Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

**DECT™, PLUGTESTS™, UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™ and LTE™** are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™ logo** is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM Logo are trademarks registered and owned by the GSM Association.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Methods for Testing and Specification (MTS).

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the ETSI Drafting Rules (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.
1 Scope

The purpose of the present document is to provide Test Suite Structure and Test Purposes (TSS&TP) for the conformance test suite for using XML and JSON Schema with TTCN-3 as defined in ETSI ES 201 873-1 [5] in compliance with the relevant guidance given in the pro forma for TTCN-3 reference test suite ETSI TS 102 995 [4]. In the present document only XML and JSON related features have been considered, as specified in ETSI ES 201 873-9 [1] and ETSI ES 201 873-11 [6], but not the core language features (see ETSI ES 201 873-1 [5]), nor tool implementation (see ETSI ES 201 873-5 [i.2] and ETSI ES 201 873-6 [i.3]), language mapping (see ETSI ES 201 873-7 [i.4] and ETSI ES 201 873-8 [i.5]) and language extension (see e.g. ETSI ES 202 781 [i.6], ETSI ES 202 784 [i.7] and ETSI ES 202 785 [i.8]) aspects.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at https://docbox.etsi.org/Reference/.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

[i.1] Void.
3 Definition of terms, symbols and abbreviations

3.1 Terms

For the purposes of the present document, the terms given in ISO/IEC 9646-1 [2], ISO/IEC 9646-7 [3], ETSI ES 201 873-1 [5] (TTCN-3) and the following apply:

Abstract Test Suite (ATS): test suite composed of abstract test cases

ICS pro forma: document, in the form of a questionnaire, which when completed for an implementation or system becomes an ICS

Implementation Conformance Statement (ICS): statement made by the supplier of an implementation claimed to conform to a given specification, stating which capabilities have been implemented

Implementation eXtra Information for Testing (IXIT): statement made by a supplier or implementor of an IUT which contains or references all of the information related to the IUT and its testing environment, which will enable the test laboratory to run an appropriate test suite against the IUT

Implementation Under Test (IUT): implementation of one or more OSI protocols in an adjacent user/provider relationship, being part of a real open system which is to be studied by testing

IXIT pro forma: document, in the form of a questionnaire, which when completed for the IUT becomes the IXIT

3.2 Symbols

Void.

3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

ATS Abstract Test Suite
ICS Implementation Conformance Statement
IUT Implementation Under Test
IXIT Implementation eXtra Information for Testing
JSON JavaScript Object Notation
TC Test Case
TCI TTCN-3 Control Interface
4 Test Suite Structure (TSS)

The Test Suite Structure is in close alignment with ETSI ES 201 873-9 [1], containing:

a) positive tests ("Pos_" test case name prefix);

b) negative tests ("Neg_" test case name prefix).

The execution order of the TTCN-3 tool conformance test cases is specified in the dependencies section of test purpose descriptions.
Annex A (normative):
Test Purposes (TP)

A.1 Introduction of Test Purposes (TP)

A.1.0 Introduction

For each test requirement a Test Purpose (TP) is defined. Test purposes shall be defined in a dedicated test purpose document as well as with TTCN-3 documentation tags in each test case of the ATS. Both documentations shall convey the same information for each test purpose.

A.1.1 Test purpose naming convention

The test purpose naming scheme corresponds to the test case identifier naming scheme and vice-versa.

A.1.2 Test purpose structure

The test purpose structure is according to the Test Suite Structure (TSS).

A.1.3 Test purpose format

In the following, examples for tabular test purpose descriptions are shown that shall be defined in the test purpose document. This representation is a direct mapping of the contents of the document tags in the ATS (such as @purpose, @remark, or @verdict). The tabular descriptions are presented along with their corresponding TTCN-3 documentation tag equivalent. The test purpose reference shall be provided in a machine-readable format.

<table>
<thead>
<tr>
<th>Test Purpose Id</th>
<th>TP_Neg_05_top_level_001</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reference</td>
<td>ETSI ES 201 873-9 [1], clause 5</td>
</tr>
<tr>

<td>None</td>
</tr>
<tr>
<td>Dependencies</td>
<td>None</td>
</tr>
<tr>
<td>Summary</td>
<td>Verify that error is generated for missing XSD language tag in import clause</td>
</tr>
<tr>
<td>Expected Output</td>
<td>The TTCN-3 module shall be rejected by the validator or after/during execution</td>
</tr>
<tr>
<td>Notes</td>
<td></td>
</tr>
</tbody>
</table>

A corresponding TTCN-3 module addressing TP_Neg_05_top_level_001 is the following:

```plaintext
module Neg_05_top_level_001 {
  import from schema_Neg_05_top_level_001 all;
  template MyType m_msg := 1;
  /**
   * @desc The timeout given in seconds after which the test case will be stopped.
   */
  modulepar float PX_TC_EXECUTION_TIMEOUT := 5.0;
  type universal charstring Raw;
  type port P message {
    inout all;
  }
  type component C {
```
port P p;
}

testcase TC_Neg_05_top_level_001() runs on C system C {
  map(self:p, system:p);
  // encode the message
  p.send(m_msg);
  log("template should either be rejected by compiler or by runtime latest while encoding");
  setverdict(fail, "Invalid template should not be encoded");
  unmap(self:p, system:p);
}

control {
  execute(TC_Neg_05_top_level_001(), PX_TC_EXECUTION_TIMEOUT);
}

---

A corresponding TTCN-3 module for TP_Pos_050101_namespaces_001 is the following:

```medialist
fullname
    1

    import from schema_Pos_050101_namespaces_001 language "XSD" all;
    template MyType m_msg := 1;
    /**
      * @desc The timeout given in seconds after which the test case will be stopped.
      */
    modulepar float PX_TC_EXECUTION_TIMEOUT := 5.0;
    type universal charstring Raw;
    type universal charstring File;
    type record of File FileList;
    type port P message {
      inout all;
    }
    type component C {
      port P p;
    }
    /**
      * @desc lexical compare the charstring p_textToMatch with the contents of the reference XML
      * file and returns true if they represent the same XML structure
      * @param p_textToMatch text to be compared with the UTF-8 contents of the XML file
      * @param p_referenceXmlFile the XML file
      * @param p_xsdFileList the list of XSD files
      * @param p_matchError the error result in case it did not match
      * @param p_referenceTTCN3File the file of the TTCN-3 test module. This path is used to find the
      * reference XML file relative to this path, by keeping the TTCN-3 code file system independent.
      * @return true if p_textToMatch and the contents of p_referenceXmlFile represent the same XML
      * structure
      */
    external function matchFile(Raw p_textToMatch, File p_referenceXmlFile, FileList p_xsdFileList,
      out universal charstring p_matchError, File p_referenceTTCN3File := __FILE__) return boolean;

testcase TC_Pos_050101_namespaces_001() runs on C system C {
  var Raw v_rcv;
  var universal charstring v_matchError;
```
map(self:p, system:p);
// encode the message
p.send(m_msg);
alt {
// compare the encoded message with the reference XML file
[] p.check(receive(Raw:?)) -> value v_rcv) {
    log("XML message ", v_rcv);
    if (matchFile(v_rcv, "Pos_050101_namespaces_001.xml", {"Pos_050101_namespaces_001.xsd" }, v_matchError)) {
        alt {
            // match decoded value to pass test
            [] p.receive(m_msg) {
                setverdict(pass, "Decoded value matches encoded template and reference XML");
            }
        }
    } else {
        setverdict(fail, v_matchError);
    }
    [] p.receive {
        setverdict(fail, "Raw decoding failure");
    }
} else {
    setverdict(fail, "XML decoding failure");
}
}
control {
execute(TC_Pos_050101_namespaces_001(), 5.0);
}

A.2 Test purposes for the TTCN-3 Part 9 conformance test suite

This ATS has been produced using the Testing and Test Control Notation (TTCN) according to ETSI ES 201 873-9 [1], ETSI ES 201 873-1 [5] and ETSI ES 201 873-11 [6].
