Foreword

This Technical Committee Reference Technical Report (TCR-TR) has been produced by the Methodologies for Testing and Specification (MTS) Technical Committee of the European Telecommunications Standards Institute (ETSI) following consultation with all TC/STC Chairmen.

A TCR-TR is a deliverable for use inside ETSI which records output results of ETSI Technical Committee (TC) or Sub-Technical Committee (STC) studies which are not appropriate for European Telecommunication Standard (ETS), Interim European Telecommunication Standard (I-ETS) or ETSI Technical Report (ETR) status. They can be used for guidelines, status reports, co-ordination documents, etc. They are to be used to manage studies inside ETSI and shall be mandatorily applied amongst the concerned TCs. They shall also be utilized by the TC with overall responsibility for a study area for co-ordination documents (e.g. models, reference diagrams, principles, structures of standards, framework and guideline documents) which constitute the agreed basis for several, if not all, TCs and STCs to pursue detailed standards.

Endorsement notice

The text of ETR 212 (1995) was approved on 28 May 1996 by TC-MTS after a 2 month consultation period in accordance with the ETSI approval procedures. The provisions of that ETR shall thus be considered to apply mandatorily within all ETSI Technical Committees.
