Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, PLUGTESTSTM, UMTSTM and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. 3GPP™ and LTE™ are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. oneM2M™ logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. GSM® and the GSM logo are trademarks registered and owned by the GSM Association.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Electronic Signatures and Infrastructures (ESI).

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the ETSI Drafting Rules (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.

Introduction

Uniform Resource Identifiers (URIs) allow to uniquely identify specific values. The ETSI framework for standardization of signatures as described in ETSI TR 119 000 [i.1] contains documents for different signatures formats (CAdES ETSI EN 319 122-1 [5], XAdES ETSI EN 319 132-1 [8] or PAdES ETSI EN 319 142-1 [11]) as well as the A5iC format for signature containers ETSI EN 319 162-1 [13]. Some concepts apply for all the signature formats and even for the signature containers. The present document allows to define corresponding URIs and describe more generally how to build URIs to describe specific elements in a signature format or container.
1 Scope

The present document describes the root Uniform Resource Identifier (URI) http://uri.etsi.org/ades and sub branches that allow to define URI applicable for more than one AdES signature format and/or the ASiC signature container.

The present document describes how to define URIs to reference a specific version and/specific attribute/property of an AdES format.

NOTE: The present document defines URIs which are not used as pointers to a specific location but are used as unique identifiers.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at https://docbox.etsi.org/Reference.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

[1] ETSI TS 103 171: "Electronic Signatures and Infrastructures (ESI); XAdES Baseline Profile".
[2] ETSI TS 103 172: "Electronic Signatures and Infrastructures (ESI); PAdES Baseline Profile".
[3] ETSI TS 103 173: "Electronic Signatures and Infrastructures (ESI); CAdES Baseline Profile".
[4] ETSI TS 103 174: "Electronic Signatures and Infrastructures (ESI); ASiC Baseline Profile".
[5] ETSI EN 319 122-1: "Electronic Signatures and Infrastructures (ESI); CAdES digital signatures; Part 1: Building blocks and CAdES baseline signatures".
[7] ETSI TS 119 122-3: "Electronic Signatures and Infrastructures (ESI); CAdES digital signatures; Part 3: Incorporation of Evidence Record Syntax (ERS) mechanisms in CAdES".
[8] ETSI EN 319 132-1: "Electronic Signatures and Infrastructures (ESI); XAdES digital signatures; Part 1: Building blocks and XAdES baseline signatures".
[10] ETSI TS 119 132-3: "Electronic Signatures and Infrastructures (ESI); XAdES digital signatures; Part 3: Incorporation of Evidence Record Syntax (ERS) mechanisms in XAdES".
[12] ETSI EN 319 142-2: "Electronic Signatures and Infrastructures (ESI); PAdES digital signatures; Part 2: Additional PAdES signatures profiles".
[13] ETSI EN 319 162-1: "Electronic Signatures and Infrastructures (ESI); Associated Signature Containers (ASiC); Part 1: Building blocks and ASiC baseline containers".
2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

[i.1] ETSI TR 119 000: "Electronic Signatures and Infrastructures (ESI); The framework for standardization of signatures; overview".

[i.2] Commission Implementing Decision (EU) 2015/1506 of 8 September 2015 laying down specifications relating to formats of advanced electronic signatures and advanced seals to be recognised by public sector bodies pursuant to Articles 27(5) and 37(5) of Regulation (EU) No 910/2014 of the European Parliament and of the Council on electronic identification and trust services for electronic transactions in the internal market (Text with EEA relevance).

[i.3] ETSI TR 119 001: "Electronic Signatures and Infrastructures (ESI); The framework for standardization of signatures; Definitions and abbreviations".

3 Definition of terms, symbols and abbreviations

3.1 Terms

For the purposes of the present document, the terms given in ETSI TR 119 001 [i.3] and the following apply:

AdES (digital) signature: digital signature that is either a CAdES signature, a PAdES signature, a XAdES signature, or a JAdES signature

JAdES signature: JSON Web Signature

signature class: set of signatures achieving a given functionality

signature level: format specific definition of a set of data incorporated into a digital signature, which allows to implement a signature class

3.2 Symbols

Void.

3.3 Abbreviations

For the purposes of the present document, the abbreviations given in ETSI TR 119 001 [i.3] and the following apply:

CID: Commission Implementation Decision

URI: Uniform Resource Identifier
4 URI namespaces

4.1 The main branch

Any URI under the root http://uri.etsi.org/ades shall be used to describe URIs applicable for all types of AdES signatures.

4.2 URIs used to describe signature levels

4.2.1 Baseline signature and container levels as defined in the standardization framework for signatures ETSI TR 119 000

A URI describing a baseline signature level which is defined in ETSI EN 319 122-1 [5] (CAdES), ETSI EN 319 132-1 [8] (XAdES) and ETSI EN 319 142-1 [11] (PAdES) or a baseline container level which is defined in ETSI EN 319 162-1 [13] (ASiC) shall be built in the following way:

http://uri.etsi.org/ades/191x2/level/baseline/<name-of-the-baselinelevel>#

where:

- **191x2**: states that the level is defined in all the signature format documents with a number x19 1x2:
  - **level**: states that this URI defines a signature level:
    - **baseline**: states that this URI defines a baseline signature level.

The following URIs are defined:

**NOTE:** For the specification of ASiC levels see ETSI EN 319 162-1 [13], clause 5.1.

4.2.2 Baseline signature and container levels as defined in the CID 2015/1506

A URI describing a baseline signature level which is defined in ETSI TS 103 171 [1] (XAdES), ETSI TS 103 172 [2] (PAdES) and ETSI TS 103 173 [3] (CAdES) or a baseline container level which is defined in ETSI TS 103 174 [4] (ASiC) as referenced in the CID 2015/1506 [i.2] shall be built in the following way:

http://uri.etsi.org/ades/etsits/level/baseline/<name-of-the-baselinelevel>#
where:

- etits: states that the level is defined in all the signature format documents with a number x19 l2:
  - level: states that this URI defines a signature level:
    - baseline: states that this URI define a baseline signature level.

The following URIs are defined:

NOTE 1: For the specification of ASiC levels see ETSI TS 103 174 [4], clause 4.

NOTE 2: No LTA level for ASiC is defined in ETSI TS 103 174 [4].

4.2.3 Extended signature levels as defined in the standardization framework for signatures ETSI TR 119 000

A URI describing an extended signature level which is defined in more than one of the documents ETSI EN 319 122-2 [6] (CAdES), ETSI EN 319 132-2 [9] (XAdES) or ETSI EN 319 142-2 [12] (PAdES) shall be built in the following way:

http://uri.etsi.org/ades/191x2/level/extended/<name-of-the-extendedlevel>#

where:

- 191x2: states that the level is defined in more than one of the signature format documents with a number x19 l2:
  - level: states that this URI defines a signature level:
    - extended: states that this URI define an extended signature level.

The following URIs are defined:

4.3 How to reference specific signature format version

To reference a specific version of a signature format or an ASiC container the URI shall have the following structure:

http://uri.etsi.org/<number_of_the_document>/<specific_version>

The number_of_the_document shall be the five-digit number obtained by removing the first digit of the ETSI document number, and any part or sub-part numbers.

The specific_version shall be of format vx.y.z where x.y.z are the three digits used to identify an ETSI document version.

4.4 How to reference specific attribute/properties in an AdES signature

To reference a specific attribute/property of a signature format or of an ASiC container, the URI shall have the following structure:

http://uri.etsi.org/<number_of_the_document>/<specific_version> <name_of_the_attribute_or_property>

The number_of_the_document and specific_version shall be as defined in clause 4.3.

The name_of_the_attribute_or_property shall be the name of the attribute or property as used within the specific ETSI document.

NOTE 1: A signature attribute or property is always specified together with the version of the ETSI document in which it is defined.

NOTE 2: In case the URI references as attribute a signature included in an ASiC container, a specific attribute/property of a signature format can be referenced as specified in the present clause.
