This constraint corresponds to the combination:</p> <p>NDB: 7 bits<br/>NPB: any valid value.</p> <p>Since the path acc. to comment 2) in GSM 07.01, clause B.1.2.2, is not for Setup messages, the rate 1200/75 Bit/s can only be achieved with IR 16 kBits/s and the path acc. to comment 1), which is for CE: NT or "both" only. | <b>Comments:</b>           | <p>To check a Bearer Capability IE of a Setup PDU acc. to table in clause B.1.4 of GSM 07.01 for the UR 1200 Bits/s. This constraint corresponds to the combination:</p> <p>NDB: 7 bits<br/>           NPB: any valid value but "none".</p> <p>Since the path acc. to comment 2) in GSM 07.01, clause B.1.4, is not for Setup messages, the rate 1200 Bit/s can only be achieved with IR 16 kBits/s and the path acc. to comment 1), which is for CE: NT or "both" only. So the path CE: T is discarded.</p> <p>ANY CHANGE IN THIS CONSTRAINT MUST BE MADE IN THE CORRESPONDING LOWER LAYER COMPATIBILITY CONSTRAINT ALSO!</p> |          |
