ETS 300 496: May 1997

Foreword

This European Telecommunication Standard (ETS) has been produced by the Signalling Protocols and Switching (SPS) Technical Committee of the European Telecommunications Standards Institute (ETSI).

This ETS belongs to a set of standards related to the Broadband Integrated Services Digital Network (B-ISDN) User Part (B-ISUP) Capability Set 1 (CS1) for the international interface, as described below:

ETS 300 656: "Basic services [ITU-T Recommendations Q.2761 to Q.2764 (1995), modified]";

ETS 300 657: "Supplementary services [ITU-T Recommendation Q.2730 (1995), modified]";

ETS 300 495: "B-ISUP to DSS2 interworking [ITU-T Recommendation Q.2650 (1995), modified]";

ETS 300 496: "B-ISUP to ISUP interworking [ITU-T Recommendation Q.2660 (1995), modified]";

ETS 300 685: "Usage of cause and location in DSS2 and B-ISUP [ITU-T Recommendation

Q.2610 (1995), modified]".

Transposition dates	
Date of adoption:	2 May 1997
Date of latest announcement of this ETS (doa):	31 August 1997
Date of latest publication of new National Standard or endorsement of this ETS (dop/e):	28 February 1998
Date of withdrawal of any conflicting National Standard (dow):	28 February 1998

Endorsement notice

The text of ITU-T Recommendations Q.2660 (1995) was approved by ETSI as an ETS with agreed modifications as given below.

NOTE: New or modified text is indicated using sidebars. In addition, underlining and/or strikeout are used to highlight detailed modifications where necessary.

ETS 300 496: May 1997

Page 1, clause 1, first and second paragraphs

Replace the first and second paragraphs by:

This European Telecommunication Standard (ETS) specifies the interworking between Broadband Integrated Services Digital Network (B-ISDN) User Part (B-ISUP) as used in the Broadband Capability Set 1 (CS1) network (according to ETS 300 656 [19] and ETS 300 657 [20]) and the Narrowband ISDN User Part (ISUP) version 2 as defined in ETS 300 356-1 to ETS 300 356-19 ([1] to [18]).

The interworking between the above two signalling systems may occur when the Broadband network is used as a transit network between two Narrowband networks. The scope of this ETS is limited to the interworking of the basic call and supplementary services applicable to the international interface.

Page 1

Insert the following two clauses (normative references and definitions) after clause 1:

Normative references

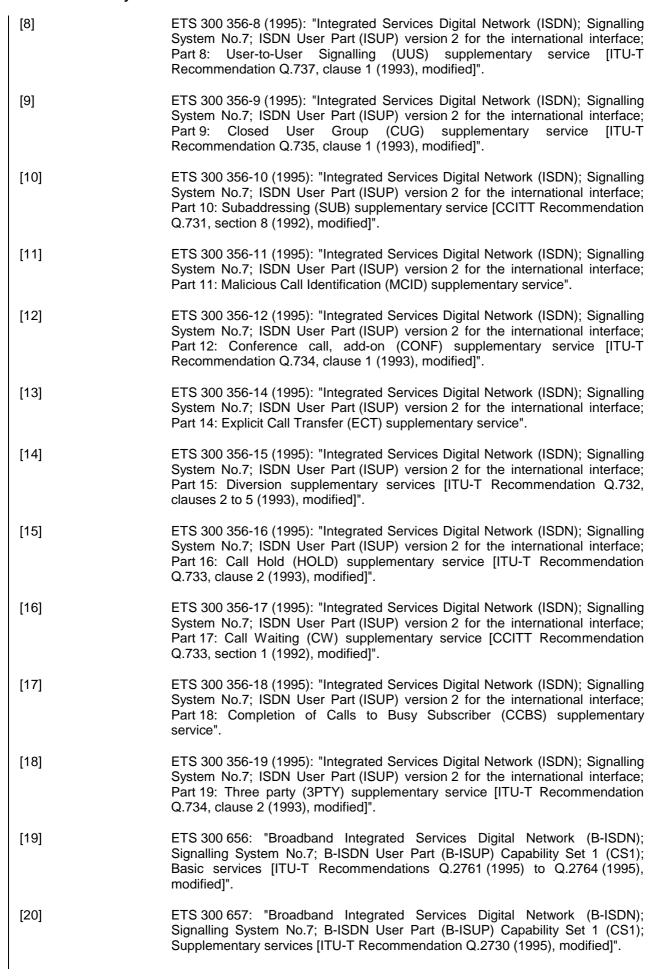

This ETS incorporates by dated and undated references, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references the latest edition of the publication refererred to applies.

supported by an ISDN and the means to describe them".

Definitions

For the purposes of this ETS, the following definitions apply:

Integrated Services Digital Network (ISDN): See ITU-T Recommendation I.112 [21], definition 308.

service; telecommunication service: See ITU-T Recommendation I.112 [21], definition 201.

supplementary service: See ITU-T Recommendation I.210 [22], subclause 2.4.

Page 2, clause 2

Insert the following abbreviations as appropriate:

B-ISDN	Broadband ISDN	
B-ISUP	Broadband ISUP	
CS1	Capability Set 1	
CTM	Call Transfer Message	
DSS2	Digital Subscriber Signa	

DSS2 Digital Subscriber Signalling System No. two

FAC Facility message

IDR Identification Request message
IRS Identification Response message
ISDN Integrated Services Digital Network

ISUP ISDN User Part

LOP Loop Prevention (message)

Page 14, subclause 6.7 (MCID)

Replace the text of subclause 6.7 by the following diagrams and tables:

Narrowband	Broadband	Narrowband
		IDR
	IDR	<
IDR	<	
<		l

Incoming narrowband	Transit broadband	Outgoing narrowband
MCID request indicators	MCID request indicators	MCID request indicators

Narrowband	Broadband	Narrowband
IRS>	IRS	
	>	IRS
Incoming narrowband	Transit broadband	Outgoing narrowband
MCID response indicators	MCID response indicators	MCID response indicators

Incoming narrowband	Transit broadband	Outgoing narrowband
MCID response indicators	MCID response indicators	MCID response indicators
Calling party number	Calling party number	Calling party number
Access transport	Calling party subaddress	Access transport
Generic number	Additional calling party number	Generic number

Page 17, subclause 6.15 (ECT)

Replace the text of subclause 6.15 by the following diagrams and tables:

Narrowband	Broadband	Narrowband
CPG		
>	CPG	
	>	CPG

Incoming narrowband	Transit broadband	Outgoing narrowband
Event information set to	Not carried	Event information set to
"progress"		"progress"
Generic notification	Notification	Generic notification
Call transfer number	Call transfer number	Call transfer number

Narrowband	Broadband	Narrowband
FAC		
>	CTM	
		FAC

Incoming narrowband	Transit broadband	Outgoing narrowband
Call transfer number	Call transfer number	Call transfer number
Access transport	Calling party subaddress	Access transport
Generic notification	Notification	Generic notification
Service activation parameter:	Not carried	Service activation parameter:
call transfer		call transfer

ETS 300 496: May 1997

Narrowband	Broadband	Narrowband
LOP		
	LOP	
		LOP
		>
Incoming narrowband	Transit broadband	Outgoing narrowband
Loop prevention indicators	Loop prevention indicators	Loop prevention indicators
Call transfer reference	Call transfer reference	Call transfer reference

Page 17, subclause 6.19 (CCBS)

Replace the text of subclause 6.19 by the following diagram and table:

Narrowband	Broadband	Narrowband
IAM		
>	IAM	
	>	IAM
		>

Incoming narrowband	Transit broadband	Outgoing narrowband
CCBS	CCBS	CCBS

Page 20, subclause 6.25 (MLPP)

Delete the mapping tables for MLPP information. They are not applicable.
