Important notice

The present document can be downloaded from the ETSI Search & Browse Standards application.

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on ETSI deliver repository.

Users should be aware that the present document may be revised or have its status changed, this information is available in the Milestones listing.

If you find errors in the present document, please send your comments to the relevant service listed under <u>Committee Support Staff</u>.

If you find a security vulnerability in the present document, please report it through our Coordinated Vulnerability Disclosure (CVD) program.

Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

Copyright Notification

No part may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm except as authorized by written permission of ETSI.

The content of the PDF version shall not be modified without the written authorization of ETSI.

The copyright and the foregoing restriction extend to reproduction in all media.

Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for ETSI members and non-members, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI IPR online database.

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECTTM, **PLUGTESTS**TM, **UMTS**TM and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP**TM, **LTE**TM and **5G**TM logo are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M**TM logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM**[®] and the GSM logo are trademarks registered and owned by the GSM Association.

Legal Notice

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found at 3GPP to ETSI numbering cross-referencing.

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the <u>ETSI Drafting Rules</u> (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.

Foreword

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 1 presented to TSG for information;
 - 2 presented to TSG for approval;
 - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

Introduction

The present document is part of a TS-family covering the 3rd Generation Partnership Project Technical Specification Group Services and System Aspects, Telecommunication management; as identified below:

- TS 28.680: Telecommunication management; Wireless Local Area Network (WLAN) management; Concepts and requirements
- TS 28.681: Telecommunication management; Wireless Local Area Network (WLAN) Network Resource Model (NRM) Integration Reference Point (IRP); Requirements
- TS 28.682: Telecommunication management; Wireless Local Area Network (WLAN) Network Resource Model (NRM) Integration Reference Point (IRP); Information Service (IS)
- TS 28.683: Telecommunication management; Wireless Local Area Network (WLAN) Network Resource Model (NRM) Integration Reference Point (IRP); Solution Set (SS) definitions

1 Scope

The present document is part of an Integration Reference Point (IRP) named Wireless Local Area Networks (WLAN) Management Network Resource Model (NRM) IRP, through which an IRPAgent can communicate management information to one or several IRPManagers concerning WLAN management. The WLAN management NRM IRP comprises a set of specifications defining Requirements, a protocol neutral Information Service and one or more Solution Set(s).

The present document specifies the protocol neutral WLAN management NRM IRP: Information Service (IS).

The present document also contains stage 2 descriptions for those functionalities for the WLAN Management.

2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.
- [1] 3GPP TR 21.905: "Vocabulary for 3GPP Specifications".
 [2] 3GPP TS 28.622: "Telecommunication management; Generic Network Resource Model (NRMs) Integration Reference Point (IRP): Information Service" (IS)".
 [3] 3GPP TS 32.111-2: "Telecommunication management; Fault Management; Part 2: Alarm
- [4] IEEE 802.11TM-2012: "IEEE Standard for Information technology--Telecommunications and information exchange between systems Local and metropolitan area networks--Specific requirements Part 11: Wireless LAN Medium Access Control (MAC) and Physical Layer (PHY)

Integration Reference Point (IRP): Information Service (IS)".

- [5] 3GPP TS 28.632: "Telecommunication management; Inventory Management (IM) Network Resource Model (NRM) Integration Reference Point (IRP); Information Service (IS)".
- [6] 3GPP TS 32.101: "Telecommunication management; Principles and high level requirements".

- [8] 3GPP TS 32.150: "Telecommunication management; Integration Reference Point (IRP) Concept and definitions".

3 Definitions abbreviations

Specifications".

3.1 Definitions

For the purposes of the present document, the terms and definitions given in 3GPP TR 21.905 [1], 3GPP TS 32.101 [6], 3GPP TS 32.102 [7], and 3GPP TS 32.150 [8] apply. A term defined in the present document takes precedence over the definition of the same term, if any, in 3GPP TR 21.905 [1].

3.2 Abbreviations

For the purposes of the present document, the abbreviations given in 3GPP TR 21.905 [1] and the following apply. An abbreviation defined in the present document takes precedence over the definition of the same abbreviation, if any, in 3GPP TR 21.905 [1].

AP	Access Point
IOC	Information Object Class
IRP	Integration Reference Point
NRM	Network Resource Model
PLMN	Public Land Mobile Network
UML	Unified Modelling Language
WLAN	Wireless Local Area Network

4 Model

4.1 Imported information entities and local labels

Label reference	Local label
3GPP TS 28.622 [2], IOC, ManagedElement	ManagedElement
3GPP TS 28.622 [2], IOC, ManagedFunction	ManagedFunction

4.2 Class diagram

4.2.1 Relationships

This clause depicts the set of classes (e.g. IOCs) that encapsulates the information relevant for this IRP. This clause provides an overview of the relationships between relevant classes in UML. Subsequent clauses provide more detailed specification of various aspects of these classes. Figure 4.2.1-1 shows the containment/naming hierarchy and the associations of the classes defined in the present document.

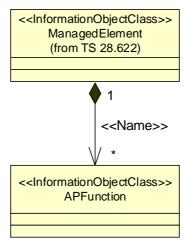

Figure 4.2.1-1 WLAN NRM Containment/Naming

NOTE: WLAN NRM may need to be updated, if the WLAN access point is to be part of PLMN.

4.2.2 Inheritance

This clause depicts the inheritance relationships that exist between information object classes. Figure 4.2.2-1 shows the inheritance diagram of WLAN NRM.

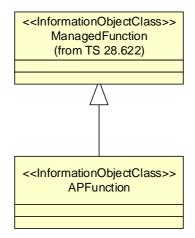

Figure 4.2.2-1 WLAN NRM Inheritance Hierarchy

4.3 Class definitions

4.3.1 APFunction

4.3.1.1 Definition

This class represents the functionality of wireless Access Point as defined in IEEE 802.11 [4].

The APFunction IOC instance is not visible to Basic CM IRPManager, Bulk CM IRPManager and Kernel CM IRPManager.

The ManagedElement IOC instance (TS 28.622 [2]) name-containing the APFunction IOC instance is not visible to Basic CM IRPManager, Bulk CM IRPManager and Kernel CM IRPManager in case all the instances directly name-contained by this ManagedElement IOC instance (TS 28.622 [2]) are of APFunction IOC.

The InventoryUnit IOC instance (TS 28.632 [5]), name-contained by the ManagedElement IOC instance (TS 28.622 [2]) that name-contains the APFunction IOC instance, is not visible to Basic CM IRPManager, Bulk CM IRPManager and Kernel CM IRPManager in case all the instances directly name-contained by this ManagedElement IOC instance (TS 28.622 [2]) are of APFunction IOC or InventoryUnit IOC.

The following are examples of cases describing the conditions where IOC instance(s) are not visible to Basic CM IRPManager, Bulk CM IRPManager and Kernel CM IRPManager:

- Case 1) if ManagedElement-1 name-contains only two instances: APFunction-A and APFunction-B, the three instances are not visible.
- Case 2) if ManagedElement-1 name-contains only two instances: APFunction-A and MMEFunction-76, the APFunction-A is not visible.
- Case 3) if ManagedElement-1 name-contains only two instances: APFunction-A and InventoryUnit-7883 (TS 28.632 [5]), the three instances are not visible.

4.3.1.2 Attributes

None

4.3.1.3 Notifications

The set of notifications defined in the following table is valid.

Name	Qualifier	Notes
notifyAckStateChanged	See Alarm IRP (3GPP TS 32.111-2 [3])	
notifyChangedAlarm	See Alarm IRP (3GPP TS 32.111-2 [3])	
notifyClearedAlarm	See Alarm IRP (3GPP TS 32.111-2 [3])	
notifyNewAlarm	See Alarm IRP (3GPP TS 32.111-2 [3])	
notifyComments	See Alarm IRP (3GPP TS 32.111-2 [3])	
notifyAlarmListRebuilt	See Alarm IRP (3GPP TS 32.111-2 [3])	
notifyPotentialFaultyAlarmList	See Alarm IRP (3GPP TS 32.111-2 [3])
