Part 2: TAA2
Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for ETSI members and non-members, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, PLUGTESTS™, UMTS™ and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. 3GPP™ and LTE™ are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. oneM2M™ logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. GSM® and the GSM logo are trademarks registered and owned by the GSM Association.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee TETRA and Critical Communications Evolution (TCCE).

The present document is part 2 of a multi-part deliverable covering the Rules for the management of the TETRA standard authentication and key management algorithm sets, as identified below:

- Part 1: "TAA1";
- Part 2: "TAA2".

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the ETSI Drafting Rules (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.
1 Scope

The purpose of the present document is to specify the rules for the management of the TETRA standard authentication and key management algorithm set TAA2. This algorithm set is intended for air interface security in TETRA products.

The specification for TAA2 consists of the following three parts:

- Part 1: Algorithm specification;
- Part 2: Design conformance test data;
- Part 3: Algorithm input/output test data.

The procedures described in the present document apply to Parts 1 and 2 of the specifications. Parts 1 and 2 are confidential for each of the algorithms.

Part 3 of each of the specifications is not confidential and can be obtained directly from the TAA2 Custodian (see clause 5.2). There are no restrictions on the distribution of this part of the specifications.

The management structure is defined in clause 4. This structure is defined in terms of the principals involved in the management of TAA2 (ETSI, ETSI Technical Committee TCCE, TAA2 Custodian and approved recipients) together with the relationships and interactions between them.

The procedures for delivering TAA2 to approved recipients are defined in clause 5. This clause is supplemented by annex A which specifies the items which are to be delivered.

Clause 6 is concerned with the criteria for approving an organization for receipt of TAA2 and with the responsibilities of an approved recipient.

Clause 7 is concerned with the appointment and responsibilities of the TAA2 Custodian.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at https://docbox.etsi.org/Reference.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.
The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

[i.1] ETSI EN 300 392-7: “Terrestrial Trunked Radio (TETRA); Voice plus Data (V+D); Part 7: Security”.

[i.2] ETSI EN 300 396-6: “Terrestrial Trunked Radio (TETRA); Direct Mode Operation (DMO); Part 6: Security”.

NOTE: References [i.1] and [i.2] may also be published as ETSI Technical Specifications, specifically ETSI TS 100 392-7 and ETSI TS 100 396-6 respectively. In each case, the latest version of the specification, either TS or EN, applies.

3 Definition of terms, symbols and abbreviations

3.1 Terms

Void.

3.2 Symbols

Void.

3.3 Abbreviations

4 TAA2 management structure

The management structure is depicted in figure 1.

![TAA2 management structure diagram](image)

**Key:**
- **a** = Agreement between TAA2 Custodian and ETSI
- **b** = Status reports and recommendations
- **c** = Setting of approval criteria
- **d** = Requested details of the TAA2 register
- **1** = Request for TAA2
- **2** = Check of request against approval criteria
- **3 and 4** = Exchange of Confidentiality and Restricted Usage Undertaking
- **5** = Dispatch of TAA2 specification
- **6** = Update the TAA2 register
- **7** = Document filing
- **8** = Technical advice

**Figure 1: TAA2 management structure**

Figure 1 shows the three principals involved in the management of TAA2 and the relationships and interactions between them.

ETSI is the owner of TAA2. The ETSI Secretariat together with ETSI TC TCCE sets the approval criteria for receipt of the algorithm (see clause 6).

The TAA2 Custodian is the interface between ETSI and the approved recipients of TAA2.

The Custodian shall be the ETSI Secretariat unless it is decided by ETSI Secretariat and/or ETSI TC TCCE to (temporarily) delegate this task to a third party on the basis of an agreement between the latter and the ETSI Secretariat. The TAA2 Custodian’s duties are detailed in clause 7. They include distributing TAA2 to approved recipients, as detailed in clause 5, providing limited technical advice to approved recipients and providing algorithm status reports to ETSI TC TCCE.
5 Distribution procedures

5.1 Distribution of parts 1, 2 and 3 of the TAA2 specification by the TAA2 Custodian

The process for distribution of algorithm specifications is described at https://www.etsi.org/security-algorithms-and-codes/security-algorithms [1].

5.2 Distribution of TAA2 specification part 3 by the TAA2 Custodian

The following procedure is defined for distributing only part 3 of the TAA2 specification:

1) The TAA2 Custodian receives a request for one single copy of part 3 of the TAA2 specification.

2) The TAA2 Custodian sends one copy of part 3 of the TAA2 specification to the applicant.

6 Approval criteria and restrictions

The approval criteria are set by the ETSI Secretariat together with ETSI TC TCCE and maintained by the TAA2 Custodian. The TAA2 Custodian may recommend changes to these criteria.

The TAA2 Custodian shall decide whether an organization requesting the TAA2 specification may be considered to be an approved recipient. Where an organization consists of a group of companies or organizations, the TAA2 Custodian will decide whether one organization or company within the group may be an approved recipient on behalf of other organizations or companies within the group. Any doubtful cases shall be referred back to ETSI Secretariat or ETSI TC TCCE.

In order for an organization to be considered an approved recipient of the TAA2 specification it has to satisfy at least one of the following criteria:

C1 The organization is a bona fide designer or manufacturer of TETRA subscriber or fixed network equipment, where the algorithm requested is included in the systems.

C2 The organization is a bona fide designer or manufacturer of components for TETRA subscriber or fixed network equipment, where at least one of the components includes the algorithm requested.

C3 The organization is a bona fide designer or manufacturer of a TETRA system simulator for testing of TETRA subscriber or fixed network equipment, where the simulator includes the algorithm requested.

C4 The organization has provided the TAA2 Custodian with exceptional reasons that have been approved by the TAA2 Custodian.

In the event that an organization cannot comply with the rules as described in the present document, the TAA2 Custodian may still decide, on an exceptional basis, to distribute the TAA2 specifications to this organization. In this case the TAA2 Custodian will inform ETSI TC TCCE about the decision and at the same time provide a motivation. If a special Confidentiality and Restricted Usage Undertaking is used, the TAA2 Custodian will first ask the ETSI Legal Department to approve this Confidentiality and Restricted Usage Undertaking (CRUU).
7 The TAA2 Custodian

7.1 Responsibilities

The TAA2 Custodian is expected to perform the following tasks:

T1 To approve requests for TAA2 by reference to the Approval Criteria given in clause 6.
T2 To exchange the Confidentiality and Restricted Usage Undertaking with approved recipients as described in clause 5.
T3 To obtain the Administrative authorization and export licences required by the Customs Services of its country if any.
T4 To distribute, if approved, the TAA2 specifications as detailed in clause 5.
T5 To maintain the TAA2 Register as described in clause 4.
T6 To hold in custody the contents of the TAA2 File as specified in clause 4.
T7 To provide recipients of TAA2 with limited technical support, i.e. answer written queries arising from the specification or test data (see note 1).
T8 To advise ETSI/ETSI TC TCCE of any problems arising with the approval criteria.
T9 In the light of written queries from recipients of the TAA2 specifications, to make recommendations to ETSI/ETSI TC TCCE for improvements/corrections to the specification and, subject to ETSI/ETSI TC TCCE approval, make and distribute the changes (see note 2).
T10 To provide ETSI/ETSI TC TCCE with information from the TAA2 Register when requested to do so.
T11 To monitor published advances in cryptanalysis and advise the ETSI TC TCCE of any advances which have a significant impact upon the continued suitability of TAA2 for the TETRA application.

NOTE 1: The TAA2 Custodian will only endeavour to answer questions relating to the TAA2 specifications. The TAA2 Custodian is not expected to provide technical support for development programmes.

NOTE 2: Numbered copies of any changes to the TAA2 specifications will be automatically distributed to all recipients of the specification and a record of the distribution entered in the TAA2 Register.

7.2 Appointment

The TAA2 Custodian is:

- ETSI Secretariat

The contact person is:

- ETSI Algorithms & Codes
  - Email: algorithms@etsi.org
- ETSI
  - F-06921 Sophia Antipolis Cedex
  - FRANCE
The TAA2 Custodian will ask a fee from the recipient to cover the cost of distribution of Part 1 and 2 of the specifications.

The TAA2 Custodian may ask for an optional fee from the recipient to cover the cost of distribution of Part 3.

All requests for either the TAA2 specification Part 1 and 2 or the TAA2 specification Part 3 should be addressed to the indicated contact person or to ETSI.
Annex A (informative):
Items delivered to approved recipient of TAA2

ITEM-1: The TAA2 specification (parts 1, 2 and 3).
ITEM-2: A countersigned Confidentiality and Restricted Usage Undertaking.
Annex B (informative):
