Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

Foreword

This Harmonised European Standard (EN) has been produced by ETSI Technical Committee Electromagnetic compatibility and Radio spectrum Matters (ERM).

The present document has been prepared under the Commission's standardisation request C(2015) 5376 final [i.3] to provide one voluntary means of conforming to the essential requirements of Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC [i.2].

Once the present document is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of the present document given in table A.1 confers, within the limits of the scope of the present document, a presumption of conformity with the corresponding essential requirements of that Directive, and associated EFTA regulations.

The present document is part 7 of a multi-part deliverable. Full details of the entire series can be found in part 1 [1].

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the **ETSI Drafting Rules** (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.
1 Scope

The present document together with ETSI EN 301 843-1 [1], covers the assessment of Maritime Broadband Radiolink equipment (MBR) for the maritime mobile service, and ancillary equipment in respect of ElectroMagnetic Compatibility (EMC).

Technical specifications related to the antenna port and emissions from the enclosure port of MBR are not included in the present document. Such technical specifications are found in the related product standards for the effective use of the radio spectrum.

The present document specifies the applicable test conditions, performance assessment, and performance criteria for MBR equipment for the maritime mobile service, and the associated ancillary equipment.

In case of differences (for instance concerning special conditions, definitions, abbreviations) between the present document and ETSI EN 301 843-1 [1], the provisions of the present document take precedence.

The electromagnetic environment used in the present document to develop the technical specifications encompasses the electromagnetic environment on board ships as identified in IEC EN 60945 [i.1].

NOTE: The relationship between the present document and essential requirements of article 3.1b of Directive 2014/53/EU [i.2] is given in annex A.

2 References

2.1 Normative references

References are specific, identified by date of publication and/or edition number or version number. Only the cited version applies.

Referenced documents which are not found to be publicly available in the expected location might be found at https://docbox.etsi.org/Reference/.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

3 Definitions, symbols and abbreviations

3.1 Definitions
For the purposes of the present document, the terms and definitions given in ETSI EN 301 843-1 [1] apply.

3.2 Symbols
For the purposes of the present document, the following symbols apply:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>emf</td>
<td>electromotive force</td>
</tr>
<tr>

</tbody>
</table>

4 Test conditions

4.0 Test conditions requirements
For the purposes of the present document, the test conditions of ETSI EN 301 843-1 [1], clause 4, shall apply as appropriate. Further product related test conditions for MBR are specified in the present document.

4.1 General
The provisions of ETSI EN 301 843-1 [1], clause 4.1 shall apply with the following modifications.

For emission and immunity tests the normal test modulation, test arrangements, etc., as specified in the present document, clauses 4.1 to 4.5, shall apply.

The test shall be carried out at a point within the specified normal operating environmental range of temperature and humidity with the equipment connected to the normal power supply voltage.
4.2 Arrangements for test signals

4.2.0 General
The provisions of ETSI EN 301 843-1 [1], clause 4.2 shall apply.

4.2.1 Arrangements for test signals at the input of the transmitter
The provisions of ETSI EN 301 843-1 [1], clause 4.2.1 shall apply.

4.2.2 Arrangements for test signals at the output of the transmitter
The provisions of ETSI EN 301 843-1 [1], clause 4.2.2 shall apply.

4.2.3 Arrangements for test signals at the input of the receiver
The provisions of ETSI EN 301 843-1 [1], clause 4.2.3 shall apply with the following modifications:
In the 3rd paragraph of clause 4.2.3, the last sentence: "This antenna shall be connected to the external RF signal source by a coaxial cable", should be replaced with: "The wanted RF signal shall be generated by an MBR transmitter".

4.2.4 Arrangements for test signals at the output of the receiver
The provisions of ETSI EN 301 843-1 [1], clause 4.2.4 shall apply as appropriate.

4.2.5 Arrangements for testing transmitter and receiver together (as a system)
The provisions of ETSI EN 301 843-1 [1], clause 4.2.5 shall apply as appropriate.

4.3 Exclusion bands
The provisions of ETSI EN 301 843-1 [1], clause 4.3 are not applicable.

4.4 Narrow band responses on receivers
The provisions of ETSI EN 301 843-1 [1], clause 4.4 shall apply

4.5 Normal test modulation
The provisions of ETSI EN 301 843-1 [1], clause 4.5 shall apply as applicable using an MBR message consisting of a pseudo-random bit sequence of at least 8 192 payload bits according to Recommendation ITU-T O.153 [2]. The bit modulation rate over the air shall be 10 Mbit/s. The message contains a header targeting the targeted receiver identity.

5 Performance assessment

5.1 General
The provisions of ETSI EN 301 843-1 [1], clause 5.1 shall apply.
5.2 Equipment which can provide a continuous communication link

The provisions of ETSI EN 301 843-1 [1], clause 5.2 shall apply.

5.3 Equipment which does not provide a continuous communication link

The provisions of ETSI EN 301 843-1 [1], clause 5.3 shall apply.

5.4 Ancillary equipment

The provisions of ETSI EN 301 843-1 [1], clause 5.4 shall apply.

5.5 Equipment classification

Maritime mobile broadband radiolink equipment belong solely to the category of mobile marine radio equipment as defined in ETSI EN 301 843-1 [1], clause 3.1.

6 Performance criteria

6.0 General

The provisions of ETSI EN 301 843-1 [1], clause 6 shall apply.

The equipment shall meet the special performance criteria set out in clauses 6.1 to 6.4, as appropriate.

6.1 Performance criteria A for continuous phenomena applied to transmitters and receivers

The provisions of ETSI EN 301 843-1 [1], clause 6.1 shall apply.

6.2 Performance criteria B for transient phenomena applied to transmitters and receivers

The provisions of ETSI EN 301 843-1 [1], clause 6.2 shall apply with the following modifications.

During the test sequence, degradation or loss of function or performance which is self-recoverable is allowed, but the EUT shall not unintentionally transmit or change actual operating state or stored data.

6.3 Performance criteria C applied to power supply failure

The provisions of ETSI EN 301 843-1 [1], clause 6.3 shall apply.

6.4 Performance check

The provisions of ETSI EN 301 843-1 [1], clause 6.4 shall apply. The performance check consists of transmitting and receiving the test signal 2 and measuring the BER. The signal level at the receiving antenna shall be above -80 dBm and the receiver BER shall be better than \(10^{-5}\).
6.5 Performance criteria for equipment which does not provide a continuous communication link

The provisions of ETSI EN 301 843-1 [1], clause 6.5 shall apply.

6.6 Performance criteria for ancillary equipment tested on a stand alone basis

The provisions of ETSI EN 301 843-1 [1], clause 6.6 shall apply.

7 Applicability overview

7.1 Emission

ETSI EN 301 843-1 [1], table 1, contains the applicability of EMC emission measurements to the relevant ports of marine radio and/or associated ancillary equipment.

7.2 Immunity

7.2.1 General

ETSI EN 301 843-1 [1], table 2, contains the applicability of EMC immunity measurements to the relevant ports of marine radio and/or associated ancillary equipment.

7.2.2 Special conditions

The following special conditions set out in table 1 shall apply in addition to the immunity test methods and performance criteria used in ETSI EN 301 843-1 [1], clause 9. The wanted signal shall be generated by an MBR transmitter modulated as described in clause 4.5.

Table 1: Special conditions for EMC immunity tests

<table>
<thead>
<tr>
<th>Reference to clauses in ETSI EN 301 843-1 [1]</th>
<th>Special product-related conditions, additional to or modifying the test conditions in ETSI EN 301 843-1 [1], clause 9</th>
</tr>
</thead>
<tbody>
<tr>
<td>9.2.2: Test method; Radio frequency electromagnetic field</td>
<td>Wanted RF input signal for the receiver under test: A wanted receiver RF input level of -80 dBm shall be used during the test.</td>
</tr>
<tr>
<td>9.5.2: Test method; Radio frequency, Common mode</td>
<td>Wanted RF input signal for the receiver under test: A wanted receiver RF input level of -80 dBm shall be used during the test.</td>
</tr>
</tbody>
</table>

8 Methods of measurement and limits for EMC emissions

8.1 Test configuration

The provisions of ETSI EN 301 843-1 [1], clause 8.1 shall apply.
8.2 Enclosure of ancillary equipment measured on a stand alone basis

The provisions of ETSI EN 301 843-1 [1], clause 8.2, are not applicable.

8.3 DC power input/output ports

The provisions of ETSI EN 301 843-1 [1], clause 8.3 shall apply.

8.4 AC mains power input/output ports

The provisions of ETSI EN 301 843-1 [1], clause 8.4 shall apply.

9 Test methods and levels for immunity tests

9.1 Test configuration

The provisions of ETSI EN 301 843-1 [1], clause 9.1 shall apply.

9.2 Radio frequency electromagnetic field

(80 MHz to 2 700 MHz)

The provisions of ETSI EN 301 843-1 [1], clause 9.2 shall apply.

9.3 Electrostatic discharge

The provisions of ETSI EN 301 843-1 [1], clause 9.3 shall apply but particular care shall be taken with respect to the minimum safe distance from the antenna.

9.4 Fast transients, differential and common mode

The provisions of ETSI EN 301 843-1 [1], clause 9.4 shall apply.

9.5 Radio frequency, common mode

The provisions of ETSI EN 301 843-1 [1], clause 9.5 shall apply.

9.6 Power supply variations

The provisions of ETSI EN 301 843-1 [1], clause 9.6 shall apply.

9.7 Surges

The provisions of ETSI EN 301 843-1 [1], clause 9.7 shall apply.
Annex A (informative):
Relationship between the present document and the essential requirements of Directive 2014/53/EU

The present document has been prepared under the Commission's standardisation request C(2015) 5376 final to provide one voluntary means of conforming to the essential requirements of Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC.

Once the present document is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of the present document given in table A.1 confers, within the limits of the scope of the present document, a presumption of conformity with the corresponding essential requirements of that Directive, and associated EFTA regulations.

### Key to columns:

**Requirement:**
- **No**: A unique identifier for one row of the table which may be used to identify a requirement.
- **Description**: A textual reference to the requirement.

**Essential requirements of Directive**
- Identification of article(s) defining the requirement in the Directive.

**Clause(s) of the present document**
- Identification of clause(s) defining the requirement in the present document unless another document is referenced explicitly.

### Requirement Conditionality:

- **U/C**: Indicates whether the requirement is unconditionally applicable (U) or is conditional upon the manufacturer’s claimed functionality of the equipment (C).
- **Condition**: Explains the conditions when the requirement is or is not applicable for a requirement which is classified “conditional”.

Presumption of conformity stays valid only as long as a reference to the present document is maintained in the list published in the Official Journal of the European Union. Users of the present document should consult frequently the latest list published in the Official Journal of the European Union.

Other Union legislation may be applicable to the product(s) falling within the scope of the present document.
