Foreword

This amendment to ETS 300 201 (1994) has been produced by the Network Aspects (NA) Technical Committee of the European Telecommunications Standards Institute (ETSI).

This amendment contains changes to one subclause of ETS 300 201 (1994) to clarify the interaction situation for the Call Forwarding No Reply (CFNR) supplementary service in relation to the call waiting supplementary service.

Transposition dates	
Date of adoption of this amendment:	6 September 1996
Date of latest announcement of this amendment (doa):	31 December 1996
Date of latest publication or endorsement of this amendment (dop/e):	30 June 1997
Date of withdrawal of any conflicting National Standard (dow):	30 June 1997

Amendments

Clause 7

Insert the following text in clause 7 (i.e. before note 1):

If there is a requirement from an ISDN user not to send a call waiting notification to a calling user, this requirement may not always be met, e.g. voice notification, if the calling user is outside the called user's ISDN.

Subclause 8.2

Insert 2 paragraphs after the first paragraph of subclause 8.2, as follows:

If user B has activated the CFNR supplementary service, then a waiting call shall still be offered. If the CFNR timer expires before an answer is received then the CFNR supplementary service shall be invoked and the call shall be forwarded and call waiting ceased.

If the forwarding user subscribes to the value "No" for the subscription option "Calling user receives notification that the call has been forwarded", no notification of call waiting shall be sent to the calling user from the forwarded-to user.

In case of multiple diversions, a notification of call waiting shall only be sent to the calling user if all diverting users allow notification that the call has been forwarded.

A forwarded call can invoke the call waiting supplementary service.
