## Foreword

This European Telecommunication Standard (ETS) has been produced by the Signalling Protocols and Switching (SPS) Technical Committee of the European Telecommunications Standards Institute (ETSI).

This ETS is part 2 of a multi-part standard as described below:

Part 1: "Q3 interface specification at the Local Exchange (LE) for configuration management of V5 interfaces and associated customer profiles";

Part 2: **"Managed Object Conformance Statement (MOCS) proforma specification";**

The following standards are directly related to this ETS:

ETS 300 376: "Q3 interface at the Access Network (AN) for configuration management of V5 interfaces and associated user ports";

ETS 300 378: "Q3 interface at the Access Network (AN) for fault and performance management of V5 interfaces and associated user ports";

ETS 300 379: "Q3 interface at the Local Exchange (LE) for fault and performance management of V5 interfaces and associated customer profiles".

Transposition dates	
Date of adoption of this ETS:	17 November 1995
Date of latest announcement of this ETS (doa):	28 February 1996
Date of latest publication of new National Standard or endorsement of this ETS (dop/e):	31 August 1996
Date of withdrawal of any conflicting National Standard (dow):	31 August 1996

## Introduction

The purpose of this Managed Object Conformance Statement (MOCS) proforma is to provide a mechanism for a supplier of an implementation of a recommendation/standard which claims conformance to a managed object class to provide conformance information, including management information, in a standard form.

Blank page

## 1 Scope

This second part of ETS 300 377 provides the Managed Object Conformance Statement (MOCS) proforma for the base standard ETS 300 377-1 [1]. It identifies the mandatory, conditional and optional elements of the information model specified in ETS 300 377-1 [1].

## 2 Normative references

This ETS incorporates by dated and undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

- [1] ETS 300 377-1 (1994): "Signalling Protocols and Switching (SPS); Q3 interface at the Local Exchange (LE) for configuration management of V5 interfaces and associated customer profiles; Part 1: Q3 interface specification".
- [2] ETS 300 324-2 (1994): "Signalling Protocols and Switching (SPS); V interfaces at the digital Local Exchange (LE); V5.1 interface for the support of Access Network (AN); Part 2: Protocol Implementation Conformance Statements (PICS) proforma".
- [3] ETS 300 347-2 (1994): "Signalling Protocols and Switching (SPS); V interfaces at the digital Local Exchange (LE); V5.2 interface for the support of Access Network (AN); Part 2: Protocol Implementation Conformance Statements (PICS) proforma".
- [4] ISO/IEC 9646-7: "Information technology - Open systems interconnection - Conformance testing methodology and framework - Part 7: Implementation Conformance Statements".

## 3 Definitions, symbols and abbreviations

### 3.1 Definitions

For the purposes of this ETS, the following definitions apply:

**configuration management:** Each object class contains packages supporting creation, deletion and modification of instances of that object class. This is referred to as configuration management. In some cases, these packages are conditional.

**fault management:** Some object classes contain packages, in addition to those specified for configuration management, supporting fault reporting, logging, etc. This is referred to as fault management. Typically, these packages are conditional.

**performance management:** Some object classes contain packages, in addition to those specified for configuration management, supporting traffic measurements, reports when thresholds are exceeded, etc. This is referred to as performance management. Typically, these packages are conditional.

### 3.2 Symbols

The following common notation is used for the tables in this ETS:

- a first part of a table row
- b second part of a table row
- c third part of a table row

The following common notation, defined in ISO/IEC 9646-7 [4], is used for the "Status" column:

c	conditional
m	mandatory
o	optional
x	prohibited
-	not applicable

The following common notation, defined in ISO/IEC 9646-7 [4], is used for the "Support" column:

Ig	the item is ignored (i.e., processed syntactically but not semantically)
N	not implemented
Y	implemented
-	not applicable

The following symbolic abbreviations are used throughout the proforma tables:

v5Q(LE)-nb	ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) nameBinding(6)
v5Q(LE)-pkg	ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) package(4)

m3100-pkg	ccitt recommendation m gnm(3100) informationModel(0) package(4)
m3100-att	ccitt recommendation m gnm(3100) informationModel(0) attribute(7)

### **3.3 Abbreviations**

For the purposes of this ETS, the following abbreviations apply:

AN	Access Network
LE	Local Exchange
MOCS	Managed Object Conformance Statement
TMN	Telecommunication Network Management

## 4 Statements of conformance

Notwithstanding the provisions of the copyright Clause related to the text of this ETS, ETSI grants that users of this ETS may freely reproduce the MOCS proforma in this clause so that it can be used for its intended purposes and may further publish the completed MOCS.

### 4.1 Statement of conformance to managed object class v5Interface

**Table 1: Object class support**

Index	Managed object class template label	Value of OBJECT IDENTIFIER for the class	Status	Support
1.1	v5Interface	{ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) managedObjectClass(3) 1}	m	

The supplier of the implementation shall state whether or not all mandatory features of the object listed above are supported in table 2.

**Table 2: Feature support**

Index	Sub-Index		Support
2.1	2.1.1	Is configuration management supported?	
	2.1.2	Are all mandatory features for configuration management supported?	
2.2	2.2.1	Is fault management supported?	
	2.2.2	Are all mandatory features for fault management supported?	

#### 4.1.1 Name bindings

The supplier of the implementation shall state which name bindings of the managed object class are supported, in the "Support" and "Additional information" columns of table 3.

**Table 3: Name binding support**

Index	Name binding template label	Value of OBJECT IDENTIFIER	Superior object class template label	Status	Support
3.1a	v5Interface - managedElement	{v5Q(LE)-nb 1}	managedElement AND SUBCLASSES	m	

**Table 3 (concluded): Name binding support**

Index	Status		Support		Additional information
	Object creation	Object deletion	Object creation	Object deletion	
3.1b	c	c			

c: if 2.1.1 then m else -.

#### 4.1.2 Packages

The supplier of the implementation shall state whether or not the packages specified by this managed object of this class are supported, in table 4.

Packages of superclasses which are not applicable are listed in the package support table only. The associated attributes, actions and notifications are not mentioned in the following tables.

**Table 4: Package support**

Index	Package label	Value of OBJECT IDENTIFIER	Status	Support
4.1	peerManagedElementPackage	{v5Q(LE)-pkg 5}	o	
4.2	supportedByObjectListPackage	{v5Q(LE)-pkg 7}	c1	
4.3	relationshipChangeNotificationPackage	{v5Q(LE)-pkg 6}	o	
4.4	commonDeleteBehaviourPackage	{v5Q(LE)-pkg 2}	m	
4.5	operationalStatePackage	{m3100-pkg 19}	o	
4.6	v5availabilityStatusPackage	{smi2-pkg 22}	o	
4.7	userLabelPackage	{m3100-pkg 32}	o	
4.8	locationNamePackage	{m3100-pkg 17}	o	
4.9	objectManagementNotificationsPackage	{m3100-pkg 20}	o	
4.10	stateChangeNotificationsPackage	{m3100-pkg 28}	o	
4.11	trmnCommunicationsAlarmInformationPackage	{m3100-pkg 30}	c2	
4.12	alarmSeverityAssignmentPointerPackage	{m3100-pkg 3}	c2	
4.13	packagesPackage	{smi2-pkg 16}	m	
4.14	allomorphicPackage	{smi2-pkg 17}	o	

c1: if the information model is not only used for provisioning then m else -.  
 c2: if 2.2.1 then m else -.

#### 4.1.3 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all the packages instantiated in a managed object class definition are supported, in the "Support" and "Additional information" columns of table 5. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

**Table 5: Attribute support**

Index	Attribute template label	Value of OBJECT IDENTIFIER	Status	Support
5.1a	v5InterfaceId	{v5Q(LE)-att 34}	m	
5.2a	peerManagedElementId	{v5Q(LE)-att 25}	c1	
5.3a	supportedProtocolVersion	{v5Q(LE)-att 31}	m	
5.4a	serverV5Ttps	{v5Q(LE)-att 30}	m	
5.5a	clientUserPorts	{v5Q(LE)-att 14}	m	
5.6a	operationalState	{smi2-att 35}	c2	
5.7a	availabilityStatus	{smi2-att 33}	c3	
5.8a	supportedByObjectList	{m3100-att 40}	c4	
5.9a	userLabel	{m3100-att 50}	c5	
5.10a	locationName	{m3100-att 27}	c6	
5.11a	objectClass	{smi2-att 65}	m	
5.12a	nameBinding	{smi2-att 63}	m	
5.13a	packages	{smi2-att 66}	m	
5.14a	allomorphs	{smi2-att 50}	c7	

c1: if 4.1 then m else -.      c4: if 4.2 then m else -.      c7: if 4.14 then m else -.  
 c2: if 4.5 then m else -.      c5: if 4.7 then m else -.  
 c3: if 4.6 then m else -.      c6: if 4.8 then m else -.

**Table 5 (continued): Attribute support**

Index	Status						
	SetByCreate	Get	Replace	Add	Remove	SetToDefault

#### 4.1.4 Attribute groups

There are no attribute groups specified for this managed object class.

#### 4.1.5 Actions

The supplier of the implementation shall state whether or not the actions specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns of table 6. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 6: Action support**

Index	Action type template label	Value of action type identifier	Status	Support	Additional information
6.1	setReciprocalPointer	{v5Q(LE)-act 1}	m		
6.2	releaseReciprocalPointer	{v5Q(LE)-act 2}	m		
6.3	restart	{v5Q(LE)-act 14}	m		
6.4	systemStartup	{v5Q(LE)-act 16}	m		

#### 4.1.6 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns of table 7. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 7: Notification support**

Index	Notification type template label	Value of notification type identifier	Status	Support		Additional information
				Confirmed	Non-confirmed	
7.1a	objectCreation	{smi2-not 6}	c1			
7.2a	objectDeletion	{smi2-not 7}	c1			
7.3a	attributeValueChange	{smi2-not 1}	c1			
7.4a	stateChange	{smi2-not 14}	c2			
7.5a	relationshipChange	{smi2-not 12}	c3			
7.6a	restartResult	{v5Q(LE)-not 11}	m			
7.7a	systemStartupResult	{v5Q(LE)-not 12}	m			
c1: if 4.9 then m else -.		c2 if 4.10 then m else -.		c3 if 4.3 then m else -.

	7.5.7	additionalInformation	{smi2-att 6}	o		

#### 4.1.7 Parameters

There are no parameters specified for the configuration management in this managed object class.

#### 4.2 Statement of conformance to managed object class v5Ttp

**Table 8: Object class support**

Index	Managed object class template label	Value of OBJECT IDENTIFIER for the class	Status	Support
8.1	v5Ttp	{ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) managedObjectClass(3) 2}	m	

The supplier of the implementation shall state whether or not all mandatory features of the object listed above are supported in table 9.

**Table 9: Feature support**

Index	Sub-Index		Support
9.1	9.1.1	Is configuration management supported?	
	9.1.2	Are all mandatory features for configuration management supported?	
9.2	9.2.1	Is fault management supported?	
	9.2.2	Are all mandatory features for fault management supported?	

#### 4.2.1 Name bindings

The supplier of the implementation shall state which name bindings of the managed object class are supported, in the "Support" and "Additional information" columns of table 10.

**Table 10: Name binding support**

Index	Name binding template label	Value of OBJECT IDENTIFIER	Superior object class template label	Status	Support
10.1a	v5Ttp - managedElement	{v5Q(LE)-nb 2}	managedElement AND SUBCLASSES	m	

**Table 10 (concluded): Name binding support**

Index	Status		Support		Additional information
	Object creation	Object deletion	Object creation	Object deletion	
10.1b	c	c			
c:	if 9.1.1 then m else - .				

#### 4.2.2 Packages

The supplier of the implementation shall state whether or not the packages specified by this managed object of this class are supported, in table 11.

Packages of superclasses which are not applicable are listed in the package support table only. The associated attributes, actions and notifications are not mentioned in the following tables.

**Table 11: Package support**

Index	Package label	Value of OBJECT IDENTIFIER	Status	Support
11.1	neSpecificPointerPackage	{v5Q(LE)-pkg 4}	o	
11.2	v5AvailabilityStatusPackage	{v5Q(LE)-pkg 8}	o	
11.3	commonDeleteBehaviourPackage	{v5Q(LE)-pkg 2}	m	
11.4	operationalStatePackage	{m3100-pkg 19}	m	
11.5	administrativeStatePackage	{smi2-pkg 14}	m	
11.6	supportableClientListPackage	{m3100-pkg 27}	o	
11.7	ttplInstancePackage	{m3100-pkg 31}	m

11.9	stateChangeNotificationPackage	{m3100-pkg 28}	o	
11.10	attributeValueChangeNotificationPackage	{m3100-pkg 4}	o	
11.11	crossConnectionPointerPackage	{m3100-pkg 11}	-	
11.12	characteristicInformationPackage	{m3100-pkg 7}	o	
11.13	networkLevelPackage	{m3100-pkg 18}	-	
11.14	tmnCommunicationsAlarmInformationPackage	{m3100-pkg 30}	c	
11.15	alarmSeverityAssignmentPointerPackage	{m3100-pkg 3}	c	
11.16	packagesPackage	{smi2-pkg 16}	m	
11.17	allomorphicPackage	{smi2-pkg 17}	o	
c:	if 9.2.1 then m else - .			

#### 4.2.3 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all the packages instantiated in a managed object class definition are supported, in the "Support" and "Additional information" columns of table 12. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

**Table 12: Attribute support**

Index	Attribute template label	Value of OBJECT IDENTIFIER	Status	Support
12.1a	assocV5Interface	{v5Q(LE)-att 8}	m

#### 4.2.4 Attribute groups

There are no attribute groups specified for this managed object class.

#### 4.2.5 Actions

The supplier of the implementation shall state whether or not the actions specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns of table 13. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 13: Action support**

Index	Action type template label	Value of action type identifier	Status	Support	Additional information
13.1	checkLinkId	{v5Q(LE)-act 13}	c		
c:	if v5.2 then m else -.				

#### 4.2.6 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns of table 14. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 14: Notification support**

Index	Notification type template label	Value of notification type identifier	Status	Support		Additional information
				Confirmed	Non-confirmed

27.4a	verifyRemoteProv VariantResult	{v5Q(LE)-not 7}	m			
27.5a	requestRemoteProv VariantResult	{v5Q(LE)-not 9}	m			

#### 4.4.7 Parameters

There are no parameters specified for this managed object class.

#### 4.5 Statement of conformance to managed object class commChannel

**Table 28: Object class support**

Index	Managed object class template label	Value of OBJECT IDENTIFIER for the class	Status	Support
28.1	commChannel	{ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) managedObjectClass(3) 11}	m	

The supplier of the implementation shall state whether or not all mandatory features of the object listed above are supported in table 29.

**Table 29: Feature support**

Index	Sub-Index		Support
29.1	29.1.1	Is configuration management supported?	
	29.1.2	Are all mandatory features for configuration management supported?	

#### 4.5.1 Name bindings

The supplier of the implementation shall state which name bindings of the managed object class are supported, in the "Support" and "Additional information" columns of table 30.

**Table 30: Name binding support**

Index	Name binding template label	Value of OBJECT IDENTIFIER	Superior object class template label	Status	Support
30.1a	commChannel - v5Interface	{v5Q(LE)-nb 7}	v5Interface	m	

**Table 30 (concluded): Name binding support**

Index	Status		Support		Additional information
	Object creation	Object deletion	Object creation	Object deletion	
30.1b	c	c			
c: if 29.1.1 then m else -.					

#### 4.5.2 Packages

The supplier of the implementation shall state whether or not the packages specified by this managed object of this class are supported, in table 31.

Packages of superclasses which are not applicable are listed in the package support table only. The associated attributes, actions and notifications are not mentioned in the following tables.

**Table 31: Package support**

Index	Package label	Value of OBJECT IDENTIFIER	Status	Support
31.1	operationalStatePackage	{m3100-pkg 19}	m	
31.2	commonDeleteBehaviourPackage	{v5Q(LE)-pkg 2}	m	
31.3	supportedByObjectListPackage	{v5Q(LE)-pkg 4}	c	
31.4	packagesPackage	{smi2-pkg 16}	m	
31.5	allomorphicPackage	{smi2-pkg 17}	o	
c:	if the information model is not only used for provisioning then m else -.			

#### 4.5.3 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all the packages instantiated in a managed object class definition are supported, in the "Support" and "Additional information" columns of table 32. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

**Table 32: Attribute support**

Index	Attribute template label	Value of OBJECT IDENTIFIER	Status	Support
32.1a	commChannelId	{v5Q(LE)-att 15}	m	
32.2a	assocV5TimeSlot	{v5Q(LE)-att 9}	m	
32.3a	assocV5CommPaths	{v5Q(LE)-att 7}	m	
32.4a	operationalState	{smi2-att 35}	m	
32.5a	supportedByObjectList	{m3100-att 40}	c1	
32.6a	objectClass	{smi2-att 65}	m	
32.7a	nameBinding	{smi2-att 63}	m	
32.8a	packages	{smi2-att 66}	c2	
32.9a	allomorphs	{smi2-att 50}	c3	
c1:	if 31.3 then m else -.			
c2:	if 31.4 then m else -.			
c3:	if 31.5 then m else -.			

**Table 32 (continued): Attribute support**

Index	Status

#### 4.5.4 Attribute groups

There are no attribute groups specified for this managed object class.

#### 4.5.5 Actions

There are no actions specified for this managed object class.

#### 4.5.6 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns of table 33. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 33: Notification support**

Index	Notification type template label	Value of notification type identifier	Status	Support		Additional information
				Confirmed	Non-confirmed	
33.1a	objectCreation	{smi2-not 6}	m

60.1b	c	c			
c: if 59.1.1 then m else -.					

#### **4.10.2 Packages**

The supplier of the implementation shall state whether or not the packages specified by this managed object of this class are supported, in table 61.

Packages of superclasses which are not applicable are listed in the package support table only. The associated attributes, actions and notifications are not mentioned in the following tables.

**Table 61: Package support**

<b>Index</b>	<b>Package label</b>	<b>Value of OBJECT IDENTIFIER</b>	<b>Status</b>	<b>Support</b>
61.1	supportedByObjectListPackage	{v5Q(LE)-pkg 7}	c1	
61.2	packagesPackage	{smi2-pkg 16}	c2	
61.3	allomorphicPackage	{smi2-pkg 17}	o	
61.4	commonDeleteBehaviourPackage	{v5Q(LE)-pkg 2}	m	
c1: if the information model is not only used for provisioning then m else -.				
c2: if 61.1 or 61.3 then m else -.				

#### **4.10.3 Attributes**

The supplier of the implementation shall state whether or not the attributes specified by all the packages instantiated in a managed object class definition are supported, in the "Support" and "Additional information" columns of table 62. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

**Table 62: Attribute support**

Index	Attribute template label	Value of OBJECT IDENTIFIER	Status	Support
62.1a	commPathId	{v5Q(LE)-att 16}	m	
62.2a	assocCommChannel	{v5Q(LE)-att 1}	m

#### 4.14.4 Attribute groups

There are no attribute groups specified for this managed object class.

#### 4.14.5 Actions

There are no actions specified for this managed object class.

#### 4.14.6 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns of table 87. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 87: Notification support**

Index	Notification type template label	Value of notification type identifier	Status	Support		Additional information
				Confirmed	Non-confirmed	
87.1a	objectCreation	{smi2-not 6}	c1			
87.2a	objectDeletion	{smi2-not 7}	c1			
87.3a	attributeValueChange	{smi2-not 1}	c2			
87.4a	stateChange	{smi2-not 14}	c3

#### 4.16.4 Attribute groups

There are no attribute groups specified for this managed object class.

#### 4.16.5 Actions

There are no actions specified for this managed object class.

#### 4.16.6 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns of table 99. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 99: Notification support**

Index	Notification type template label	Value of notification type identifier	Status	Support		Additional information
				Confirmed	Non-confirmed	
99.1a	objectCreation	{smi2-not 6}	c1			
99.2a	objectDeletion	{smi2-not 7}	c1			
99.3a	attributeValueChange	{smi2-not 1}	c2			
99.4a	stateChange	{smi2-not 14}	c3			
99.5a	relationshipChange	{smi2-not 12}	m			
c1:	if 97.7 then m else -.					
c2:	if 97.8 then m else -.					
c3:	if 97.9 then m else -.

#### 4.16.7 Parameters

There are no parameters specified for the configuration management in this managed object class.

#### 4.17 Statement of conformance to managed object class virtualAnalogueAccess

**Table 100: Object class support**

Index	Managed object class template label	Value of OBJECT IDENTIFIER for the class	Status	Support
100.1	virtualAnalogueAccess	{ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) managedObjectClass(3) 6}	c	
c: if ETS 300 324-2 [2] M2 or ETS 300 347-2 [3] M2 then m else -.				

The supplier of the implementation shall state whether or not all mandatory features of the object listed above are supported in table 101.

**Table 101: Feature support**

Index	Sub-Index		Support
101.1	101.1.1	Is configuration management supported?	
	101.1.2	Are all mandatory features for configuration management supported?	
101.2	101.2.1	Is fault management supported?	
	101.2.2	Are all mandatory features for fault management supported?	

#### 4.17.1 Name bindings

The supplier of the implementation shall state which name bindings of the managed object class are supported, in the "Support" and "Additional information" columns of table 102.

**Table 102: Name binding support**

Index	Name binding template label	Value of OBJECT IDENTIFIER	Superior object class template label	Status	Support
102.1a	virtualAccessPort - managedElement	{v5Q(LE)-nb 5}	managedElement AND SUBCLASSES	m	

**Table 102 (concluded): Name binding support**

Index	Status		Support		Additional information
	Object creation	Object deletion	Object creation	Object deletion	
102.1b	c	c			
c: if 101.1.1 then m else -.					

#### 4.17.2 Packages

The supplier of the implementation shall state whether or not the packages specified by this managed object of this class are supported, in table 103.

Packages of superclasses which are not applicable are listed in the package support table only. The associated attributes, actions and notifications are not mentioned in the following tables.

**Table 103: Package support**

<b>Index</b>	<b>Package label</b>	<b>Value of OBJECT IDENTIFIER</b>	<b>Status</b>	<b>Support</b>
103.1	operationalStatePackage	{m3100-pkg 19}	m

#### 4.17.3 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all the packages instantiated in a managed object class definition are supported, in the "Support" and "Additional information" columns of table 104. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

**Table 104: Attribute support**

<b>Index</b>	<b>Attribute template label</b>	<b>Value of OBJECT IDENTIFIER</b>	<b>Status</b>	<b>Support</b>
104.1a	layer3PortAddress	{v5q(LE)-att 20}	m

#### 4.18.7 Parameters

There are no parameters specified for the configuration management in this managed object class.

#### 4.19 Statement of conformance to managed object class v5BearerChannelReservation

**Table 112: Object class support**

Index	Managed object class template label	Value of OBJECT IDENTIFIER for the class	Status	Support
112.1	v5BearerChannelReservation	{ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) managedObjectClass(3) 21}	c	
c: if ETS 300 347-2 [3] N33 then m else -.				

The supplier of the implementation shall state whether or not all mandatory features of the object listed above are supported in table 113.

**Table 113: Feature support**

Index	Sub-Index		Support
113.1	113.1.1	Is configuration management supported?	
	113.1.2	Are all mandatory features for configuration management supported?	

#### 4.19.1 Name bindings

The supplier of the implementation shall state which name bindings of the managed object class are supported, in the "Support" and "Additional information" columns of table 114.

**Table 114: Name binding support**

Index	Name binding template label	Value of OBJECT IDENTIFIER	Superior object class template label	Status	Support
114.1a	customizedService - customerProfile	{admin-nb 8}	customerProfile AND SUBCLASSES	m	

**Table 114 (concluded): Name binding support**

Index	Status		Support		Additional information
	Object creation	Object deletion	Object creation	Object deletion	
114.1b	c	c			
c: if 113.1.1 then m else -.					

#### 4.19.2 Packages

The supplier of the implementation shall state whether or not the packages specified by this managed object of this class are supported, in table 115.

Packages of superclasses which are not applicable are listed in the package support table only. The associated attributes, actions and notifications are not mentioned in the following tables.

**Table 115: Package support**

Index	Package label	Value of OBJECT IDENTIFIER	Status	Support
115.1	adminStatePkg	{admin-pkg 2}	o	
115.2	packagesPackage	{smi2-pkg 16}	c	
115.3	allomorphicPackage	{smi2-pkg 17}	o	
c: if 115.1 or 115.3 then m else -.				

#### 4.19.3 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all the packages instantiated in a managed object class definition are supported, in the "Support" and "Additional information" columns of table 116. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

**Table 116: Attribute support**

<b>Index</b>	<b>Attribute template label</b>	<b>Value of OBJECT IDENTIFIER</b>	<b>Status</b>	<b>Support</b>
116.1a	customizedServiceId	{admin-att 32}	m

#### 4.19.4 Attribute groups

There are no attribute groups specified for this managed object class.

#### 4.19.5 Actions

There are no actions specified for this managed object class.

#### 4.19.6 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all the packages instantiated in a managed object of this class are supported, in the "Support" and "Additional information" columns in table 117. The supplier of the implementation shall indicate support in terms on the confirmed and non-confirmed modes.

**Table 117: Notification support**

Index	Notification type template label	Value of notification type identifier	Status	Support		Additional information
				Confirmed	Non-confirmed	
117.1a	objectCreation	{smi2-not 6}	m

#### 4.19.7 Parameters

There are no parameters specified for this managed object class.

#### 4.20 Statement of conformance to managed object class v5LeasedLineReservation

**Table 118: Object class support**

Index	Managed object class template label	Value of OBJECT IDENTIFIER for the class	Status	Support
118.1	v5LeasedLineReservation	{ccitt(0) identified-organization(4) etsi(0) v5LeConfigurationManagement(377) informationModel(0) managedObjectClass(3) 22}	c	
c: if ETS 300 324-2 [2] M3 or ETS 300 347-2 [3] N32 then m else -.				

The supplier of the implementation shall state whether or not all mandatory features of the object listed above are supported in table 119.

**Table 119: Feature support**

Index	Sub-Index		Support
119.1	119.1.1	Is configuration management supported?	
	119.1.2	Are all mandatory features for configuration management supported?	

#### 4.20.1 Name bindings

The supplier of the implementation shall state which name bindings of the managed object class are supported, in the "Support" and "Additional information" columns of table 120.

**Table 120: Name binding support**

Index	Name binding template label	Value of OBJECT IDENTIFIER	Superior object class template label	Status	Support
120.1a	customizedService - customerProfile	{admin-nb 8}	customerProfile AND SUBCLASSES	m	

**Table 120 (concluded): Name binding support**

Index	Status		Support		Additional information
	Object creation	Object deletion	Object creation	Object deletion	
120.1b	c	c			
c: if 119.1.1 then m else - .					

#### 4.20.2 Packages

The supplier of the implementation shall state whether or not the packages specified by this managed object of this class are supported, in table 121.

Packages of superclasses which are not applicable are listed in the package support table only. The associated attributes, actions and notifications are not mentioned in the following tables.

**Table 121: Package support**

Index	Package label	Value of OBJECT IDENTIFIER	Status	Support
121.1	adminStatePkg	{admin-pkg 2}	o	
121.2	packagesPackage	{smi2-pkg 17}	c	
121.3	allomorphicPackage	{smi2-pkg 16}	o	
c: if 121.1 or 121.3 then m else - .				

#### 4.20.3 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all the packages instantiated in a managed object class definition are supported, in the "Support" and "Additional information" columns of table 122. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

**Table 122: Attribute support**

Index	Attribute template label	Value of OBJECT IDENTIFIER	Status	Support
122.1a	customizedServiceId	{admin-att 32}	m
