

Augmented Reality Framework (ARF) Interoperability Requirements for AR components, systems and services; Part 1: Overview

Disclaimer

The present document has been produced and approved by the Augmented Reality Framework (ARF) ETSI Industry Specification Group (ISG) and represents the views of those members who participated in this ISG. It does not necessarily represent the views of the entire ETSI membership.

Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™** and **LTE™** are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

Foreword

This Group Report (GR) has been produced by ETSI Industry Specification Group (ISG) Augmented Reality Framework (ARF).

The present document is part 1 of a multi-part deliverable covering Interoperability Requirements for AR components, systems and services, as identified below:

- Part 1:** "Overview";
- Part 2: "World Storage and AR Authoring Functions";
- Part 3: "World Capture, World Analysis and Scene Management".

The ISG ARF shares the following understanding for Augmented Reality: Augmented Reality (AR) is the ability to mix in real-time spatially-registered digital content with the real world.

Modal verbs terminology

In the present document "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

1 Scope

The present document gives an overview of the multi-part deliverable GR/GS ARF 004 covering the interoperability requirements developed for some of the Reference Points specified in ETSI GS ARF 003 [i.1] AR Framework Architecture.

2 References

2.1 Normative references

Normative references are not applicable in the present document.

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

- [i.1] ETSI GS ARF 003 (V1.1.1): "Augmented Reality Framework (ARF) AR framework architecture".
- [i.2] ETSI GS ARF 004-2: "Augmented Reality Framework (ARF) Interoperability Requirements for AR components, systems and services; Part 2: World Storage and AR Authoring functions".
- [i.3] ETSI GS ARF 004-3: "Augmented Reality Framework (ARF) Interoperability Requirements for AR components, systems and services; Part 3: World Capture, World Analysis and Scene Management".

3 Definition of terms, symbols and abbreviations

3.1 Terms

For the purposes of the present document, the following terms apply:

Reference Point (RP): point located at the interface of two non-overlapping functions and representing interrelated interactions between those functions

3.2 Symbols

Void.

3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

AR	Augmented Reality
ISG	Industry Specification Group
RP	Reference Point

4 AR Interoperability Requirements

ETSI GS ARF 003 [i.1] defines a framework for AR components, systems and services. It introduces the characteristics of an AR system and describes the functional building blocks of the AR reference architecture and their mutual relationships. There are eleven logical functions in the AR functional reference architecture defined by ETSI GS ARF 003 [i.1]; each function is composed of two or more subfunctions. The logical functions are connected by Reference Points (RPs). Details for each of the eleven functions and their subfunctions are described in clause 5 of [i.1]. Details of each of the eighteen RPs are described in clause 6 of ETSI GS ARF 003 [i.1].

The present multi-part deliverable reviews the high-level requirements of some of the RPs identified in ETSI GS ARF 003 [i.1] and further specifies the requirements for interoperability of the related functions and subfunctions. Each part of the multi-part document covers one or a group of RPs. The different parts of this multi-part deliverable will be developed in the order of priorities as defined by the Industry Specification Group ARF based on the needs for interoperability at this RP and members' interest. At the time of publication, two parts have been developed; ETSI GS ARF 004-2 [i.2] covers the World Storage and AR Authoring functions and ETSI GS ARF 004-3 [i.3], the World Capture, World Analysis and Scene Management functions.

The ISG will publish additional parts describing RPs as prioritized by the group in the future, however not all RPs may be addressed.
