Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETR 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available **free of charge** from the ETSI Secretariat. Latest updates are available on the ETSI Web server (http://www.etsi.fr/ipr).

Pursuant to the ETSI Interim IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETR 314 (or the updates on http://www.etsi.fr/ipr) which are, or may be, or may become, essential to the present document.

Foreword

This European Standard (Telecommunications series) has been produced by ETSI Technical Committee Signalling Protocols and Switching (SPS), and is now submitted for the Public Enquiry phase of the ETSI standards Two-step Approval Procedure.

The present document is part 2 of a multi-part standard covering the Digital Subscriber Signalling System No. one (DSS1) protocol specification for the Integrated Services Digital Network (ISDN) Outgoing Call Barring (OCB) supplementary services, as described below:

- Part 1: "Protocol specification";
- Part 2: "Protocol Implementation Conformance Statement (PICS) proforma specification";
- Part 3: "Test Suite Structure and Test Purposes (TSS&TP) specification for the user";
- Part 4: "Abstract Test Suite (ATS) and partial Protocol Implementation eXtra Information for Testing (PIXIT) proforma specification for the user";
- Part 5: "Test Suite Structure & Test Purposes (TSS&TP) specification for the network";
- Part 6: "Abstract Test Suite (ATS) and partial Protocol Implementation eXtra Information for Testing (PIXIT) proforma specification for the network".

To evaluate conformance of a particular implementation, it is necessary to have a statement of which capabilities and options have been implemented for a given Open Systems Interconnection (OSI) protocol. Such a statement is called a Protocol Implementation Conformance Statement (PICS).

Proposed national transposition dates					
Date of latest announcement of this EN (doa):	3 months after ETSI publication				
Date of latest publication of new National Standard or endorsement of this EN (dop/e):	6 months after doa				
Date of withdrawal of any conflicting National Standard (dow):	6 months after doa				

1 Scope

This second part of EN 301 001 is applicable to the stage three of the Outgoing Call Barring (OCB) supplementary services for the pan-European Integrated Services Digital Network (ISDN) as provided by European public telecommunications operators at the T reference point or coincident S and T reference point (as defined in ITU-T Recommendation I.411 [9]) by means of the Digital Subscriber Signalling System No. one (DSS1) protocol. Stage three identifies the protocol procedures and switching functions needed to support a telecommunication service (see CCITT Recommendation I.130 [8]).

The present document provides the Protocol Implementation Conformance Statement (PICS) proforma for the ISDN DSS1 supplementary service interactions protocol as specified in EN 301 001-1 [5] in compliance with the relevant requirements and in accordance with the relevant guidance given in ISO/IEC 9646-7 [7].

The supplier of a protocol implementation which is claimed to conform to EN 301 001-1 [5] is required to complete a copy of the PICS proforma provided in annex A of the present document and is required to provide the information necessary to identify both the supplier and the implementation.

2 References

References may be made to:

- a) specific versions of publications (identified by date of publication, edition number, version number, etc.), in which case, subsequent revisions to the referenced document do not apply; or
- b) all versions up to and including the identified version (identified by "up to and including" before the version identity); or
- c) all versions subsequent to and including the identified version (identified by "onwards" following the version identity); or
- d) publications without mention of a specific version, in which case the latest version applies.

A non-specific reference to an ETS shall also be taken to refer to later versions published as an EN with the same number.

3 Definitions, symbols and abbreviations

3.1 Definitions

For the purposes of the present document, the following definitions apply, in addition to those given in EN 301 001-1 [5]:

Protocol Implementation Conformance Statement (PICS): A statement made by the supplier of an Open Systems Interconnection (OSI) implementation or system, stating which capabilities have been implemented for a given OSI protocol (see ISO/IEC 9646-1 [6]).

PICS proforma: A document, in the form of a questionnaire, designed by the protocol specifier or conformance test suite specifier, which, when completed for an OSI implementation or system becomes the PICS (see ISO/IEC 9646-1 [6]).

static conformance review: A review of the extent to which the static conformance requirements are met by the IUT, accomplished by comparing the PICS with the static conformance requirements expressed in the relevant standard(s) (see ISO/IEC 9646-1 [6]).

3.2 Symbols

For the purposes of the present document, the following symbols apply:

AND	Boolean "and"
С	Conditional requirement (to be observed if the relevant conditions apply)
M	Mandatory requirement (to be observed in all cases)
N/A	Not applicable, not supported or the conditions for status are not meet
No	not supported
NOT	Boolean "not"
Ο	Option (may be selected to suit the implementation, provided that any requirements applicable to the option are observed)
O.n	Options, but support required for either at least one or only one of the options in the group labelled with the same numeral "n"
OR	Boolean "or"
Yes	supported

3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

4 Conformance

A PICS proforma which conforms to this PICS proforma specification shall be technically equivalent to annex A, and shall preserve the numbering and ordering of the items in annex A.

A PICS which conforms to this PICS proforma specification shall:

- a) describe an implementation which claims to conform to EN 301 001-1 [5];
- b) be a conforming ICS proforma which has been completed in accordance with the instructions for completion given in clause A.1;
- c) include the information necessary to uniquely identify both the supplier and the implementation.

Annex A (normative): PICS proforma for EN 301 001-1

Notwithstanding the provisions of the copyright clause related to the text of the present document, ETSI grants that users of the present document may freely reproduce the PICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed PICS.

A.1 Instructions for completing the PICS proforma

A.1.1 Identification of the implementation

Identification of the Implementation Under Test (IUT) and the system in which it resides (the System Under Test (SUT)) should be filled in so as to provide as much detail as possible regarding version numbers and configuration options.

The product supplier information and client information should both be filled in if they are different.

A person who can answer queries regarding information supplied in the PICS should be named as the contact person.

The System Conformance Statement (SCS) as defined in ISO/IEC 9646-1 [6] is a document supplied by the client or product supplier that summarizes which OSI standards are implemented and to which conformance is claimed. The PICS/SCS clause should describe the relationship of the PICS to the SCS.

A.1.2 Global statement of conformance

If the answer to the statement in this subclause is "Yes", all subsequent subclauses should be completed to facilitate selection of test cases for optional functions.

If the answer to the statement in this subclause is "No", all subsequent subclauses should be completed, and all non-supported mandatory capabilities should be identified and explained. Explanations may be entered in the comments field at the bottom of each table or on attached pages.

A.1.3 Explanation of PICS proforma subclauses

The PICS proforma contains a Roles clause and thereafter is presented in two parts (for user and network) with the following subclauses, as required:

- major capabilities;
- subsidiary capabilities;
- protocol data unit support;
- protocol data unit parameters;
- timers;
- call states.

The User clause shall only be completed for user implementations (including private network implementations) while the Network clause shall only be completed for network implementations. The Roles clause shall be completed for all implementations.

The relationship between this PICS proforma and other related PICS proforma (e.g. the basic call PICS proforma) is expressed in the requirements list contained in annex B. This provides the additional restrictions placed on the related proforma (different conditions, different status, etc.).

A.1.4 Symbols, abbreviations and terms

The PICS proforma contained in this annex is comprised of information in tabular form in accordance with the guidelines presented in ISO/IEC 9646-7 [7].

The reference column contained in the tables gives reference to the appropriate part(s) of EN 301 001-1 [5] (unless another numbered reference is explicitly indicated) describing the particular item. Note, however, that a reference merely indicates the place where the core of a description of an item can be found. Any additional information contained in EN 301 001-1 [5] (or any other possibly used reference) has to be taken into account when making a statement about the conformance of that particular item.

The following common notations, defined in ISO/IEC 9646-7 [7], are used for the status column:

M mandatory
O optional
N/A not applicable

O.<integer> for mutually exclusive or selectable options from a set

The following common notations, defined in ISO/IEC 9646-7 [7], are used for the support column:

Y for supported/implemented
N for not supported/not implemented

A.2 Identification of the implementation

A.2.1	Implementation Under Test (IUT) identification
IUT name:

Identification of the protocol **A.4**

This PICS proforma applies to the following standard:

EN 301 001-1: "Integrated Services Digital Network (ISDN); Outgoing Call Barring (OCB) supplementary services; Digital Subscriber Signalling System No. one (DSS1) protocol; Part 1: Protocol specification".

A.5 Global statement of conformance

Are all mandatory capabilities implemented? (Yes/No)

NOTE:

Answering "No" to this question indicates non-conformance to the protocol specification. Non-supported mandatory capabilities are to be identified in the PICS, with an explanation of why the implementation is non-conforming. Explanations may be entered in the comments field at the bottom of each table or on attached pages.

A.6 Roles

Table A.1: Type of implementation

Item	Major role: Does the implementation	Conditions for status	Status	Reference	Support
	Type of implementation

Comment	S:				

A.8.5 Timers

No items requiring response.

A.8.6 Call states

Annex B (normative): Requirements list

This annex repeats in the form of a requirements list some items of the basic call, generic functional protocol and supplementary service interactions PICS proforma required for support of EN 301 001-1 [5]. No support column is provided as the answers are to be entered in the relevant base PICS proforma.

In the tables which follow in this annex, the status of the base PICS proforma is indicated as "C" (conditional) or "O" (optional). The "C" status is used where the base PICS proforma contains a number of interdependent items which need not be repeated in the present document. "O" indicates that the item in the base PICS proforma is dependent on one or more other items, at least one of which has an optional status. The exact interdependency is fully specified in the base PICS proforma specification.

B.1 User

B.1.1 Requirements on items used in the basic call PICS

No additional requirements.

B.1.2 Requirements on items used in the generic functional protocol PICS

In the tabulations which follow all item numbers are as contained in ETS 300 196-2 [4]. All references are to EN 301 001-1 [5] unless otherwise stated.

Item	Major capability:	Status	Supplementary service	SS	Reference
	Does the implementation support	base	conditions for status	status	
MCu 2	the functional protocol (common information element category) for the control of supplementary services?	0	R 4.1 NOT R 4.1	M N/A	9, 10; [3] 6.3, 8
MCu 2.2	bearer independent supplementary services procedure?	0	R 4.1 AND R 1.1 NOT (R 4.1 AND R 1.1)	M N/A	9.1, 10; [3] 8.3.2
MCu 2.3	point-to-point (bearer related) transport mechanism?	С	R 4.1 NOT R 4.1	M N/A	9.2, 10; [3] 8.3.1, 8.3.1.1
MCu 5	generic procedures for the supplementary services management?		R 4.1 AND R 1.1 NOT (R 4.1 AND R 1.1)	M N/A	9.1, 10; [3] 10.2
MCu 5.1	activation?	С	R 4.1 AND R 1.1 NOT (R 4.1 AND R 1.1)	M N/A	9.1.1, 10; [3] 10.2.2
MCu 5.2	deactivation?	_	R 4.1 AND R 1.1 NOT (R 4.1 AND R 1.1)	M N/A	9.1.2, 10; [3] 10.2.3
MCu 5.3	interrogation?	С	R 4.1 AND R 1.1 NOT (R 4.1 AND R 1.1)	M N/A	9.1.3, 10; [3] 10.2.4

Table B.1: Major capabilities - user

Table B.2: Messages transmitted - user

	Message: Does the implementation support	Status base	Supplementary service conditions for status	SS status	Reference
MTu 1	the inclusion of FACILITY?	_	R 2.1 AND R 1.1 NOT (R 2.1 AND R 1.1)		9, 10; [3] 8.3, 11.1.1.1

Table B.3: Messages received - user

Item	Message: Does the implementation support	Status base	Supplementary service conditions for status	SS status	Reference
MRu 1	the interpretation of FACILITY?	_	R 2.1 AND R 1.1		9, 10;
			NOT (R 2.1 AND R 1.1)	N/A	[3] 8.3, 11.1.1.1

B.1.3 Requirements on items used in the supplementary service interactions PICS

In the tabulations which follow all item numbers are as contained in EN 300 195-2 [2]. All references are to EN 301 001-1 [5] unless otherwise stated.

Table B.4: Major capabilities - user

Item	Major capability:	Status	Supplementary service	SS	Reference
	Does the implementation support	base	conditions for status	status	
	the OCB supplementary services interactions with other implemented supplementary services?	_	R 4.1 NOT R 4.1	N/A	12; [1] 5.50, 5.51, 5.52, 5.53, 5.54, 5.56, 5.55

B.2 Network

B.2.1 Requirements on items used in the basic call PICS

Not additional requirements.

B.2.2 Requirements on items used in the generic functional protocol PICS

In the tabulations which follow all item numbers are as contained in ETS 300 196-2 [4]. All references are to EN 301 001-1 [5] unless otherwise stated.

Table B.5: Major capabilities - network

Item	Major capability: Does the implementation support	Status base	Supplementary service conditions for status	SS status	Reference
MCn 2	the functional protocol (common information element category) for the control of supplementary services?	_	R 4.3 NOT R 4.3	M N/A	9, 10; [3] 6.3, 8
MCn 2.2	bearer independent supplementary services procedure?	0	R 4.3 AND R 1.1 NOT (R 4.3 AND R 1.1)	M N/A	9.1, 10; [3] 8.3.2
MCn 2.3	point-to-point (bearer related) transport mechanism?	С	R 4.3 NOT R 4.3	M N/A	9.2, 10; [3] 8.3.1, 8.3.1.1
MCn 5	generic procedures for the supplementary services management?	0	R 4.3 AND R 1.1 NOT (R 4.3AND R 1.1)	M N/A	9.1, 10; [3] 10.2
MCn 5.1	activation?	С	R 4.3 AND R 1.1 NOT (R 4.3 AND R 1.1)	M N/A	9.1.1, 10; [3] 10.2.2
