## Foreword

ETSI Technical Reports (ETRs) are informative documents resulting from ETSI studies which are not appropriate for European Telecommunication Standard (ETS) or Interim-European Telecommunication Standard (I-ETS) status. An ETR may be used to publish material which is either of an informative nature, relating to the use or application of ETSs or I-ETSs, or which is immature and not yet suitable for formal adoption as an ETS or I-ETS.

This ETR has been produced by the Network Aspects (NA) Technical Committee of the European Telecommunications Standards Institute (ETSI). This ETR replaces ETR 008 (1990): "Network Aspects (NA); The method for the characterisation of the machine-machine interfaces utilised by a Telecommunications Management Network (TMN)", which shall be withdrawn by ETSI.

## Endorsement notice

The text of the CCITT Recommendation M.3020 (1992) was approved by ETSI Technical Committee NA as an ETSI Technical Report without any modification.
