# Intellectual Property Rights

## Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

## Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

---

# Foreword

This European Standard (EN) has been produced by ETSI Technical Committee Electromagnetic compatibility and Radio spectrum Matters (ERM).

The presumption of conformity which is linked to the full application of ETSI EN 303 213 (parts 1 to 4, 7, 8) can only be claimed after ETSI EN 303 213 (parts 1 to 4, 7, 8) has been listed in the Official Journal of the European Union as Community Specification.

General requirements for presumption of conformity to Regulation (EU) 2018/1139 [i.6] are given in the normative annexes of the present document.

NOTE: Other requirements and other EU Regulations and/or Directives may be applicable to the product(s) falling within the scope of the present document.

The present document is part 4, sub-part 2 of a multi-part deliverable covering Advanced Surface Movement Guidance and Control System (A-SMGCS), as identified below:

Part 1: "Community Specification for A-SMGCS surveillance service including external interfaces";

Part 2: "Community Specification for A-SMGCS airport safety support service";

Part 3: "Community Specification for a deployed cooperative sensor including its interfaces";

**Part 4: "Community Specification for a deployed non-cooperative sensor including its interfaces";**

Sub-part 1: "Generic requirements for non-cooperative sensor";

**Sub-part 2: "Specific requirements for a deployed Surface Movement Radar sensor";**

Part 5: "Harmonised Standard for access to radio spectrum for Multilateration (MLAT) equipment";

Part 6: "Harmonised Standard for access to radio spectrum for deployed surface movement radar sensors";

Part 7: "Community Specification for A-SMGCS routing service";

Part 8: "Community Specification for A-SMGCS guidance service".

<b>National transposition dates</b>	
Date of adoption of this EN:	9 September 2020
Date of latest announcement of this EN (doa):	31 December 2020
Date of latest publication of new National Standard or endorsement of this EN (dop/e):	30 June 2021
Date of withdrawal of any conflicting National Standard (dow):	30 June 2021

---

## Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

---

# 1 Scope

The present document is applicable to deployed non-cooperative SMR sensor as a constituent of an Advanced Surface Movement Guidance and Control System (A-SMGCS).

NOTE 1: Generic requirements for a non-cooperative sensor are defined in ETSI EN 303 213-4-1 [1].

The present document provides a European Standard for manufacturers, Air Navigation Service Providers and/or Airport Operators, who have to demonstrate and declare compliance of their systems and constituents to the Essential Requirements (ERs) of Annex VIII of Regulation EU 2018/1139 [i.6].

NOTE 2: The ERs in Annex VIII of Regulation EU 2018/1139 [i.6] covered by the present document are outlined in Table A.1.

NOTE 3: Although the ERs of the SES Interoperability Regulation [i.1] have been repealed with effect from 11 September 2018 [i.6], a mapping of the requirements for the A-SMGCS Surveillance Service to this same regulation [i.1] is provided in Annex B.

Any software elements related to the software assurance level of an A-SMGCS are out of scope of the present document. As such the ERs of Regulation EU 2018/1139 [i.6] are not considered for software elements within the present document.

The present document does not give presumption of conformity related to the maintenance requirements, environmental constraints, procedure level, effect of harmful interference and civil/military coordination.

NOTE 4: For these ERs, the Air Navigation Service Provider will need to provide supplementary compliance within their Interoperability Technical Files.

The present document does not give presumption of conformity to any current interoperability Implementing Rules (IRs).

NOTE 5: Currently there are no relevant Implementing Rules for A-SMGCS.

Requirements in the present document which refer to "should" statements or recommendations in the normatively referenced material (clause 2.1) are to be interpreted as fully normative ("shall") for the purpose of compliance with the present document if they are unambiguously referred to from the present document.

The reference to particular requirements is done either by citing the unambiguous requirement number or range of numbers (e.g. "[REQ 30.] to [REQ 35.]" ) or, if no requirement numbers are available, by indicating the paragraph and clause of the reference material where the requirement can be found.

NOTE 6: Other requirements and other EU Regulations and/or Directives may be applicable to the product(s) falling within the scope of the present document.

---

## 2 References

### 2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at <https://docbox.etsi.org/Reference/>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document:

[1] ETSI EN 303 213-4-1: "Advanced Surface Movement Guidance and Control System (A-SMGCS); Part 4: Community Specification for a deployed non-cooperative sensor including its interfaces; Sub-part 1: Generic requirements for non-cooperative sensor".

[2] EUROCAE ED-116 (January 2004): "Minimum Operational Performance Specification for Surface Movement Radar Sensor Systems for Use in A-SMGCS".

NOTE: Available at <https://eshop.eurocae.net/eurocae-documents-and-reports/ed-116/>.

[3] EUROCAE ED-87 revision D (June 2019): "Minimum Aviation System Performance Specification for Advanced Surface Movement Guidance and Control Systems (A-SMGCS)".

NOTE: Available at <https://eshop.eurocae.net/eurocae-documents-and-reports/ed-87d/>.

## 2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

[i.1] Regulation (EC) No 552/2004 of the European Parliament and of the Council of 10 March 2004 on the interoperability of the European Air Traffic Management network (interoperability Regulation), OJ L 96, 31.03.2004 as amended by Regulation (EC) No 1070/2009.

[i.2] Regulation (EC) No 549/2004 of the European Parliament and of the Council of 10 March 2004 laying down the framework for the creation of the single European sky (the framework Regulation), OJ L 96, 31.03.2004 as amended by Regulation (EC) No 1070/2009.

[i.3] Void.

[i.4] ICAO Document 9830, AN/452: "Advanced Surface Movement Guidance and Control Systems (A-SMGCS) Manual", First Edition, 2004.

[i.5] Regulation (EC) No 1070/2009 of the European Parliament and of the Council of 21 October 2009 amending Regulations (EC) No 549/2004, (EC) No 550/2004, (EC) No 551/2004 and (EC) No 552/2004 in order to improve the performance and sustainability of the European aviation system, OJ L 300, 14.11.2009.

[i.6] Regulation (EU) No 2018/1139 of the European Parliament and of the Council of 4 July 2018 on common rules in the field of civil aviation and establishing a European Union Aviation Safety Agency, and amending Regulations (EC) No 2111/2005, (EC) No 1008/2008, (EU) No 996/2010, (EU) No 376/2014 and Directives 2014/30/EU and 2014/53/EU of the European Parliament and of the Council, and repealing Regulations (EC) No 552/2004 and (EC) No 216/2008 of the European Parliament and of the Council and Council Regulation (EEC) No 3922/91.

---

## 3 Definition of terms, symbols and abbreviations

### 3.1 Terms

For the purposes of the present document, the terms given in EUROCAE ED-87D [3] and the following apply:

**Advanced Surface Movement Guidance and Control System (A-SMGCS):** system providing as a minimum Surveillance and which can include Airport Safety Support, Routing and Guidance to aircraft and vehicles in order to maintain the airport throughput under all local weather conditions whilst maintaining the required level of safety

NOTE: This definition is derived from EUROCAE ED-87D [3].

**aerodrome:** defined area on land or water (including any buildings, installations, and equipment) intended to be used either wholly or in part for arrival, departure and surface movement of aircraft

NOTE: This definition is derived from the ICAO Document 9830 [i.4].

**apron:** defined area on a land aerodrome, intended to accommodate aircraft for purposes of loading or unloading passengers, mail or cargo, fuelling, parking or maintenance

NOTE: This definition is derived from the ICAO Document 9830 [i.4].

**availability:** probability that the system will operate satisfactorily at a given point in time when used under stated conditions in an ideal support environment

NOTE: This definition is derived from EUROCAE ED-87D [3].

**classification:** function which groups targets into various types (e.g. large, medium, small)

**constituents:** tangible objects such as hardware and intangible objects such as software upon which the interoperability of the EATMN depends

**manoeuvring area:** part of an aerodrome to be used for take-off, landing and taxiing of aircraft, excluding aprons

NOTE: This definition is derived from the ICAO Document 9830 [i.4].

**movement area:** part of an aerodrome to be used for take-off, landing and taxiing of aircraft, consisting of the manoeuvring area and apron(s)

NOTE: This definition is derived from the ICAO Document 9830 [i.4].

**procedure:** standard method for either the technical or operational use of the system, in the context of agreed and validated concepts of operation requiring uniform implementation throughout the EATMN

**system:** aggregation of airborne and ground based constituents, as well as space-based equipment, that provides support for air navigation services for all phases of flight

**target:** aircraft, vehicle or other obstacle, whose image is displayed on a surveillance display

NOTE: This definition is derived from EUROCAE ED-87D [3].

**update:** renewal of Target Reports relating to all Targets under Surveillance

NOTE: This definition is derived from EUROCAE ED-87D [3].

### 3.2 Symbols

Void.

### 3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

A-SMGCS	Advanced Surface Movement Guidance and Control Systems
ANS	Air Navigation Service
ATM	Air Traffic Management
ATS	Air Traffic Service
EATMN	European Air Traffic Management Network
EC	European Communities
EN	European Norm - (standard)
ER	Essential Requirement
EUROCAE	EUROpean organization for Civil Aviation Equipment
EUROCONTROL	EUROpean organization for the safety of air navigation
HMI	Human Machine Interface
ICAO	International Civil Aviation Organization
SES	Single European Sky
SMR	Surface Movement Radar
TMA	Terminal Manoeuvring Area

---

## 4 Requirements for implementing Surface Movement Radar (SMR) sensor for A-SMGCS Systems

### 4.0 General

Clause 4 defines the minimum requirements for an SMR sensor of A-SMGCS System.

### 4.1 Design Requirements for SMR sensor for A-SMGCS Systems

#### 4.1.1 General Requirements

The SMR sensor shall comply with the requirements as defined in ETSI EN 303 213-4-1 [1].

#### 4.1.2 Coverage

The constituent shall have the minimum coverage as defined in EUROCAE ED-116 [2], clause 2.8.

#### 4.1.3 Safety interlocks

The constituent shall comply with the requirements as defined in EUROCAE ED-116 [2], clause 2.14.

### 4.2 Built requirements for SMR sensors for A-SMGCS Systems

#### 4.2.1 Basic conformity tests

The basic conformity tests shall comply with the requirements as defined in EUROCAE ED-116 [2], clause 5.3.

#### 4.2.2 Performance tests

The performance tests shall comply with the requirements as defined in EUROCAE ED-116 [2], clause 5.4.

## 4.3 Requirements for site testing procedures for SMR sensor for A-SMGCS Systems

### 4.3.1 Site testing procedures

The on-site testing procedures shall be performed as defined in EUROCAE ED-116 [2], clause 6.4.

## 4.4 Maintenance Requirements for SMR sensors for A-SMGCS Systems

The constituent shall comply with the maintenance requirements as defined in EUROCAE ED-116 [2], clause 2.21.

# Annex A (normative): Regulation EU 2018/1139 Essential Requirements mapping and Checklist

## A.1 Correspondence between the present document and the relevant Essential Requirements of Annex VIII of Regulation EU 2018/1139

This annex provides a relationship between the present document and the Essential Requirements of Annex VIII of Regulation (EU) 2018/1139 [i.6].

The A-SMGCS non-cooperative SMR sensor shall comply with the Essential Requirements of Regulation (EU) 2018/1139 [i.6] as defined and described in the traceability matrixes of this annex (Table A.1 and Table A.2 below).

NOTE: Whenever "n/a" is used, that means that a given ER and/or an associated "keyword" is not applicable for presumption of conformity.

**Table A.1: Traceability from the Essential Requirements of Annex VIII of Regulation (EU) 2018/1139 [i.6] to clauses of the present document**

Essential requirements (ERs) of Regulation (EU) 2018/1139	Clause(s) of the present document	Qualifying remarks/Notes
ER 1 Use of the airspace	The present document does not give presumption of conformity	
ER 2.1 Aeronautical information and data for airspace users for the purpose of air navigation	The present document does not give presumption of conformity

## A.2 Mapping of requirements for the A-SMGCS Surveillance Service to the relevant Essential Requirements of Annex VIII, chapters 2.6 and 3 of Regulation (EU) 2018/1139

The purpose of the present annex is to provide a comprehensive traceability of evidence on constituents and system levels against clauses of the relevant Essential Requirements (ERs) of the Regulation (EU) 2018/1139 [i.6] Annex VIII, analysing keywords of these same essential requirements.

These keywords mainly address the phases of design, build, operation and maintenance of systems and constituents as well as specifically required qualities or attributes as defined in the ERs of Regulation (EU) 2018/1139 [i.6].

The A-SMGCS non-cooperative SMR sensor shall comply with the relevant Essential Requirements specified in Annex VIII of Regulation (EU) 2018/1139 [i.6] as defined and described in in Table A.3 to Table A.10. With the applicability determined in clause A.1 the traceability in this clause covers only Chapters 2.6 and 3 of Regulation (EU) 2018/1139.

NOTE: Table A.3 to Table A.10 are related only to those Essential Requirements covered by the present document as outlined in Table A.1 above.

Table A.3

2.6	<b>ER 2.6 Surveillance services</b>		
	Regulation (EU) 2018/1139 [i.6] requires in Annex VIII, chapter 2.6, first paragraph, that: " <i>Surveillance services shall determine the respective position of aircraft in the air and of other aircraft and ground vehicles on the aerodrome surface, with sufficient performance with regard to their accuracy, integrity, legitimacy of the source, continuity and probability of detection.</i> "		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
2.6.1	accuracy	The present document does not give presumption of conformity	
2.6.2	integrity	The present document does not give presumption of conformity	
2.6.3	legitimacy of source	ED-87D [3], clause 2.1.2.1	
2.6.4	continuity	The present document does not give presumption of conformity	
2.6.5	probability of detection	The present document does not give presumption of conformity	

Table A.4

3.1	<b>ER 3.1 Fit for purpose</b>		
	Regulation (EU) 2018/1139 [i.6] requires in Annex VIII, chapter 3.1, first paragraph, that: " <i>ATM/ANS systems and ATM/ANS constituents providing related information to and from the aircraft and on the ground shall be properly designed, produced, installed, maintained, protected against unauthorised interference and operated to ensure that they are fit for their intended purpose.</i> "		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
3.1.1	properly designed	ED-116 [2], clause 2.8 ED-87D [3], clause 2.1.2.1 ED-116 [2], clause 2.3 ED-116 [2], clause 2.11 second paragraph ED-87D [3], clause 2.1.2.1	
3.1.2	produced	ED-116 [2], clauses 5.3 and 5.4 ED-116 [2], clause 6.4 ED-116 [2], clauses 5.2 and 5.4	
3.1.3	installed	ED-116 [2], clause 2.8	
3.1.4	maintained	ED-116 [2], clause 2.21	
3.1.5	protected against unauthorised interference	ED-116 [2], clause 2.3

## B.2 Interoperability Regulation Annex II Essential Requirements; Part A: General requirements

The purpose of the present annex is to provide a comprehensive traceability of evidence on constituents and system levels against clauses of the general Essential Requirements (ERs) of the Interoperability Regulation [i.1] as amended by Regulation (EC) 1070/2009 [i.5], analysing keywords of these same essential requirements.

These keywords mainly address the phases of design, build, operation and maintenance of systems and constituents as well as specifically required qualities or attributes as defined in the ERs of the Interoperability Regulation [i.1].

NOTE: Whenever "n/a" is used, that means that a given ER and/or an associated "keyword" is not applicable for presumption of conformity.

**Table B.3**

1	<b>ER 1 seamless operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Air traffic management systems and their constituents shall be designed, built, maintained and operated using the appropriate and validated procedures, in such a way as to ensure the seamless operation of the EATMN at all times and for all phases of flight. Seamless operation can be expressed, in particular, in terms of information sharing, including the relevant operational status information, common understanding of information, comparable processing performances and the associated procedures enabling common operational performances agreed for the whole or parts of the EATMN."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>

Table B.4

2	<b>ER 2 Support for new concepts of operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 requires that: <i>"The EATMN, its systems and their constituents shall support, on a coordinated basis, new agreed and validated concepts of operation that improve the quality, sustainability and effectiveness of air navigation services, in particular in terms of safety and capacity. The potential of new concepts, such as collaborative decision-making, increasing automation and alternative methods of delegation of separation responsibility, shall be examined taking due account of technological developments and of their safe implementation, following validation."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
2.1	Validated concepts of operation - safety	Operation is only applicable at the system level	The present document does not give presumption of conformity
2.2	Validated concepts of operation - capacity	Operation is only applicable at the system level	The present document does not give presumption of conformity
2.3	Validated concepts of operation - quality	Operation is only applicable at the system level	The present document does not give presumption of conformity

Table B.5

3	<b>ER 3 Safety</b>			
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Systems and operations of the EATMN shall achieve agreed high levels of safety. Agreed safety management and reporting methodologies shall be established to achieve this. In respect of appropriate ground-based systems, or parts thereof, these high levels of safety shall be enhanced by safety nets which shall be subject to agreed common performance characteristics. A harmonized set of safety requirements for the design, implementation, maintenance and operation of systems and their constituents, both for normal and degraded modes of operation, shall be defined with a view to achieving the agreed safety levels, for all phases of flight and for the entire EATMN. Systems shall be designed, built, maintained and operated, using the appropriate and validated procedures, in such a way that the tasks assigned to the control staff are compatible with human capabilities, in both the normal and degraded modes of operation, and are consistent with required safety levels. Systems shall be designed, built, maintained and operated using the appropriate and validated procedures, in such a way as to be free from harmful interference in their normal operational environment."</i>			
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>	<b>Evidence at procedure level</b>

## B.3 Interoperability Regulation, Annex II Essential Requirements, Part B: Specific requirements

### B.3.0 Introduction

The purpose of the present annex is to provide a comprehensive traceability of evidence on constituents and system levels against clauses of the specific Essential Requirements (ERs) of the Interoperability Regulation [i.1] as amended by Regulation (EC) 1070/2009 [i.5], analysing keywords of these same essential requirements.

These keywords mainly address the phases of design, build, operation and maintenance of systems and constituents as well as specifically required qualities or attributes as defined in the ERs of the Interoperability Regulation [i.1].

NOTE: Whenever "n/a" is used, that means that a given ER and/or an associated "keyword" is not applicable for presumption of conformity.

### B.3.1 Systems and procedures for airspace management

Table B.10

1.1	<b>ER B 1.1 Seamless operation</b>			
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Information relating to pre-tactical and tactical aspects of airspace availability shall be provided to all interested parties in a correct and timely way so as to ensure an efficient allocation and use of airspace by all airspace users. This should take into account national security requirements."</i>			
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>	<b>Evidence at procedure level</b>
1.1.1	Pre-tactical aspects of airspace availability	n/a	The present document does not give presumption of conformity	The present document does not give presumption of conformity

2.1.3	Tactical	n/a	The present document does not give presumption of conformity	The present document does not give presumption of conformity

## B.3.3 Systems and procedures for air traffic services

### B.3.3.1 Flight data processing systems

**Table B.12**

3.1.1	<b>ER B 3.1.1 Seamless operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Flight data processing systems shall be interoperable in terms of the timely sharing of correct and consistent information, and a common operational understanding of that information, in order to ensure a coherent and consistent planning process and resource-efficient tactical coordination throughout the EATMN during all phases of flight. In order to ensure safe, smooth and expeditious processing throughout the EATMN, flight data processing performances shall be equivalent and appropriate for a given environment (surface, terminal manoeuvring area (TMA), en-route), with known traffic characteristics and exploited under an agreed and validated operational concept, in particular in terms of accuracy and error tolerance of processing results."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
3.1.1.1	Timely sharing	n/a	The present document does not give presumption of conformity
3.1.1.2	Performance appropriate for environment	n/a	The present document does not give presumption of conformity
3.1.1.3	Accuracy and error tolerance	n/a	The present document does not give presumption of conformity

Table B.13

3.1.2	<b>ER B 3.1.2. Support for new concepts of operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: " <i>Flight data processing systems shall accommodate the progressive implementation of advanced, agreed and validated concepts of operation for all phases of flight, in particular as envisaged in the ATM MasterPlan. The characteristics of automation-intensive tools must be such as to enable coherent and efficient pre-tactical and tactical processing of flight information in parts of the EATMN. Airborne and ground systems and their constituents supporting new, agreed and validated concepts of operation shall be designed, built, maintained and operated, using appropriate and validated procedures, in such a way as to be interoperable in terms of timely sharing of correct and consistent information and a common understanding of the current and predicted operational situation.</i> "		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
3.1.2.1	Airborne systems - design	The present document does not give presumption of conformity	The present document does not give presumption of conformity
3.1.2.2	Airborne systems - built	The present document does not give presumption of conformity	The present document does not give presumption of conformity
3.1.2.3	Airborne systems - maintained	The present document does not give presumption of conformity	The present document does not give presumption of conformity
3.1.2.4	Airborne systems - operated	The present document does not give presumption of conformity	The present document does not give presumption of conformity
3.1.2.5	Ground systems - design	The present document does not give presumption of conformity	The present document does not give presumption of conformity
3.1.2.6	Ground systems - built	The present document does not give presumption of conformity	The present document does not give presumption of conformity
3.1.2.7	Ground systems - maintained	The present document does not give presumption of conformity	The present document does not give presumption of conformity
3.1.2.8	Ground systems - operated	The present document does not give presumption of conformity	The present document does not give presumption of conformity

### B.3.3.2 Surveillance data processing systems

Table B.14

3.2.1	<b>ER B 3.2.1 Seamless operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: " <i>Surveillance data processing systems shall be designed, built, maintained and operated using the appropriate and validated procedures, in such a way as to provide the required performance and quality of service within a given environment (surface, TMA, en-route) with known traffic characteristics, in particular in terms of accuracy and reliability of computed results, correctness, integrity, availability, continuity and timeliness of information at the control position. Surveillance data processing systems shall accommodate the timely sharing of relevant, accurate, consistent and coherent information between them to ensure optimized operations through different parts of the EATMN.</i> "		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
3.2.1.1	Designed	n/a	The present document does not give presumption of conformity
3.2.1.2	Built	n/a	The present document does not give presumption of conformity
3.2.1.3	Maintained	n/a	The present document does not give presumption of conformity
3.2.1.4	Operated	n/a	The present document does not give presumption of conformity

Table B.15

4.1.4	Operated	n/a	The present document does not give presumption of conformity
4.1.5	Quality of service, coverage, redundancy	n/a	The present document does not give presumption of conformity

Table B.19

4.2	<b>ER B 4.2 Support for new concepts of operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Communication systems shall support the implementation of advanced, agreed and validated concepts of operation for all phases of flight, in particular as envisaged in the ATM MasterPlan."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
4.2.1	Support the implementation	n/a	The present document does not give presumption of conformity

### B.3.5 Navigation systems and procedures

Table B.20

5.1	<b>ER B 5.1 Seamless operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Navigation systems shall be designed, built, maintained and operated using appropriate and validated procedures in such a way as to achieve the required horizontal and vertical navigation performance, in particular in terms of accuracy and functional capability, for a given environment (surface, TMA, en-route), with known traffic characteristics and exploited under an agreed and validated operational concept."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
5.1.1	Designed	n/a	The present document does not give presumption of conformity
5.1.2	Built	n/a	The present document does not give presumption of conformity
5.1.3	Maintained	n/a	The present document does not give presumption of conformity
5.1.4	Operated	n/a	The present document does not give presumption of conformity

### B.3.6 Surveillance systems and procedures

Table B.21

6.1	<b>ER B 6.1 Seamless operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Surveillance systems shall be designed, built, maintained and operated using appropriate and validated procedures in such a way as to provide the required performance applicable in a given environment (surface, TMA, en-route) with known traffic characteristics and exploited under an agreed and validated operational concept, in particular in terms of accuracy, coverage, range and quality of service.</i> <i>The surveillance network within the EATMN shall be such as to meet the requirements of accuracy, timeliness, coverage and redundancy. The surveillance network shall enable surveillance data to be shared in order to enhance operations throughout the EATMN."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
6.1.1	Designed	n/a	The present document does not give presumption of conformity
6.1.2	Built	n/a	The present document does not give presumption of conformity
6.1.3	Maintained	n/a	The present document does not give presumption of conformity
6.1.4	Operated	n/a	The present document does not give presumption of conformity
6.1.5	Information Sharing	n/a	The present document does not give presumption of conformity

### B.3.7 Systems and procedures for aeronautical information services

Table B.22

7.1	<b>ER B 7.1 Seamless operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Accurate, timely and consistent aeronautical information shall be provided progressively in an electronic form, based on a commonly agreed and standardized data set.</i> <i>Accurate and consistent aeronautical information, in particular concerning airborne and ground-based constituents or systems, shall be made available in a timely manner."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
7.1.1	Accurate, timely and consistent	n/a	The present document does not give presumption of conformity
7.1.2	Standardized data set	n/a	The present document does not give presumption of conformity

Table B.23

7.2	<b>ER B 7.2 Support for new concepts of operation</b>		
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Increasingly accurate, complete and up-to-date aeronautical information shall be made available and used in a timely manner in order to support continuous improvement of the efficiency of airspace and airport use."</i>		
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>
7.2.1	Increasingly accurate, complete and up-to-date	n/a	The present document does not give presumption of conformity

### B.3.8 Systems and procedures for the use of meteorological information

**Table B.24**

8.1	<b>ER B 8.1 Seamless operation</b>			
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Systems and procedures for the use of meteorological information shall improve the consistency and timeliness of its provision and the quality of its presentation, using an agreed data set."</i>			
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>	<b>Evidence at procedure level</b>
8.1.1	Consistency and timeliness	n/a	The present document does not give presumption of conformity	The present document does not give presumption of conformity

**Table B.25**

8.2	<b>ER B 8.2 Support for new concepts of operation</b>			
	Regulation (EC) 552/2004 [i.1] as amended by Regulation (EC) 1070/2009 [i.5] requires that: <i>"Systems and procedures for the use of meteorological information shall improve the promptness of its availability and the speed with which it may be used, in order to support continuous improvement of the efficiency of airspace and airport use."</i>			
	<b>Keywords</b>	<b>Evidence on constituent level</b>	<b>Evidence on system level</b>	<b>Evidence at procedure level</b>
8.2.1	Promptness, speed	n/a	The present document does not give presumption of conformity	The present document does not give presumption of conformity
