

# CORRIGENDUM

**ETR 310**

October 1996

---

Source: ETSI TC-RES

Reference: DTR/RES-03077-C1

ICS: 33.020, 33.060.50

**Key words:** DECT, traffic

**This corrigendum modifies  
the ETSI Technical Report ETR 310 (August 1996)**

**Radio Equipment and Systems (RES);  
Digital Enhanced Cordless Telecommunications (DECT);  
Traffic capacity and spectrum requirements for multi-system  
and multi-service DECT applications co-existing in a  
common frequency band**

This corrigendum to ETR 310 (August 1996) corrects an error in subclause 10.4 of the document.

## **Amendment**

### **Subclause 10.4**

Modify the second paragraph of subclause 10.4 (after the note), as follows:

The intention is to restrict the maximum load from one antenna on the DECT spectrum in a specific geographical direction. This recommendation must **not** be used to limit economic infrastructure implementations, but as a tool for optimizing coexistence on the common DECT spectrum when required.
