Foreword

This final draft amendment to 2nd edition of ETS 300 175-6 has been produced by the Digital Enhanced Cordless Telecommunications (DECT) Project of the European Telecommunications Standards Institute (ETSI), and is now submitted for the Voting phase of the ETSI standards approval procedure.

Proposed transposition dates	
Date of latest announcement of this amendment (doa):	3 months after ETSI publication
Date of latest publication or endorsement of this amendment (dop/e):	6 months after doa
Date of withdrawal of any conflicting National Standard (dow):	6 months after doa

Amendments

The following amendments are required to the 2nd edition of ETS 300 175-6 (1996) to allow for the use of temporary identifiers in location registration and call set-up.

Subclause 6.3.1

Modify the fifth paragraph of subclause 6.3.1, as follows:

The time limit may define a maximum valid lifetime of the assigned TPUI in units based on MAC layer multiframe. If a defined time limit is indicated, this time limit starts as soon as the identity is accepted and the PT shall erase the relevant TPUI if the time limit is exceeded. Where the time limit also applies to a location registration, the TPUI may be reused for the purposes of a new location registration to the same location area as described in ETS 300 175-5 [5], subclause 13.4.1 (as amended by ETS 300 175-5/A1).
