Foreword

This second edition European Telecommunication Standard (ETS) has been produced by the Communication, Networks, and Systems Interconnection Technical Committee (TC32) of ECMA on behalf of its members and those of the European Telecommunications Standards Institute (ETSI).

This ETS is one of a series of standards defining services and signalling protocols applicable to Private Integrated Services Networks (PISN). The series uses the Integrated Services Digital Network (ISDN) concepts as developed by ITU-T and conforms to the framework of standards for Open Systems Interconnection (OSI) as defined by ISO/IEC.

This particular ETS specifies the QSIG protocol for use at the Q reference point in support of the Name Identification supplementary services. The QSIG protocol is known as "Private integrated Signalling System no. 1" (PSS1) in International Standards.

The Name Identification supplementary services are:

- Calling Name Identification Presentation (SS-CNIP); and
- Connected Name Identification Presentation (SS-CONP).

The previous (first) edition of this ETS contained a "standalone" definition of the protocol. This edition endorses an International Standard, ISO/IEC 13868, published since the publication of the first edition of this ETS.

Transposition dates	
Date of adoption of this ETS:	30 November 1995
Date of latest announcement of this ETS (doa):	28 February 1996
Date of latest publication of new National Standard or endorsement of this ETS (dop/e):	31 August 1996
Date of withdrawal of any conflicting National Standard (dow):	31 August 1996

Endorsement notice

The text of International Standard ISO/IEC 13868 (1995) was approved by ETSI as an ETS with agreed modifications as given below.

NOTE: New or modified text is indicated using sidebars. In addition, underlining and/or strike-out are used to highlight detailed modifications where necessary.

Clause 3

Replace the first paragraph by:

This ETS incorporates by dated and undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

Insert the following normative references at the end of clause 3:

- [12] ETS 300 171 (1992): "Private Telecommunication Network (PTN); Specification, functional models and information flows Control aspects of circuit mode basic services".
- [13] ETS 300 172 (1995): "Private Integrated Services Network (PISN); Inter-exchange signalling protocol Circuit-mode basic services" 3rd edition.
- [14] ETS 300 237 (1993): "Private Telecommunication Network (PTN); Specification, functional models and information flows Name Identification supplementary services".
- [15] ETS 300 239 (1995): "Private Integrated Services Network (PISN); Inter-exchange signalling protocol Generic functional protocol for the support of supplementary services" 2nd edition.
- [16] ETS 300 257 (1993): "Private Telecommunication Network (PTN); Inter-exchange signalling protocol Diversion supplementary services".
- [17] ETS 300 387 (1994): "Private Telecommunication Network (PTN); Method for the specification of basic and supplementary services".
- [18] ETS 300 475-1 (1995): "Private Integrated Services Network (PISN); Reference configuration Part 1: Reference configuration for PISN eXchanges (PINXs)".

Throughout the text of ISO/IEC 13868

Throughout the text of ISO/IEC 13868, replace references as shown in the table below:

Reference in ISO/IEC 13868	Modified reference
CCITT Recommendation I.130	ETS 300 387 [17]
ISO/IEC 11572	ETS 300 172 [13]
ISO/IEC 11574	ETS 300 171 [12]
ISO/IEC 11582	ETS 300 239 [15]
ISO/IEC 11579-1	ETS 300 475-1 [18]
ISO/IEC 13864	ETS 300 237 [14]
ISO/IEC 13873	ETS 300 257 [16]

Throughout the text of ISO/IEC 13868

Throughout the text of ISO/IEC 13868, replace the term "International Standard" by "ETS".
