Foreword

Part 1 of this Interim European Telecommunication Standard (I-ETS) has been produced by the Terminal Equipment (TE) Technical Committee of the European Telecommunications Standards Institute (ETSI).

An ETSI standard may be given I-ETS status either because it is regarded as a provisional solution ahead of a more advanced standard, or because it is immature and requires a "trial period". The life of an I-ETS is limited to three years after which it can be converted into an ETS, have its life extended for a further two years, be replaced by a new version, or be withdrawn.

This is the first Part of an I-ETS which comprises of two parts as follows:

"Terminal Equipment (TE); Conformance testing for file transfer over the Integrated Services Digital Network (ISDN);

Part 1: Profile Test Specification Summary (PTS-Summary) for the FTAM profile (ETS 300 388);

Part 2: Profile Specific Test Specification (PSTS) for the FTAM profile (ETS 300 388)".

Proposed announcement date	
Date of adoption of this I-ETS:	4 October 1996
Date of latest announcement of this I-ETS (doa):	31 January 1997

4 General

This Part of this I-ETS tests simple file transfer over the ISDN FTAM Simple File Transfer profile (ETS 300 388 [1]) and describes all references used to realize a conformance test.

Two classes of conformance are defined.

The first is identical to ISO/IEC ISP 10607-3 [2] (referred to as Application File Transfer (AFT) 11 in ISO/IEC TR 10000-2 [3]) and is called the basic class.

The second class is the fully ETSI/ISDN conformant class. It includes all basic facilities and additional recovery facilities. It also includes the management capabilities from ISO/IEC ISP 10607-6 [4] (referred to as AFT 3 in ISO/IEC TR 10000-2 [3]).

Profile Test Suites (PTS) for AFT 11 and AFT 3 profiles already exist. However, the tests for the full class profile do not include all existing ones and additional Test Cases are necessary. The references below are, therefore, directly to the existing PTS originally developed through the Conformance Testing Services (CTS) programs, later maintained by the Open Systems Testing Consortium (OSTC) and then updated from the draft version of Tree and Tabular Combined Notation (TTCN) to full ISO/IEC 9646, Parts 1 to 7 [5] (TTCN version) by the European Workshop on Open Systems (EWOS).

NOTE: The existing PTS is given in a Machine-Processable format in EWOS ED 88 [6], Binders 0 to 12, which is available from the EWOS Secretariat.
