Foreword

This Technical Committee Reference Technical Report (TCR-TR) has been produced by Transmission and Multiplexing (TM) Technical Committee of the European Telecommunications Standards Institute (ETSI), with the co-operation of ETSI STCs TM3 and NA5.

Edition 1 of this TCR-TR was approved and published in October 1993. Since then it has been decided that it is necessary to refer to its content in other standards and reports produced by ETSI.

Since TCR-TRs are not publicly available, the normal ETSI mechanism for making the content of a TCR-TR available is to publish it as an ETR with a TCR-TR being published in parallel as an endorsement of the ETR content.

Since no change has been made to the content of TCR-TR 014 Edition 1 (other than to publish it as an ETR), there is no need to carry out the approval process again.

Endorsement notice

The text of ETR 249 (1996) [originally the technical content of TCR-TR 014 (1993)] has been approved for publication.
