Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for ETSI members and non-members, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This Harmonised European Standard (EN) has been produced by ETSI Technical Committee Mobile Standards Group (MSG).

The present document has been prepared under the Commission's standardisation request C(2015) 5376 final [i.10] to provide one voluntary means of conforming to the essential requirements of Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC [i.9].

Once the present document is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of the present document given in table A.1 confers, within the limits of the scope of the present document, a presumption of conformity with the corresponding essential requirements of that Directive, and associated EFTA regulations.

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the ETSI Drafting Rules (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.

Introduction

The present document is part of a set of standards developed by ETSI that are designed to fit in a modular structure to cover radio equipment within the scope of the Radio Equipment Directive [i.9]. The present document is produced following the guidance in ETSI EG 203 336 [i.12] as applicable.
1 Scope

The present document specifies technical characteristics and methods of measurements for the following radio equipment type:

- GSM mobile station.

This radio equipment type is for operation within the Digital cellular telecommunications system in the GSM 900 and/or GSM 1800 frequency bands as shown in Table 1, with a channel separation of 200 kHz, utilizing constant envelope modulation and carrying traffic channels according to the Time Division Multiple Access (TDMA) principle.

</tbody>
</table>

The present document covers the essential requirements of article 3.2 of Directive 2014/53/EU [i.9] under the conditions identified in annex A.

The present document covers the general access requirements for terminal equipment up to and including 3GPP Rel-12. The general access requirements, applied to the terminal equipment, are for one release only. The present document does not cover the GPRS Class A mobiles and the ECSD mobiles.

For each test purpose and its corresponding conformance requirement, a reference is given to the test method in ETSI TS 151 010-1 [2]. The requirements apply at the air interface, which may be stimulated to perform the tests by additional equipment if necessary.

The measurement uncertainty is described in ETSI TS 151 010-1 [2], annex 5.

In addition to the present document, other ENs that specify technical requirements in respect of essential requirements under other parts of article 3 of the Radio Equipment Directive [i.9] will apply to equipment within the scope of the present document.

NOTE 1: A list of such ENs is included on the web site http://www.newapproach.org.

ETSI TS 151 010-1 [2] constitutes the conformance test suite for GSM. The verification of the conformance requirements in the present document is based on the tests described in this reference. The set of requirements in ETSI TS 151 010-1 [2] and the set of requirements in the present document need not be identical.

Some requirements only apply to specific types of mobile station (e.g. data tests only apply to mobile stations with a data facility, tests that only apply to GSM 900 or only to GSM 1800 or to both). The present document indicates the specific test which should be carried out for each mobile station type.

An active accessory is covered by the present document if it modifies the terminal performance in an aspect which affects conformance to essential requirements.

NOTE 2: Only active devices are subject to the present document. Accessories may be tested with specific terminals, and either approved for use with those terminals only, or may possibly be approved for use with a wider range of terminals, depending on the nature and effect of the accessory.
2 References

2.1 Normative references

References are specific, identified by date of publication and/or edition number or version number. Only the cited version applies.

Referenced documents which are not found to be publicly available in the expected location might be found at https://docbox.etsi.org/Reference/.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

[2] ETSI TS 151 010-1 (V12.8.0) (05-2016): "Digital cellular telecommunications system (Phase 2+); Mobile Station (MS) conformance specification; Part 1: Conformance specification (3GPP TS 51.010-1 version 12.8.0 Release 12)".

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

[i.1] ETSI TS 102 933-1 (V2.1.1) (06-2015): "Railway Telecommunications (RT); GSM-R improved Receiver parameters; Part 1: Requirements for radio reception".

[i.2] ETSI ETS 300 905 (V5.3.2) (01-1998): "Digital cellular telecommunications system (Phase 2+) (GSM); Telecommunications supported by a GSM Public Land Mobile Network (PLMN) (GSM 02.03 version 5.3.2)".

[i.3] ETSI TS 122 060 (V4.4.0) (06-2002): "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); General Packet Radio Service (GPRS); Service description; Stage 1 (3GPP TS 22.060 version 4.4.0 Release 4)".

[i.4] ETSI TS 100 905 (V7.0.0) (08-1999): "Digital cellular telecommunications system (Phase 2+) (GSM); Telecommunications supported by a GSM Public Land Mobile Network (PLMN) (GSM 02.03 version 7.0.0 Release 1998)".

[i.5] ETSI TS 122 003 (V4.3.0) (03-2002): "Digital cellular telecommunications system (Phase 2+) (GSM); Universal Mobile Telecommunications Systems (UMTS); Circuit Telecommunications supported by a Public Land Mobile Network (PLMN) (3GPP TS 22.003 version 4.3.0 Release 4)".

[i.6] ETSI TS 101 349 (V8.16.0) (09-2002): "Digital cellular telecommunications system (Phase 2+); General Packet Radio Service (GPRS); Mobile Station (MS) - Base Station System (BSS) interface; Radio Link Control Medium Access Control (RLC/MAC) protocol (3GPP TS 04.60 version 8.16.0 Release 1999)".
3 Definitions and abbreviations

3.1 Definitions

For the purposes of the present document, the terms and definitions given in ETSI TR 121 905 [i.18] and the following apply:

**EGPRS:** any subset of the packet traffic channels PDTCH/MCS-1 to MCS-9 and related control channels

**E-GSM:** extended GSM 900 band (includes P-GSM band)

**environmental profile:** range of environmental conditions under which equipment within the scope of the present document is required to comply with the provisions of the present document

**ER-GSM 900:** extended Railway GSM 900 band (includes R-GSM band)

**GPRS:** any subset of the packet traffic channels PDTCH/CS-1 to CS-4 and related control channels

**GSM 900:** P-GSM, E-GSM and R-GSM band unless otherwise specified,
GSM: GSM 400, GSM 900, ER-GSM 900 and DCS 1800 band unless otherwise specified
P-GSM: primary GSM 900 band
R-GSM: Railways GSM 900 band (includes P-GSM band and E-GSM band)

3.2 Abbreviations

For the purposes of the present document, the following abbreviations apply:

4 Technical requirements specifications

4.1 Environmental profile

The technical requirements of the present document apply under the environmental profile for operation of the equipment, which shall be declared by the manufacturer. The equipment shall comply with all the technical requirements of the present document which are identified as applicable in annex A at all times when operating within the boundary limits of the required operational environmental profile.

4.2 Conformance requirements

4.2.0 Introduction

The present document contains all requirements that are needed for terminals to meet the essential requirement as defined in the Directive 2014/53/EU [i.9], article 3.2:

- The present document gives normative reference to a clause of ETSI TS 151 010-1 [2] containing the conformance requirement text and references to the base standard.

To meet the essential requirement under article 3.2 of Directive 2014/53/EU [i.9], a set of essential parameters have been identified. Table 2 provides a cross reference between these essential parameters and the corresponding technical requirements for equipment within the scope of the present document.

</table>

Unless otherwise stated, the transmitter and receiver characteristics are specified at the antenna connector(s) of the MS. For MS(s) with an integral antenna only, a reference antenna(s) with a gain of 0 dBi should be assumed for each antenna port(s). An MS with integral antenna(s) may be taken into account by converting these power levels into field strength requirements, assuming a 0 dBi gain antenna.

### 4.2.1 Transmitter - Frequency error and phase error

### 4.2.2 Transmitter - Frequency error under multipath and interference conditions

Clauses 13.2.1 and 13.2.2 of ETSI TS 151 010-1 [2] shall apply.
4.2.3 Transmitter - Frequency error and phase error in HSCSD multislot configuration

4.2.4 Frequency error and phase error in GPRS multislot configuration

4.2.5 Transmitter output power and burst timing
Clauses 13.3.1 and 13.3.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.6 Transmitter - Output RF spectrum
Clauses 13.4.1 and 13.4.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.7 Transmitter output power and burst timing in HSCSD multislot configurations
Clauses 13.7.1 and 13.7.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.8 Transmitter - Output RF spectrum in HSCSD multislot configuration

4.2.9 Transmitter - Output RF spectrum for MS supporting the R-GSM or ER-GSM frequency band

4.2.10 Transmitter output power in GPRS multislot configuration
Clauses 13.16.2.1 and 13.16.2.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.11 Output RF spectrum in GPRS multislot configuration
Clauses 13.16.3.1 and 13.16.3.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.12 Conducted spurious emissions - MS allocated a channel
Clauses 12.1.1.1 and 12.1.1.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.13 Conducted spurious emissions - MS in idle mode
Clauses 12.1.2.1 and 12.1.2.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.14 Conducted spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS allocated a channel
Clauses 12.3.1.1 and 12.3.1.2 of ETSI TS 151 010-1 [2] shall apply.
4.2.15 Conducted spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS in idle mode
Clauses 12.3.2.1 and 12.3.2.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.16 Radiated spurious emissions - MS allocated a channel
Clauses 12.2.1.1 and 12.2.1.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.17 Radiated spurious emissions - MS in idle mode
Clauses 12.2.2.1 and 12.2.2.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.18 Radiated spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS allocated a channel
Clauses 12.4.1.1 and 12.4.1.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.19 Radiated spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS in idle mode
Clauses 12.4.2.1 and 12.4.2.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.20 Receiver Blocking and spurious response - speech channels
Clauses 14.7.1.1 and 14.7.1.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.21 Receiver Blocking and spurious response - speech channels for MS supporting the R-GSM or ER-GSM frequency band
Clauses 14.7.3.1 and 14.7.3.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.22 Improved Receiver Blocking and spurious response - speech channels for 8W MS supporting the R-GSM or ER-GSM frequency band
Clauses 4.2.1 and 4.3.1 of ETSI TS 102 933-2 [4] shall apply.

4.2.23 Improved Receiver Blocking and spurious response - speech channels for 2W MS supporting the R-GSM or ER-GSM frequency band
Clauses 5.2.1 and 5.3.1 of ETSI TS 102 933-2 [4] shall apply.

4.2.24 Improved Receiver Blocking and spurious response - control channels for 8W MS supporting the R-GSM or ER-GSM frequency band not supporting speech
Clauses 4.2.2 and 4.3.2 of ETSI TS 102 933-2 [4] shall apply.
4.2.25 Improved Receiver Blocking and spurious response - control channels for 2W MS supporting the R-GSM or ER-GSM frequency band not supporting speech

Clauses 5.2.2 and 5.3.2 of ETSI TS 102 933-2 [4] shall apply.

4.2.26 Frequency error and Modulation accuracy in EGPRS Configuration

4.2.27 Frequency error under multipath and interference conditions in EGPRS Configuration

Clauses 13.17.2.1 and 13.17.2.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.28 EGPRS Transmitter output power

Clauses 13.17.3.1 and 13.17.3.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.29 Output RF spectrum in EGPRS configuration

Clauses 13.17.4.1 and 13.17.4.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.30 Blocking and spurious response in EGPRS configuration

Clauses 14.18.5.1 and 14.18.5.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.31 Blocking and spurious response in DLMC configuration

Clauses 14.18.5b.1 and 14.18.5b.2 of ETSI TS 151 010-1 [2] shall apply.

4.2.32 Intermodulation rejection - speech channels

4.2.33 Intermodulation rejection - control channels

4.2.34 Intermodulation rejection - EGPRS

4.2.35 AM suppression - speech channels

4.2.36 AM suppression - control channels

4.2.37 AM suppression - packet channels

4.2.38 Adjacent channel rejection - speech channels (TCH/FS)
Clause 14.5.1.1 of ETSI TS 151 010-1 [2] shall apply.

4.2.39 Adjacent channel rejection - control channels

4.2.40 Adjacent channel rejection - EGPRS

4.2.41 Adjacent channel rejection in DLMC configuration

4.2.42 Reference sensitivity - TCH/FS

4.2.43 Reference sensitivity - FACCH/F
Clause 14.2.3 of ETSI TS 151 010-1 [2] shall apply.

4.2.44 Minimum Input level for Reference Performance - GPRS

4.2.45 Minimum Input level for Reference Performance - EGPRS

4.2.46 Reference sensitivity - TCH/FS for MS supporting the R-GSM or ER-GSM band

5 Testing for compliance with technical requirements

5.1 Environmental conditions for testing
Tests defined in the present document shall be carried out at representative points within the boundary limits of the declared operational environmental profile.

Where technical performance varies subject to environmental conditions, tests shall be carried out under a sufficient variety of environmental conditions (within the boundary limits of the declared operational environmental profile) to give confidence of compliance for the affected technical requirements.
5.2 Interpretation of the measurement results

The interpretation of the results recorded in a test report for the measurements described in the present document shall be as follows:

- the measured value related to the corresponding limit will be used to decide whether an equipment meets the requirements of the present document;
- the value of the measurement uncertainty for the measurement of each parameter shall be included in the test report;
- the recorded value of the measurement uncertainty shall be, for each measurement, equal to or less than the one specified in annex 5 of ETSI TS 151 010-1 [2].

For the test methods, according to the present document, the measurement uncertainty figures shall be calculated and shall correspond to an expansion factor (coverage factor) \( k = 1.96 \) or \( k = 2 \) (which provide confidence levels of respectively 95% and 95.45% in the case where the distributions characterizing the actual measurement uncertainties are normal (Gaussian)). Principles for the calculation of measurement uncertainty are contained in ETSI TR 100 028 [i.7], in particular in annex D of the ETSI TR 100 028-2 [i.11].

5.3 Essential radio test suites

5.3.1 Transmitter - Frequency error and phase error

Requirements of ETSI TS 151 010-1 [2], clause 13.1.5 shall be fulfilled.

5.3.2 Transmitter - Frequency error under multipath and interference conditions

Requirements of ETSI TS 151 010-1 [2], clause 13.2.5 shall be fulfilled.

5.3.3 Transmitter - Frequency error and phase error in HSCSD multislot configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.6.5 shall be fulfilled.

5.3.4 Frequency error and phase error in GPRS multislot configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.16.1.5 shall be fulfilled.

5.3.5 Transmitter output power and burst timing

Requirements of ETSI TS 151 010-1 [2], clause 13.3.5 shall be fulfilled.

5.3.6 Transmitter - Output RF spectrum

Requirements of ETSI TS 151 010-1 [2], clause 13.4.5 shall be fulfilled.

5.3.7 Transmitter output power and burst timing in HSCSD multislot configurations

Requirements of ETSI TS 151 010-1 [2], clause 13.7.5 shall be fulfilled.

5.3.8 Transmitter - Output RF spectrum in HSCSD multislot configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.8.5 shall be fulfilled.
5.3.9 Transmitter - Output RF spectrum for MS supporting the R-GSM or ER-GSM frequency band

Requirements of ETSI TS 151 010-1 [2], clause 13.9.5 shall be fulfilled.

5.3.10 Transmitter output power in GPRS multislot configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.16.2.5 shall be fulfilled.

5.3.11 Output RF spectrum in GPRS multislot configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.16.3.5 shall be fulfilled.

5.3.12 Conducted spurious emissions - MS allocated a channel

Requirements of ETSI TS 151 010-1 [2], clause 12.1.1.5 shall be fulfilled.

5.3.13 Conducted spurious emissions - MS in idle mode

Requirements of ETSI TS 151 010-1 [2], clause 12.1.2.5 shall be fulfilled.

5.3.14 Conducted spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS allocated a channel

Requirements of ETSI TS 151 010-1 [2], clause 12.3.1.5 shall be fulfilled.

5.3.15 Conducted spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS in idle mode

Requirements of ETSI TS 151 010-1 [2], clause 12.3.2.5 shall be fulfilled.

5.3.16 Radiated spurious emissions - MS allocated a channel

Requirements of ETSI TS 151 010-1 [2], clause 12.2.1.5 shall be fulfilled.

5.3.17 Radiated spurious emissions - MS in idle mode

Requirements of ETSI TS 151 010-1 [2], clause 12.2.2.5 shall be fulfilled.

5.3.18 Radiated spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS allocated a channel

Requirements of ETSI TS 151 010-1 [2], clause 12.4.1.5 shall be fulfilled.

5.3.19 Radiated spurious emissions for MS supporting the R-GSM or ER-GSM frequency band - MS in idle mode

Requirements of ETSI TS 151 010-1 [2], clause 12.4.2.5 shall be fulfilled.

5.3.20 Receiver Blocking and spurious response - speech channels

Requirements of ETSI TS 151 010-1 [2], clause 14.7.1.5 shall be fulfilled.
5.3.21 Receiver Blocking and spurious response - speech channels for MS
supporting the R-GSM or ER-GSM frequency band

Requirements of ETSI TS 151 010-1 [2], clause 14.7.3.5 shall be fulfilled.

5.3.22 Improved Receiver Blocking and spurious response - speech
channels for 8W MS supporting the R-GSM or ER-GSM frequency
band

Requirements of ETSI TS 102 933-2 [4], clauses 4.2.1 and 4.3.1 shall be fulfilled.

5.3.23 Improved Receiver Blocking and spurious response - speech
channels for 2W MS supporting the R-GSM or ER-GSM frequency
band

Requirements of ETSI TS 102 933-2 [4], clauses 5.2.1 and 5.3.1 shall be fulfilled.

5.3.24 Improved Receiver Blocking and spurious response - control
channels for 8W MS supporting the R-GSM or ER-GSM frequency
band not supporting speech

Requirements of ETSI TS 102 933-2 [4], clauses 4.2.2 and 4.3.2 shall be fulfilled.

5.3.25 Improved Receiver Blocking and spurious response - control
channels for 2W MS supporting the R-GSM or ER-GSM frequency
band not supporting speech

Requirements of ETSI TS 102 933-2 [4], clauses 5.2.2 and 5.3.2 shall be fulfilled.

5.3.26 Frequency error and Modulation accuracy in EGPRS Configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.17.1.5 shall be fulfilled.

5.3.27 Frequency error under multipath and interference conditions in
EGPRS Configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.17.2.5 shall be fulfilled.

5.3.28 EGPRS Transmitter output power

Requirements of ETSI TS 151 010-1 [2], clause 13.17.3.5 shall be fulfilled.

5.3.29 Output RF spectrum in EGPRS configuration

Requirements of ETSI TS 151 010-1 [2], clause 13.17.4.5 shall be fulfilled.

5.3.30 Blocking and spurious response in EGPRS configuration

Requirements of ETSI TS 151 010-1 [2], clause 14.18.5.5 shall be fulfilled.

5.3.31 Blocking and spurious response in DLMC configuration

Requirements of ETSI TS 151 010-1 [2], clause 14.18.5b.5 shall be fulfilled.
5.3.32 Intermodulation rejection - speech channels
Requirements of ETSI TS 151 010-1 [2], clause 14.6.1.5 shall be fulfilled.

5.3.33 Intermodulation rejection - speech channels
Requirements of ETSI TS 151 010-1 [2], clause 14.6.1.5 shall be fulfilled.

5.3.34 Intermodulation rejection - EGPRS
Requirements of ETSI TS 151 010-1 [2], clause 14.18.4.5 shall be fulfilled.

5.3.35 AM suppression - speech channels
Requirements of ETSI TS 151 010-1 [2], clause 14.8.1.5 shall be fulfilled.

5.3.36 AM suppression - control channels
Requirements of ETSI TS 151 010-1 [2], clause 14.8.2.5 shall be fulfilled.

5.3.37 AM suppression - packet channels
Requirements of ETSI TS 151 010-1 [2], clause 14.8.3.5 shall be fulfilled.

5.3.38 Adjacent channel rejection - speech channels (TCH/FS)
Requirements of ETSI TS 151 010-1 [2], clause 14.5.1.1.5 shall be fulfilled.

5.3.39 Adjacent channel rejection - control channels
Requirements of ETSI TS 151 010-1 [2], clause 14.5.2.5 shall be fulfilled.

5.3.40 Adjacent channel rejection - EGPRS
Requirements of ETSI TS 151 010-1 [2], clause 14.18.3.5 shall be fulfilled.

5.3.41 Adjacent channel rejection in DLMC configuration
Requirements of ETSI TS 151 010-1 [2], clause 14.18.3d.5 shall be fulfilled.

5.3.42 Reference sensitivity - TCH/FS
Requirements of ETSI TS 151 010-1 [2], clause 14.2.1.5 shall be fulfilled.

5.3.43 Reference sensitivity - FACCH/F
Requirements of ETSI TS 151 010-1 [2], clause 14.2.3.5 shall be fulfilled.

5.3.44 Minimum Input level for Reference Performance - GPRS
Requirements of ETSI TS 151 010-1 [2], clause 14.16.1.5 shall be fulfilled.

5.3.45 Minimum Input level for Reference Performance - EGPRS
Requirements of ETSI TS 151 010-1 [2], clause 14.18.1.5 shall be fulfilled.
5.3.46 Reference sensitivity - TCH/FS for MS supporting the R-GSM or ER-GSM band

Requirements of ETSI TS 151 010-1 [2], clause 14.2.9.5 shall be fulfilled.
Annex A (informative):
Relationship between the present document and the essential requirements of Directive 2014/53/EU

The present document has been prepared under the Commission's standardisation request C(2015) 5376 final [i.10] to provide one voluntary means of conforming to the essential requirements of Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC [i.9].

Once the present document is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of the present document given in table A.1 confers, within the limits of the scope of the present document, a presumption of conformity with the corresponding essential requirements of that Directive, and associated EFTA regulations.

</table>

Key to columns:

- **Requirement:**
  - **No**: A unique identifier for one row of the table which may be used to identify a requirement.
  - **Description**: A textual reference to the requirement.
  - **Clause Number**: Identification of clause(s) defining the requirement in the present document unless another document is referenced explicitly.

- **Requirement Conditionality:**
  - **U/C**: Indicates whether the requirement is unconditionally applicable (U) or is conditional upon the manufacturer's claimed functionality of the equipment (C).
  - **Condition**: Explains the conditions when the requirement is or is not applicable for a requirement which is classified "conditional".

Presumption of conformity stays valid only as long as a reference to the present document is maintained in the list published in the Official Journal of the European Union. Users of the present document should consult frequently the latest list published in the Official Journal of the European Union.

Other Union legislation may be applicable to the product(s) falling within the scope of the present document.
Annex B (informative):
Type of Mobile Stations

Table B.1 lists the different types of mobile stations.
