	toccare e tenere premuto; pressione lunga	pulsar y mantener; tocar y mantener	
D.73	touch input	Control gestures used for operating a mobile device or for inputting data into the device using the device's touch screen	touch input; gestures	commandes tactiles; commandes gestuelles	Toucheingabe	gesti touch	gestos; entrada táctil	

6.2.7 General terms: Basic functions

Basic functions terms are used frequently across a wide range of devices but they have similar effects, irrespective of the context in which they are employed.

The meaning of each term is explained in Table 6, provided together with the language-specific versions of the terms in the five languages.

D.139	voice interface	Voice-based interface used with mobile devices	voice interface	interface vocale	Sprachsteuerung	Interfaccia vocale	control por voz	
D.140	voice memo	Record and store audio notes	voice memos; voice notes	notes vocalisées; memos vocaux	Sprachnotizen	note vocali	nota de voz	
D.141	welcome screen	Display of a mobile device with initial/top-menu level functionalities	welcome screen	écran de bienvenue/d'accueil	Startbildschirm; Home-Bildschirm	schermata home	pantalla de inicio; pantalla de bienvenida	
D.142	write memo	Take a memo or note in the mobile device	write/take note; write memo	écrire un mémo/une note	Notiz (machen/anlegen)	scrivere una nota; prendere appunti	nota; escribir una nota	

6.2.8 General terms: Radio related

Although the end-user is normally not aware of the technical complexity of a mobile phone, there are a few radio-related terms the user is exposed to. These terms typically define technical radio features and are perceived as such by the end-user. They are described in user manuals and in some cases - but not all - are used or activated with user participation. In other cases, they are exposed to the end user to allow understanding of radio considerations such as good/bad coverage or high/low data rate.

The meaning of each term is explained in Table 7, provided together with the language-specific versions of the terms in the five languages.

D.146	GPRS network	GPRS radio connection in the mobile service network	GPRS network	réseau GPRS	GPRS-Netz	rete GPRS	red GPRS	
D.147	HSPA network	HSPA (High Speed Packet Access) radio connection in the mobile service network (sometimes referred to as 3.5 G)	HSPA network	réseau HSPA	HSPA-Netz	rete HSPA	red HSPA	
D.148	HSPA+ network	HSPA+ (Evolved High Speed Packet Access) radio connection in the mobile service network (sometimes referred to as 3.5 G)	HSPA+ network	réseau HSPA+	HSPA+-Netz	rete HSPA+	red HSPA+	
D.149	IP address	The IP address for the WAP gateway or HTTP proxy server	IP address	adresse internet	IP Adresse	indirizzo IP	dirección IP	
D.150	IrDA (infrared)	Functionality for using infrared for the purpose of exchanging information between users or terminals	IrDA; IR; infrared	infrarouge	IrDA; Infrarot	infrarossi	infrarrojo	
D.151	LTE network	LTE (4G) radio connection in the mobile service network	LTE network	réseau LTE	LTE-Netz	rete LTE	red LTE, red 4G	
D.152	mobile network signal	RF signal transmitted to and received by a mobile device (refers to the mobile network signal)	mobile network signal	signal du réseau mobile	Signal	segnale	señal de la red móvil	
D.153	Network	A radio network, typically the mobile service network	network; mobile network	réseau; réseau mobile; réseau cellulaire	Netz; Mobilfunknetz	rete cellulare	red; red móvil	
D.154	signal strength	Intensity of the RF signal received by a mobile device	signal strength	puissance du signal; intensité du réseau	Signalstärke	potenza del segnale; intensità del segnale	intensidad de la señal	
D.155	signal strength indicator	Indicator of signal strength received by a mobile device (typically a symbol or icon in the upper side of the display)	signal strength indicator	icône de puissance du signal; icône d'intensité du réseau; indicateur de puissance du signal	Statussymbol Signalstärke	icona della potenza del segnale; icona dell'intensità del segnale	indicador de intensidad de la señal	
D.156	UMTS network	UMTS (3G) radio connection in the mobile service network	UMTS network	réseau 3G	UMTS-Netz	rete UMTS; rete 3G	red UMTS	
D.157	weak signal	State of a mobile device of receiving signals that are weak (possibly too weak to allow the use of certain functionality such as making or receiving phone calls)	weak signal	signal faible	schwaches Signal	segnale debole	señal débil	
D.158	Wi-Fi	Short range license-exempt radio based on IEEE 802.11 [i.8]	Wi-Fi	Wi-Fi	WLAN	Wi-Fi	Wi-Fi	

6.3 Accessibility terms

6.3.1 Overview

Accessibility terms provide access to the necessary settings, device adjustments, specific functionality, and connectivity to adapt the device UI to the functional variations and requirements of end users. This clause is additionally supporting inclusive design and the implementation of support for ETSI EN 301 549 [i.7] in mobile ICT products, services and applications. Guidance over supported and available accessibility features is available from the Mobile and Wireless Forum through GARI, see <http://www.gari.info/> [i.10].

ISO 9999:2016 [i.12] and ISO/IEC TR 29138-1:2018 [i.13] have been consulted. A working group, ISO/TC 37 Terminology Principles and coordination (see <https://www.iso.org/committee/48104.html>) covers the standardization of descriptions, resources, technologies and services related to terminology, translation, and other activities in the multilingual information society and may provide useful insights, even if not specifically focusing on the mobile context of use.

A practical difficulty often encountered is the OS- or platform-specific (and often not fully comparable) use of features and terminology applied to the accessibility terms of devices. For the purpose of the present document, these are classified into the following six sub-categories covered through the next clauses:

- Access and settings (Clause 6.3.2);
- Vision (Clause 6.3.3);
- Hearing (Clause 6.3.4);
- Dexterity (Clause 6.3.5);
- Cognitive assistance (Clause 6.3.6); and
- Media retrieval (Clause 6.3.7).

6.3.2 Accessibility terms: Access and settings

Accessibility settings provide access to device adjustments and connectivity settings, adapting the device UI to the functional variations of end users.

The meaning of each term is explained in Table 8, provided together with the language-specific versions of the terms in the five languages.

Table 8: Accessibility terms: Access and settings

D.159	accessibility	Measures, tools and settings supporting the interaction of users with functional variations with ICT	accessibility	accessibilité	Bedienungshilfen	accessibilità	accesibilidad	
D.160	accessibility settings	Place for setting up the desired behaviour of a device with regard to users' accessibility preferences	accessibility (settings)	paramètres d'accessibilité	Einstellungen der Bedienungshilfen	impostazioni accessibilità	ajustes de accesibilidad	
D.161	accessibility shortcuts	Direct access to a set of accessibility features and settings	accessibility shortcuts	raccourcis d'accessibilité	Kurzbefehle für Bedienungshilfen	abbreviazioni accessibilità	acceso directo a los ajustes de accesibilidad	
D.162	emergency call for assistance	A service allowing for the request of urgent help from a human assistant	emergency call	appel d'urgence	Notruf absetzen	effettuare una chiamata di emergenza SOS	llamada de emergencia	In addition, '112' is used together with national local alternatives.
D.163	manage accessibility	Feature for the import and export of accessibility settings from/to other devices	manage accessibility	gérer les paramètres d'accessibilité	Bedienungshilfen verwalten	gestione delle impostazioni di accessibilità	Administrar los ajustes de accesibilidad	

6.3.3 Accessibility terms: Vision

Accessibility terms related to vision provide access to device adjustments and connectivity settings, adapting the device UI to the functional variations of end users with regard to vision.

The meaning of each term is explained in Table 9, provided together with the language-specific versions of the terms in the five languages.

D.168	dark screen	A function to keep the screen switched off (dark) when using voice output (e.g. a screen reader)	dark screen	écran noir	dunkler Bildschirm	dark screen	pantalla oscura	
D.169	dictation	Speech input-based text input (or navigation)	dictation	dictée; saisie vocale	Diktierfunktion	dettatura; sintesi vocale	dictado	
D.170	display accommodations	Access to display settings such as inverting colours and implementing grayscale	screen settings; display accommodations	options d'affichage	Display-Anpassungen	regolazione schermo	ajustes de pantalla	
D.171	display size	Accessibility option of a mobile device to set the items on the screen to a larger size	display size	taille d'affichage	Anzeigegröße	dimensioni display	tamaño de iconos y letras en la pantalla	
D.172	flash alerts	Accessibility option of a mobile device of indicating incoming calls, messages, etc. with a blinking light	flash alerts	alertes flash; alertes lumineuses	Blitz-Benachrichtigungen	flash per avvisi; luce lampeggiante per notifiche	notificación con flash	
D.173	greyscale mode	Accessibility functionality of a mobile device for displaying the screen in greyscale mode	greyscale	nuances de gris	Bildschirm im Graustufenmodus anzeigen	conversione dello schermo in modalità scala di grigio	escala de grises	
D.174	high contrast keyboard	Accessibility functionality of a mobile device for displaying the keyboard in high contrast	high contrast keyboard	clavier à fort contraste	Tastatur mit starkem Kontrast verwenden	tastiera ad alto contrasto	teclado de alto contraste	
D.175	high contrast theme	A way to increase the colour contrast of text, borders and images on the screen, in order to make them easier to read and identify	high contrast; increased contrast	rendu fortement contrasté	Bildschirm mit hohem Kontrast	aumenta contrasto	alto contraste	
D.176	invert colours	A function to invert all colours on the screen	negative colours; invert colours	inversion des couleurs; négatif	Umkehr der Farben	inversione colori	colores negativos; colores invertidos	
D.177	larger text/font size	Option to see larger characters and graphical elements	larger text/font size	grossissement du texte; réglage de la taille des caractères	größere Textzeichen	testo più grande	tamaño de letra grande	
D.178	magnification	Tool that activates a "magnifying glass" that can be moved over a screen to magnify the content beneath it	magnification	grossissement; activation de la loupe	Bildschirm vergrößern	ingrandimento; ingrandimento della schermata	lupa	
D.179	pitch	Selection of higher or lower voice tones	pitch	hauteur du son	Tonhöhe	tono	tono

D.182	speaking rate	The number of speech units of a given type produced within a given amount of time	speech rate	vitesse d'élocution	Sprechgeschwindigkeit	velocità di riproduzione	velocidad de la voz	
D.183	speech input and voice recognition	Accessibility functionality of a mobile device recognising spoken voice	voice recognition; speech/voice input	reconnaissance vocale	Spracherkennung	riconoscimento vocale	reconocimiento de voz	
D.184	speech volume	Volume level of the screenreader of a mobile device	speech volume	volume de la voix	Sprechlautstärke	volume riproduzione	volumen de voz	
D.185	usage with screen turned off	Usage of the mobile device with the display turned off (offering privacy to visually-impaired users)	screen off	(utilisation de l'appareil avec l'écran éteint)	Gerät bei ausgeschaltetem Bildschirm verwenden	utilizzo del dispositivo con lo schermo spento	uso con la pantalla apagada	
D.186	voice recordings for voice labels	Accessibility functionality of a mobile device for using voice labels to distinguish objects of similar shapes by attaching labels to them	voice label	vignettes/ étiquettes vocales	Sprachaufnahmen auf Sprachausgabe-Labels schreiben	aggiunta di registrazioni vocali alle etichette vocali	etiquetas de voz	
D.187	voice selection	Selection of a preferred voice to use (from a set of available voices)	select voice	selection de voix	Stimme anpassen	scelta di una voce	selección de voz	
D.188	zoom	A way to magnify the entire screen of a device	zoom screen	zoomer; agrandir l'écran	Bildschirm zoomen	zoom	ampliar pantalla	

6.3.4 Accessibility terms: Hearing

Accessibility terms related to hearing provide access to device adjustments and connectivity settings, adapting the device UI to the functional variations of end users with regard to hearing.

The meaning of each term is explained in Table 10, provided together with the language-specific versions of the terms in the five languages.

D.190	hearing aid compatibility	A way to improve audio quality when connecting with certain hearing aids (including recommended ones)	hearing aid compatibility	compatibilité avec les aides (prothèses) auditives	Hörgerätekompatibilität	compatibilità con apparecchi acustici	compatibilidad con audífonos	
D.191	hearing aid mode	Adjust the way notifications and other noises sound when using hearing aids	hearing aid mode	mode aide auditive	Hörgerätemodus	modalità apparecchi acustici	ajustes de los audífonos	
D.192	mono audio	Sound intended to be heard as if emanating from one position	mono audio	audio mono	Mono-Audio	audio mono	audio mono	
D.193	noise cancellation	A technology to reduce ambient noise during phone calls or media retrieval	noise reduction; noise cancellation	réduction du bruit; annulation du bruit	Geräuschunterdrückung	cancellazione rumore	cancelación de ruido	
D.194	sound balance	Balancing of two (or several) audio channels	volume balance; sound balance	balance stéréo gauche-droite	Audio-Balance (anpassen)	bilanciamento del suono	balance; balance de sonido	

6.3.5 Accessibility terms: Dexterity

Accessibility terms related to interaction and dexterity provide access to device adjustments and connectivity settings, adapting the device UI to the functional variations of end users with regard to interaction and dexterity.

The meaning of each term is explained in Table 11, provided together with the language-specific versions of the terms in the five languages.

D.196	assistant menu	Provides an on-screen UI to perform actions that would otherwise require the operation of a command sequence relying on multiple presses (of keys)	setup assistant	assistant	Assistenzmenü	collegamento accessibilità	menú de asistencia	
D.197	single tap mode	Feature supporting e.g. the dismissal of alerts with just one tap, instead of a combination of gestures and actions	single tap mode	mode d'appui par simple tapotement	einfachen An-tippmodus verwenden	utilizzo della modalità singolo tocco	modo un toque	
D.198	temporarily cancel timeouts	Allow users to complete tasks without unexpected changes in content or context as a consequence of time limits	no timeouts	sans limites de temps/temporelles	Zeit-beschränkungen ausschalten	senza limitazioni di tempo	sin limitación tiempo	
D.199	touch accommodations	Setup or fine-tuning of a device's screen responsiveness based on touch direction, number or location	touch control settings	(réglage des) commandes tactiles	Touch-Anpassungen	regolazione tocco	ajustes de control táctil	

6.3.6 Accessibility terms: Cognitive assistance

Accessibility terms related to learning and cognitive assistance provide access to device adjustments and connectivity settings, adapting the device UI to the functional variations of end users with regard to learning and cognitive assistance.

The meaning of each term is explained in Table 12, provided together with the language-specific versions of the terms in the five languages.

D.201	notification reminder	A tool allowing for the activation of reminders with regard to certain functionality (e.g. the intake of food, fluids or medicine)	(notification) reminder	rappel de notification; répéter l'alerte	Benachrichtigungs-erinnerung	promemoria di notifica	recordar notificación; intervalo de recordatorio	
D.202	screen timeout off	A setting allowing the screen not to go to sleep	screen timeout	(mise en) veille de l'écran	Bildschirmabschaltung	timeout schermo	suprimir bloqueo de pantalla	
D.203	simple reminders	The easiest-to-use, most simple reminder application (set in a few linear steps)	simplified reminders	rappels simples	einfache Erinnerungen	promemoria semplice	notificaciones sencillas	
D.204	simplified display	An option to configure the Home screen with a simple layout, flat hierarchy and graphics, enabling an easier/lighter experience	easy mode; simple mode	affichage simplifié (facile à lire et à comprendre)	vereinfachte Darstellung	schermata semplificata	modo sencillo	
D.205	simplified instructions	Simple instructions to the user provided on a basic level, using a plain language (often corresponding to an elementary)	simple instructions	Instructions simplifiées	vereinfachte Anleitung	istruzioni semplificate	instrucciones sencillas	
D.206	simplified text	Preference for the presentation of written information addressing users with lower text processing cognitive capabilities	simple text	texte simplifié	vereinfachter Text	testo semplificato	textos sencillos	

6.3.7 Accessibility terms: Media retrieval

Accessibility terms related to media retrieval provide access to device adjustments and connectivity settings, adapting the device UI to the functional variations of end users with regard to media retrieval.

The meaning of each term is explained in Table 13, provided together with the language-specific versions of the terms in the five languages.

D.209	sound detector	Allow the device to detect a sound and notify the user	sound detector	détecteur sonore	Schallmelder; Geräuschmelder	rilevatore di suoni	detector de sonido	

6.4 Telephony services

6.4.1 Overview

Previous work, such as that referenced in [i.1] and [i.2] is taken into account and a user focus is applied through the reduction of technical complexity by merging categories of features and functionality in cases where distinguishing these makes little sense and is mostly not understood by end users. This clause focuses on the mobile context.

Telephony service-related terms are classified in the following six sub-categories:

- Device UI (Clause 6.4.2);
- Device functionality (Clause 6.4.3);
- Voice call handling (Clause 6.4.4); and
- System and network services (Clause 6.4.5).

6.4.2 Telephony services: Device UI

This clause covers aspects related to the user interface (UI) of devices.

The meaning of each term is explained in Table 14, and the language-specific versions of the basic commands in the five languages are presented.

Table 14: Telephony services: Device UI

D.210	answer call	Acceptance of incoming communication from another party - by a human or a machine/messaging system	answer call	répondre (à un appel)	Anruf annehmen	risposta	responder una llamada	
D.211	APN	Access Point Name, the address of the network gateway through which to connect to the external data network, either an IP address or a text string	APN, Access Point Name	APN (noms de point d'accès)	APN	APN	APN	
D.212	Dual SIM	A mobile device support for two different SIM cards	dual SIM	double SIM	Dual-SIM	dual SIM	dual SIM	
D.213	end call	Used inter alia to terminate a call	end call	terminer l'appel	Anruf beenden	termina chiamata	finalizar una llamada	
D.214	eSIM	Electronic (embedded) SIM	eSIM	eSIM	eSIM	eSIM	eSIM	
D.215	make (voice) call	Used inter alia to start dialling	(make) call	appeler	anrufen	chiamata	llamar/ realizar una llamada	
D.216	make video call	Start setting up a video call	(make) video call	lancer un appel en visiophonie ; visiophoner	(einen) Videoanruf (starten)	cideochiamata	(hacer, realizar) una videollamada; video llamada	
D.217	make real-time-text (RTT) call	Make a real-time-text (RTT) call (a text conversation in point-to-point situations, or in multipoint conferencing, where the text being entered is sent in such a way that the communication is perceived by the user as being continuous (see [i.7]))	make real-time-text/RTT call	lancer un appel texte temps réel	RTT-Anruf	chiamata RTT	(hacer, realizar) una llamada texto en tiempo real/RTT; RTT llamada	
D.218	mobile data (on/off)	Turn cellular mobile data access ON	mobile data	données cellulaires	mobile Daten (ein/aus)	dati cellulare	(activar/desactivar) datos móviles	
D.219	network list	Provides a list of available network service providers (performance, services)	networks	réseaux	Netze	reti	redes	
D.220	reject call	Active rejection of incoming communication from another party - by a human or a machine	reject call	refuser un appel	Anruf ablehnen	rifiutare una chiamata	rechazar una llamada

D.222	SIM applications	Operator-specific, SIM-native applications	SIM applications	applications SIM	SIM-Anwendungen	applicazioni SIM	gestión de tarjetas SIM	
D.223	VPN	Virtual Private Network, used for secure end-to-end communication.	VPN	VPN	VPN	VPN	VPN	
D.224	Wi-Fi calling	Functionality for routing calls over Wi-Fi network	Wi-Fi calling	appel Wi-Fi	WLAN-Anrufe	chiamata Wi-Fi	llamadas Wi-Fi	

6.4.3 Telephony services: Device functionality

This clause covers terminology related to the device functionality, in a mobile ICT context of use.

The meaning of each term is explained in Table 15, provided together with the language-specific versions of the terms in the five languages.

D.226	(SIM) PUK	Personal Unblocking Key, used to unblock a terminal that has been blocked after a maximum number of wrong PINs has been entered	PUK code	code PUK	SIM PUK	codice PUK	código PUK	
D.227	data usage	Indicates mobile data used (domestic and roaming)	mobile data (usage)	(utilisation des) données mobiles	verbrauchte Nutzungsdaten	utilizzo dati mobili	uso de datos móviles	
D.228	show IMEI	A facility which causes a terminal to display its International Mobile station Equipment Identity (IMEI)	(show) IMEI	(afficher le code) IMEI	IMEI anzeigen	IMEI	(mostrar) IMEI	
D.229	volume (ringer or during call)	Control or indication related to setting the volume of the ringer signalling and/or the loudspeaker volume during a call (or media retrieval)	Ringer volume	volume/volume sonore	(Rufton-) Lautstärke	volume	volumen (del timbre o de la llamada)	

6.4.4 Telephony services: Voice call handling

This clause addresses the terminology related to the handling of voice calls in a mobile context of use.

The meaning of each term is explained in Table 16, provided together with the language-specific versions of the terms in the five languages.

D.231	call log list	List of previous incoming, outgoing, and missed calls made from the mobile device	call log, call history	historique des appels	Anrufliste	registro chiamate	lista de llamadas	
D.232	contacts (list)	Allows the user to enter and store names, numbers and other data for easy and fast dialling	contacts	contacts	Kontakte	contatti	contactos	
D.233	handsfree (speakerphone)	Mode of using a telecommunications terminal that does not require the terminal to be held against the ear and mouth	speaker; speakerphone	haut-parleur; mains-libres	Freisprechen	vivavoce; speaker	altavoz; manos libres	
D.234	missed calls list	List of previously missed calls	missed (calls)	(appels) manqués	verpasste Anrufe	chiamate perse	(lista de) llamadas perdidas	
D.235	mute (microphone off)	Allowing the user to temporarily turn off the microphone during a call	mute; microphone off	muet; microphone coupé	stumm; Mikrofon ausschalten	muto; disattiva microfono	silenciar/desactivar el micrófono	
D.236	redial	Allows the user to dial again a previously dialled number	auto redial	bis; appeler	Wahlwiederholung	richiama	rellamada	

6.4.5 Telephony services: System- and network services

This clause addresses the terminology related to telephony system- and network-based services.

The meaning of each term is explained in Table 17, provided provided together with the language-specific versions of the terms in the five languages.

D.246	hide number to called party	Connected Line Identification Restriction, allows the B-party to suppress presentation of their number to the calling party (also known as CLIP/CLIR in fixed networks)	show/hide caller number	afficher/masquer le numéro	Rufnummernunterdrückung	mostra/nascondi numero	mostrar/ocultar mi número	
D.247	hold call	This supplementary service allows a user to interrupt communication on an existing call and then subsequently, if desired, to re-establish communication	hold	appel en attente	(Anruf) halten	attendere (in linea)	retener llamada	
D.248	no data access	Mobile data access unavailable (typically due to lack of network coverage or technical failure)	no service; no data access; no Internet access	pas de service; pas d'accès données; pas d'accès internet	kein Netz; keine Datenverbindung	nessun servizio; nessun accesso internet	sin acceso a datos	
D.249	reset mobile data usage (meter and statistics)	Set mobile data usage meter to zero (or another value)	reset data (cycle/limit)	réinitialisation des données	mobile Daten/Daten-nutzung zurücksetzen	reset dati mobili	reiniciar/restablecer contador de datos móviles	
D.250	roaming	A mobile network access and service extension (beyond emergency calls) to an area or region that differs from the registered home network location. Roaming may enable access the Internet and other mobile services even outside a well-defined coverage area	roaming	itinérance	Roaming	roaming	itinerancia	
D.251	send message/reply with message	Provide feedback to the caller through a different modality	send message, respond with text	envoyer un message; répondre par texte	mit Nachricht antworten	invia messaggio; rispondi	responder con un mensaje de texto, rechazar llamada y enviar un mensaje de texto	
D.252	Wi-Fi assist	Automatically use the available mobile data connection when Wi-Fi is not available or satisfactory	Wi-Fi assist	assistance Wi-Fi	WLAN-Unterstützung	assistente Wi-Fi	asistente Wi-Fi	

6.5 Photography

6.5.1 Overview

The present clause covers the terminology of photography with mobile devices.

For the purpose of the present document, these are classified into the following three sub-categories:

- Taking photos (Clause 6.5.2);
- Handling photos (Clause 6.5.3); and
- Taking and handling videos (Clause 6.5.4).

6.5.2 Taking photos

The present clause covers the terminology of taking photos with mobile devices.

The meaning of each term is explained in Table 18, provided together with the language-specific versions of the terms in the five languages.

7 Service- and application-related terminologies

7.1 Domain categories

The recommended service- and application-related terms listed in the present clause are divided into the following twelve domains or categories:

- General terms (Clause 7.2);

- Messaging services (Clause 7.3);
- Media services (Clause 7.4);
- Societal services and communication (Clause 7.5);
- Social media services (Clause 7.6);
- Banking services (Clause 7.7);
- eHealth services (Clause 7.8);
- Travel planning (Clause 7.9);
- Navigation (Clause 7.10);
- Games (Clause 7.11);
- Searching and browsing (Clause 7.12); and
- Tools (Clause 7.13).

7.2 General terms

7.2.1 Overview

General terms are generic, common terms related to mobile ICT services and applications. They are typically exposed to the end-user in user manuals, the UIs for setup and use, and in marketing material (e.g. as service availability information). General terms related to basic functionality are frequently used across a wide range of services and applications, but they provide similar, common functionality, irrespective of the context in which they are employed.

General terms are classified in the following three sub-categories:

- Authentication, login and confirmation (Clause 7.2.2);
- Setup and settings (Clause 7.2.3); and
- Common functionality (Clause 7.2.4).

7.2.2 General terms: Authentication, login and confirmation

This clause covers a sub-category of general terms related to mobile ICT services and applications: authentication, login and confirmation.

The meaning of each term is explained in Table 21, provided together with the language-specific versions of the terms in the five languages.
